Mr. R. Bone

Mr. N. Booth

Minutes of a meeting of the Local Pensions Committee (formerly know as the Pension Fund Management Board) held at County Hall, Glenfield on Friday, 4 September 2015.

PRESENT:

Leicestershire County Council

Mr. G. A. Hart CC (Chairman)
Mr. S. J. Hampson CC
Mr. Max Hunt CC
Mr. K. W. P. Lynch CC

Mr. P. C. Osborne CC

Leicester City Council

Cllr Deepak Bajaj

District Council Representative

Cllr. Malise Graham MBE

University Representative

Mr. J. Shuter

Staff Representatives

Mr. R. Bone

329. Appointment of Deputy Chairman.

RESOLVED:

That Mr. P. C. Osborne CC be appointed Vice Chairman of the Local Pensions Committee for the period ending with the date of the Annual Council meeting in May 2016.

330. Minutes of the previous meeting.

RESOLVED:

The minutes of the meeting held on 29 May 2015 were taken as read, confirmed and signed.

331. Question Time.

The Chief Executive reported that no questions had been received under Standing Order 35.

332. Questions asked by members.

The Chief Executive reported that no questions had been received under Standing Order 7(3) and 7(5).

333. Urgent items.

There were no urgent items for consideration.

334. Declarations of interest.

The Chairman invited members who wished to do so to declare any interest in respect of items on the agenda for the meeting.

No declarations were made.

335. Summary Valuation of Pension Fund Investments and Investment Performance of Individual Managers.

The Committee considered a report of the Director of Corporate Resources, the purpose of which was to present a summary valuation of the Fund's investments at 30th June 2015 together with figures showing the performance of individual managers. A copy of the report is filed with these minutes, marked '7'.

The Director said that the Fund's target weighting in infrastructure of 3% was currently not being met and therefore an additional investment in IFM would enable the Fund to move closer to its desired structure.

RESOLVED:

- a) That the report be noted
- b) That the application for an additional investment of up to \$15m in infrastructure via IFM be approved.

336. Action Agreed by the Investment Subcommittee.

The Committee received a report by the Director of Corporate Resources, the purpose of which was to inform members of the decisions taken by the Investment Subcommittee at its meeting on 24 June 2015. A copy of the report marked '8' is filed with these minutes.

RESOLVED:

That the report be noted.

337. Collaborative Working with other Local Government Pension Funds.

The Committee received a report by the Director of Corporate Resources, the purpose of which was to inform members of the discussions which had taken place between the County Council and other administering authorities concerning potential collaborative investments. A copy of the report marked '9' is filed with these minutes.

The Director said that Government led consultation on the future structure of the Local Government Pension Scheme had focused on the possibility of asset pooling via the

formation of a small number of Common Investment Vehicles and the increased use of passive management. In response to the Government's proposals, officers, on behalf of the Leicestershire Fund had been in discussion with six other administering authorities concerning the possibility of a joint procurement of passive investment managers. It was envisaged that this approach would enable the Funds to collectively procure passive investment management services at a significantly lower cost than the individual funds were currently paying.

Following questions from members, the Director confirmed that the delegated authority being sought was to enable the joint appointment of a passive manager only and any proposed action concerning the possibility of merging active funds would be presented to the Committee at a future meeting.

RESOLVED:

- a) That the report be noted
- b) That the Director of Corporate Resources be authorised to conclude the matter of a joint procurement of a passive investment manager with other LGPS administering authorities.

338. Funding Update as at 30 June 2015 - Leicestershire County Council Pension Fund.

The Committee considered a report by Hymans Robertson which presented the funding projection at 30 June 2015. A copy of the report, marked '10', is filed with these minutes.

The Investment Consultant reported that due to recent market instability, both equities and bonds had recorded negative returns which had resulted in the Fund experiencing a fall in its funding level over the quarter.

RESOLVED:

That the report be noted.

339. Market Update.

The Committee received a presentation by Kames Capital concerning global market conditions. A copy of the presentation marked '11' is filed with these minutes.

It was noted that whilst bond yields were not expected to rise in the short term, yields and equity markets were still an attractive option for investors and the Fund had a healthy exposure to this type of investment.

