Protecting our communities

Volume & Harm
## (Balance, Expectation & Choices)

Supt Mark Newcombe

leics.police.uk

Protecting Our Communities

- Protecting vulnerable people - often those likely to suffer the most harm

- Dealing with those who cause most harm

- Effectively deploying our people

- Working with partners to solve locally identified problems - most harmful to communities?

- Trusting our people to use their judgement to make good decisions

- Ensuring effective and efficient use of resources - Volume/Harm/Safety & Wellbeing

Rebalancing is not optional?

The difference?

The chart below shows harm by category, sorted by highest to lowest volume

Volume

A bar chart with the y-axis labelled from 0.0% to 35.0% in 5.0% increments. Categories along the x-axis (highest to lowest): Violence (~25%), ASB (~23.5%), Theft (~19%), Criminal Damage (~10%), Burglary (~9%), Vehicle Crime (~8.5%), Other (~3%), Sexual (~1.5%), Robbery (~1%), Road Accident (~0.5%).
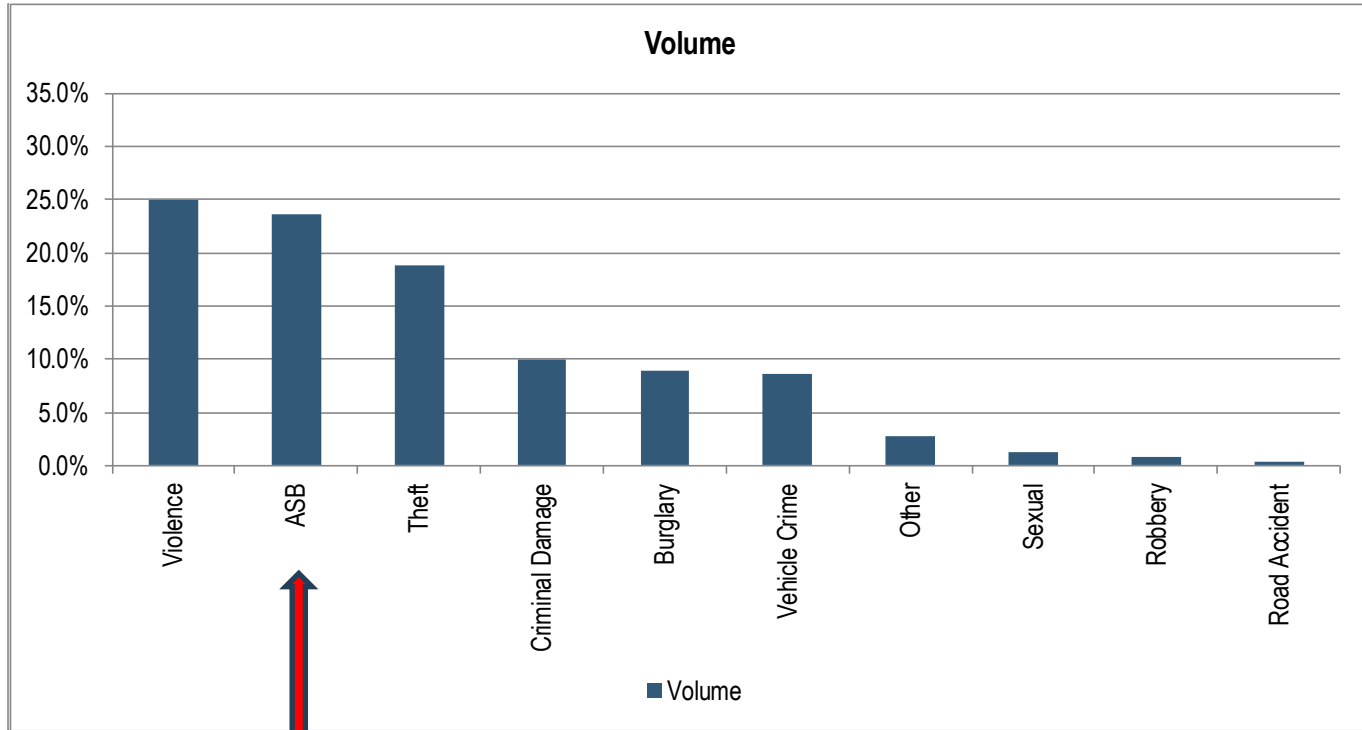

■ Volume

CHI does not reflect public
expectation/experience