RESOLVED:

That the report be noted.

340. Dates of Future Meetings.

RESOLVED

That it be noted that:

- a) The Annual meeting of the Pension Fund will be held on 7 January 2016 at 6.00 pm;
- b) The dates of meetings in 2016, are as follows –

22 January 2016 (Strategy Meeting)
 26 February 2016
 27 May 2016
 2 September 2016
 11 November 2016

341. Exclusion of the Public

RESOLVED:

That under Section 100(A) of the Local Government Act 1972 the public be excluded from the meeting for the following items of business on the grounds that they involve the likely disclosure of exempt information as defined in Part 1 of Schedule 12(A) of the Act:

342. Recommended changes to Pictet and Investec Portfolios

The Committee considered a report by the Director of Corporate Resources which was accompanied by a paper produced by investment advisors Hymans Robertson and a presentation by representatives from Pictet Asset Management. A copy of the report and presentation is filed with these minutes marked '15' and '15a'. The report and presentation was not for publication by virtue of Paragraphs 3 and 10 of Part 1 of Schedule 12(A) of the Local Government Act 1972.

RESOLVED:

- a) That the existing holding in Absolute Return Global Diversified Fund (ARGD) be switched into an investment in Dynamic Absolute Allocation Fund (DAA) , subject to the Director of Corporate Resources being satisfied that the costs of making the switch are acceptable;
- b) That the Director of Corporate Resources be requested to liaise with Investec Asset Management and agree an efficient and cost-effective process for the sale of the Fund's holding in the Investec Global Commodities and Resources Fund;
- c) Subject to recommendation b), proceeds from the sale of the Investec Global Commodities and Resources Fund be invested into DAA.

343. Kames Capital Quarterly Report.

The Board considered a report by Kames Capital Quarterly Report. A copy of the exempt report marked '16' is filed with these minutes. The report was not for publication by virtue of paragraphs 3 and 10 of Part 1 of Schedule 12(A) of the Local Government Act 1972.

RESOLVED:

That the report be noted.

344. KKR Quarterly Report.

The Board considered a report by KKR Quarterly Report. A copy of the exempt report marked '17' is filed with these minutes. The report was not for publication by virtue of paragraphs 3 and 10 of Part 1 of Schedule 12(A) of the Local Government Act 1972.

RESOLVED:

That the report be noted.

345. Kempen Capital Management Quarterly Report.

The Board considered a report by Kempen Capital Management Quarterly Report. A copy of the exempt report marked '18' is filed with these minutes. The report was not for publication by virtue of paragraphs 3 and 10 of Part 1 of Schedule 12(A) of the Local Government Act 1972.

RESOLVED:

That the report be noted.

346. Kleinwort Benson Investors - Quarterly Report.

The Board considered a report by Kleinwort Benson Investors. A copy of the exempt report marked '19' is filed with these minutes. The report was not for publication by virtue of paragraphs 3 and 10 of Part 1 of Schedule 12(A) of the Local Government Act 1972.

RESOLVED:

That the report be noted.

347. Ruffer - Quarterly Report.

The Board considered a report by Ruffer Quarterly Report. A copy of the exempt report marked '20' is filed with these minutes. The report was not for publication by virtue of paragraphs 3 and 10 of Part 1 of Schedule 12(A) of the Local Government Act 1972.

RESOLVED:

That the report be noted.

348. Pictet Asset Management - Quarterly Report.

The Board considered a report by Pictet Asset Management. A copy of the exempt report marked '21' is filed with these minutes. The report was not for publication by virtue of paragraphs 3 and 10 of Part 1 of Schedule 12(A) of the Local Government Act 1972.

RESOLVED:

That the report be noted.

349. Investec Asset Management - Quarterly Report.

The Board considered a report by Investec Asset Management. A copy of the exempt report marked '22' is filed with these minutes. The report was not for publication by virtue of paragraphs 3 and 10 of Part 1 of Schedule 12(A) of the Local Government Act 1972.

RESOLVED:

That the report be noted.

350. Aviva Investors - Quarterly Report.

The Board considered a report by Aviva Investors. A copy of the exempt report marked '23' is filed with these minutes. The report was not for publication by virtue of paragraphs 3 and 10 of Part 1 of Schedule 12(A) of the Local Government Act 1972.

RESOLVED:

That the report be noted.

351. Millennium Global - Quarterly Report.

The Board considered a report by Millennium Global. A copy of the exempt report marked '24' is filed with these minutes. The report was not for publication by virtue of paragraphs 3 and 10 of Part 1 of Schedule 12(A) of the Local Government Act 1972.

RESOLVED:

That the report be noted.

352. IFM Investors - Quarterly Report.

The Board considered a report by IFM Investors. A copy of the exempt report marked '25' is filed with these minutes. The report was not for publication by virtue of paragraphs 3 and 10 of Part 1 of Schedule 12(A) of the Local Government Act 1972.

RESOLVED:

That the report be noted.

353. Legal and General Investment Management - Quarterly Report.

The Board considered a report by Legal and General Investment Manager. A copy of the exempt report marked '26' is filed with these minutes. The report was not for publication by virtue of paragraphs 3 and 10 of Part 1 of Schedule 12(A) of the Local Government Act 1972.

RESOLVED:

That the report be noted.

354. Stafford Timberland - Quarterly Report.

The Board considered a report by Stafford Timberland. A copy of the exempt report marked '27' is filed with these minutes. The report was not for publication by virtue of paragraphs 3 and 10 of Part 1 of Schedule 12(A) of the Local Government Act 1972.

RESOLVED:

That the report be noted.

355. Delaware Investments - Quarterly Report.

The Board considered a report by Delaware Investments. A copy of the exempt report marked '28' is filed with these minutes. The report was not for publication by virtue of paragraphs 3 and 10 of Part 1 of Schedule 12(A) of the Local Government Act 1972.

RESOLVED:

That the report be noted.

356. Ashmore Quarterly Report.

The Board considered a report by Ashmore Quarterly Report. A copy of the exempt report marked '29' is filed with these minutes. The report was not for publication by virtue of paragraphs 3 and 10 of Part 1 of Schedule 12(A) of the Local Government Act 1972.

RESOLVED:

That the report be noted.

357. Aspect Capital - Quarterly report.

The Board considered a report by Aspect Capital. A copy of the exempt report marked '30' is filed with these minutes. The report was not for publication by virtue of paragraphs 3 and 10 of Part 1 of Schedule 12(A) of the Local Government Act 1972.

RESOLVED:

That the report be noted.

LOCAL PENSION COMMITTEE – 13TH NOVEMBER 2015

REPORT OF THE DIRECTOR OF CORPORATE RESOURCES

SUMMARY VALUATION OF PENSION FUND INVESTMENTS AND INVESTMENT PERFORMANCE OF INDIVIDUAL MANAGERS

Purpose of Report

- To present to the Committee a summary valuation of the Fund's investments at 30th September 2015 (attached as an appendix to this report), together with figures showing the performance of individual managers.

Summary Valuation

- The total market value of investments at 30th September 2015 was £2,951.7m compared to £3,032.7m at 30th June 2015, a decrease of £81.0m. In the three month period non-investment related net cash inflows amounting to £2.6m were received. After adjusting for non-investment related cash flows the Fund value decreased by £83.6m, or 2.8%, due to changes in the value of investments.
- The total returns of various indices since 30th June 2015 were as follows:-

	Local Currency %	Converted to Sterling %	Return with 50% hedge %
UK Gilts	+3.8	+3.8	+3.8
UK Index-Linked	+2.9	+2.9	+2.9
UK Equities	-6.9	-6.9	-6.9
North American Equities	-6.7	-3.5	-5.1
European Equities	-7.1	-4.6	-5.8
Japanese Equities	-13.3	-8.0	-10.6
Pacific (Ex Japan) Equities	-9.6	-11.4	-10.5

- The current split of investments over sectors is as follows:-

	30th September 2015		30th June 2015
	£m	%	%
UK Equities	353.1	12.0	12.2
Overseas Equities	1,058.5	35.8	36.9
Targeted Return/Credit/Opportunity Pool	706.2	23.9	23.1
Private Equity	119.7	4.1	3.7
Property	297.5	10.1	9.4
Cash	19.7	0.7	1.3
Inflation-Linked Assets	339.3	11.5	11.1
Commodities	56.6	1.9	2.1
Active and Passive Currency	1.1	0.0	0.2
	2951.7	100.0	100.0

5. The investment performance of the individual managers is laid out in the tables below, over various periods. For most managers the benchmark performance quoted is based on indices, for targeted return managers the benchmark is cash + 4% p.a. and for Millennium the benchmark is 1.5% p.a.

3 months

Manager/Portfolio	Actual (%)	B/mark(%)	Relative (%)
Legal & General (passive global equities)	-6.0	-6.1	+0.1
Aviva Investors (property)	3.4	3.0	+0.4
Aspect Capital (managed futures)	14.2	1.1	+13.1
Delaware (emerging market equities)	-17.7	-14.8	-2.9
Kleinwort Benson (equity dividend)	-5.7	-6.0	+0.3
Kempen (equity dividend)	-3.7	-6.0	+2.3
Ruffer (targeted return)	-4.3	1.1	-4.4
Ashmore (emerging market debt)	-6.6	-5.1	-1.5
Millennium (currency)	-0.1	0.4	-0.5

Financial year-to-date (6 months)

Manager/Portfolio	Actual (%)	B/mark(%)	Relative (%)
Legal & General (passive global equities)	-10.2	-10.1	+0.1
Aviva Investors (property)	10.8	9.4	+1.4
Aspect Capital (managed futures)	-1.5	2.2	-3.7
Delaware (emerging market equities)	-18.7	-19.0	+0.3
Kleinwort Benson (equity dividend)	-10.1	-10.9	+0.8

LOCAL PENSION COMMITTEE – 13TH NOVEMBER 2015

REPORT OF THE DIRECTOR OF CORPORATE RESOURCES

PENSION FUND ANNUAL REPORT AND ACCOUNTS 2014/2015

Purpose of the Report

1. To seek the Committees approval of the Annual Report and Accounts of the Pension Fund for the financial year 2014/2015.

Background

2. There is a statutory requirement for the Annual Report and Accounts (attached as an appendix) to be available on or before 1st December 2015. The accounts are unqualified by the auditor (see previous report on today's agenda), and this is an opportunity for committee members to suggest any amendments which they feel are necessary.

Recommendation

3. The Committee is asked to approve the Pension Fund Annual Report and Accounts for 2014/2015.

Equal Opportunities Implications

None specific

Pensions Section, Leicestershire County Council

This report provides information on the major events which had an impact on the Leicestershire County Council Pension Fund during the Financial Year 2014/2015. Most of these events are covered in more detail in the main body of the report, but can be summarised as follows:-

- A new Local Government Pension Scheme became effective on 1st April 2014. For many employees, particularly part time workers and those who are unlikely to enjoy much career progression, the new scheme will give a much better pension outcome in terms of the level of the pension payable. Normal Retirement Age has, however, changed from 65 to State Pension Age.
- The new LGPS is a Career Average Revalued Earnings (CARE) scheme for service after 31st March 2014, but the final salary link still exists for all service up to this date. This requires significantly more data to be held than under the old scheme, and many employees' benefit calculations will be much more complex. The very late issuing of the Regulations placed significant pressure onto the Pensions Section.
- Equity markets produced strong returns during the year, with exchange rates having a meaningful impact onto the returns achieved by UK investors. The significant strengthening of the US Dollar against sterling boosted returns on US assets to UK investors, whilst the weakening of the Euro had the opposite effect. Japanese equities produced strong returns and were helped by a number of policy actions taken by the Japanese Government and the Bank of Japan.
- The UK equity market produced a return (6.6%) that was lower than most other global regions, and part of the reason for this was the very concentrated nature of the UK market by sector – the heavy weighting of the oil sector, for example, was very detrimental to performance as a result of the large fall in the oil price. Relative to most other Local Government Funds, the Leicestershire Fund has a low weighting to UK equities (<12% of total assets, about half the average) and this low weighting is primarily based on concerns over the lack of diversity within the market.
- The UK commercial property market produced returns of close to 20%, and rising capital values have begun to spread into the Regions. In recent years London and the South East have performed much better than the rest of the UK, partly as a result of the preference of large overseas investors to buy assets in and around the capital.
- Bond yields continued their decline, and as a result capital values increased significantly. At the year end yields were at multi-generational lows and there is a guarantee of future returns being low, and these low returns may also come with a substantial amount of volatility. In recent years bonds have been far from the boring investments that they are perceived to be, and there may well be some interesting times ahead for them.
- The Fund's investments produced a return of 15.6% for the year, which was 4.2% above its benchmark, and performance over the medium term is now above benchmark by about 0.5% p.a. The major contributors to this performance were the Fund's currency manager (responsible for c. 0.8% of the outperformance) and a momentum-based manager that was responsible for c. 1.8% of the outperformance, despite only managing 4% of the Fund's assets. As will always be the case for a Fund with lots of managers, some of the other managers did well relative to their benchmark whilst others were disappointing.

- There was a national reorganisation of the Probation Service during the year and all Probation Staff within the Leicestershire Fund (both active and non-active) were transferred to the Greater Manchester Pension Fund. This included a cash transfer of just over £52m, which is the reason that (for the first time ever) non-investment related cash flows for the year were negative. Despite this restructuring leading to the loss of over 420 active members from the Fund, net active membership still increased during the year by over 200. The difficult financial pressure under which most of the Fund's employers have been operating for a number of years does not appear to have had the impact onto jobs, and hence active membership, that was previously anticipated.
- The Government eventually passed legislation to confirm the requirement for all LGPS Funds to have a Local Pension Board from 1st April 2015. Despite the lengthy period of consultation that had taken place on this matter, the Regulations were not actually laid before Parliament until the end of January 2015. The overall remit of the Local Pension Board is to assist the Administering Authority in ensuring compliance with Legislation and the requirements of the Pensions Regulator, and ensuring efficient and effective governance and administration of the scheme. The Leicestershire Local Pension Board will consist of three member (i.e. employee) representatives and three employer representatives (two elected members from the County Council and one from the City Council).
- In May 2014 the Department for Communities and Local Government (DCLG) commenced a consultation exercise into how increasing levels of collaboration could make the LGPS become more efficient and cost-effective. This consultation removed the immediate threat of forced mergers of Funds - a matter that had been 'floated' in a previous 'Call for Evidence' - but made it clear that this possibility had not been completely dismissed. Responses to the consultation were required by July 2014 and at the year end nothing further had been released on the matter by the DCLG.
- During the year the Fund appointed a credit manager (Partners Group) who will manage a pooled fund of private debt transactions – in effect Partners will be taking the role that historically been taken by banks by lending directly to companies. The Fund also appointed an Emerging Market Debt Manager (Ashmore). Both of these appointments came as a result of strategic decisions taken at the Pension Fund Management Board Annual Strategy Meeting of January 2014.
- At the January 2015 Annual Strategy Meeting of the Pension Fund Management Board it was agreed to terminate the emerging market equity mandate of Capital International and to split the assets between the Fund's two other managers that held emerging market equities.
- Assets of the Fund increased by almost £400m during the year, despite the payment of over £50m in respect of the transfer of the Probation Service. Unfortunately the value of liabilities increased by a larger amount, primarily as a result of a reduction in bond yields that has the impact of reducing expected future investment returns (and, in turn, the present value of liabilities). As a result the Fund's deficit actually increased during the year, and the deficit is estimated to have been higher at the end of the 2014/15 financial year than it was at the date of the 2013 actuarial valuation.

Scheme Arrangements

Leicestershire County Council has a statutory obligation to administer a Pension Fund for eligible employees of all Local Authorities within the County boundary and also the employees of certain other scheduled and admitted bodies. The Fund does not cover teachers, police or fire-fighters who have their own schemes.

Both employees and employers make contributions to the Scheme. From 1st April 2014 new employee contribution rates of between 5.5% and 12.5% became effective, with the rate payable by individuals being based on their actual earnings.

Prior to 1st April 2014 benefits were based on the final salary of a member, and the final salary link will be maintained for all service before this date. For all service after this date the LGPS became a Career Average Revalued Earning (CARE) scheme, whereby a benefit (based on pay) is earned for every year of service and then revalued annually in line with the change in the Consumer Price Index. The accrual rate within the 2014 scheme was improved to 1/49th for every year of service (in comparison to the 1/60th that was in place before) and many members will be better off under the new scheme than the old, in particular those with limited prospects of career progression. Normal Retirement Age has, however, changed from 65 to State Pension Age so the vast majority of members will have to retire later if they wish to receive a pension without an actuarial reduction.

Employers' contribution rates are assessed every three years as part of the actuarial valuation process. The actuarial valuation carried out at 31st March 2013 showed that the Fund had enough assets to cover 72% of its accrued liabilities at that date, which was a decrease from the 80% funding position of the 2010 valuation. Many employing bodies faced meaningful upward pressure onto their contribution rates and will face phased annual increases that commenced on 1st April 2014. The major reason for the fall in the funding level was the fall in Government Bond Yields which has decreased the long-term expectation of future investment returns; if less of the benefits are going to be paid for by the returns achieved on assets held by the Fund, employing bodies have to pay more to meet the cost.

The 'vesting period' for members – the period that they have to be in the LGPS before they have an entitlement to benefit – has varied over the years, but from 1st April 2014 it was changed to two years from three months. Members that do not meet the relevant vesting period have the option of a transfer value or a refund of contributions.

The level of benefits due is directly linked to the service and pensionable pay of an individual member. All members who have contributed to the Scheme for at least the minimum relevant vesting period are entitled to an immediate pension benefit, a preserved benefit or a transfer value payment to an occupational pension scheme or personal pension when they leave the Scheme.

Pensions in payment are increased annually in April, as are the value of benefits payable in the future to members with preserved benefits. The increases awarded over the last 5 years are:-

April 2015	1.2%
April 2014	2.7%
April 2013	2.2%
April 2012	5.2%
April 2011	3.1%

Pension increases are set annually and put into force via an annual Pensions Review Order, which is agreed by Parliament. In June 2010 the Chancellor of the Exchequer's budget announced that future pension increases for Public Sector Pension Schemes would be linked to the Consumer Price Index which, due to a different calculation methodology to the Retail Price Index, is expected to generally be a lower figure. The April 2011 increase was the first one that was linked to the Consumer Price Index.

Scheme Membership

The number of scheme members who are either receiving a benefit or who have a future entitlement to one increased by over 2,200 (2.7%) over the course of the year, to 83,755. This figure excludes the 3,300 members who have no entitlement to a benefit from the fund but do retain the right to either a refund of contributions or a transfer to an alternative pension arrangement. The increase came despite the national reorganisation of the Probation Service which saw over 900 members (c. 420 active, c. 260 pensioners and c. 220 deferreds) transferred to the Greater Manchester Pension Fund.

Active membership increased from 32,458 to 32,667, despite the loss of the active members formerly employed by Leicestershire Probation Service. There is no doubt that auto-enrolment (which forces employing bodies to bring almost all employees who are not currently scheme members into the LGPS) has had a positive impact onto scheme membership, as it brings people that have previously opted out of the scheme back in. It does appear that a reasonable proportion of those that are auto-enrolled do not then opt out again. The two largest employers – the City and County Councils – delayed the implementation of auto enrolment until April 2017.

The net increase (i.e. new pensions commenced less those ceasing) in pensioner members was 672, or 3.0%, which is the lowest increase for a number of years. This smaller increase was due to the fact that there were more pensions ceased due to death (over 1,000, of which about 250 were replaced with dependants' pensions), which is reflective of the larger numbers of older pensioners that the Fund has. Almost 1,500 new pensions commenced following retirement.

The number of members with deferred benefits (an entitlement to a benefit from the scheme at some later date, but not an active member at the yearend) continued to show a significant increase. Deferred membership increased by over 5% over the year and it is likely to continue to grow, although the pace may slow as a result of the increased vesting period effective from 1st April 2014. Many deferred members will receive very low levels of future benefits.

Membership numbers over the last 5 years are shown in the graph below:-

Membership Statistics

Employing body	Contributors		Employers' Contribution Paid 2014/15	Full Rate set in 2013 Actuarial Valuation*
	31 March '15	31 March '14	(% of pensionable pay plus cash)	(% of pensionable pay plus cash)

- (a) Consisting of: Abington, Asfordby Hill, Ashby Hill Top, Ashby School, Ash Field, Barwell C of E, Battling Brook, Beacon Academy, Belvoir & Melton Academy, Birkett House, Blessed Cyprian Tansi MAT, Bosworth Academy, Bottesford, Bringham, Brockington, Brocks Hill, Brooke Hill, Brookvale High, Broomfield, Broom Leys, Bushloe, Captain's Close, Casterton Business and Enterprise College, Castle Donington College, Castle Rock, Catmose Federation, Church Hill Infant, Church Hill Junior, Cobden, Corpus Christi MAT, Cosby, Countesthorpe Community College, Discovery Schools, Dorothy Goodman, Eastfield, Fairfield, Falcons Free School, Farndon Fields, Forest Way, Frisby, Gaddesby, Gartree, Gilmorton Chandler, Glen Hills, Glenmere Langmoor, Great Bowden, Great Dalby, Groby Community College, Guthlaxton, Hall Orchard, Hastings High, Heathfield, Hinckley Academy, Holywell, Humberstone Junior, Humphrey Perkins, Huncote, Ibstock Community College, Ivanhoe College, Ivanhoe under 5s, Kibworth High, King Edward VII, Kirby Muxloe, Krishna Avanti Free School, Lady Jane Grey, Langham, Launde, Leicester Academies Charitable Trust, Leighfield, Leysland High, Limehurst, Lionheart Academies Trust, Long Field, Loughborough C of E Primary, Lubenham All Saints, Lutterworth College, Lutterworth High, Manor High, Market Bosworth High, Market Harborough CE, Martin High, The Meadow, Meadowdale, Measham, Mercenfeld, Merton, Millfield LEAD, Mountfields Lodge, Mowbray Education Trust, Newbridge, Old Dalby, Outwoods Edge, The Pastures, Pochin School, Queensmead, Queniborough, Ratby, Rawlins, Red Hill Field, Redmoor High, Rendell, Ridgeway, Robert Bakewell, Robert Smyth, Rothley, Roundhill, rutland Learning Trust, Ryhall, St Dominics Catholic MAT, St. Gilbert of Sempringham, St. Michael & All Angels, St Peters C of E, Samworth Enterprise Academy, South Charnwood, South Wigston High, Stafford Leys, Stanton under Bardon, Stephenson Studio School, Stonebow, Swallowdale, Thomas Estley, Thornton, Thringstone, Thrussington, Townlands, Uppingham Community College, Welland Park, William Bradford, Winstanley, Woodbrook Vale, Wreake Valley.
- (b) Consisting of Brooksby Melton College, Gateway Sixth Form College, Leicester College, Loughborough College of FE, Regent College, South Leicestershire College, Stephenson College, Wyggeston QEI College.
- (c) Consisting of: ABM Catering, Age Concern, Aspens Services, Bradgate Park Trust, Capita Business Services, Capita Managed IT Solutions, Children's Links, East Midlands Shared Services, East West Community Project, Eastern Shires Purchasing Organisation, EMH Homes, Family Action, Fusion Lifestyle, G4S, G Purchase, ICare, Lifeline Project, Melton Learning Hub, National Youth Agency, Quadron Services, Rushcliffe Care, Seven Locks Housing, SLM Community Leisure, Spire Homes, VISTA, Voluntary Action Leicester.
- (d) Consisting of: Anstey PC, Ashby TC, Ashby Woulds TC, Barrow Upon Soar PC, Barwell PC, Blaby PC, Braunstone TC, Broughton Astley PC, Countesthorpe PC, Glen Parva PC, Kirby Muxloe PC, Leicester Forest East PC, Lutterworth TC, Market Bosworth PC, Mountsorrel PC, Shepshed TC, Sileby PC, Syston TC, Thurmaston PC, Whetstone PC.
- Within Other Employers and Parish & Town Councils Bradgate Park Trust, Leicester and County Mission for the Deaf, SLM Community Leisure, Spire Homes, VISTA, Ashby Town Council, National Youth Agency and Seven Locks Housing made an actuarially certified cash payment in 2014/15.

*Full rate refers to the amount that will be paid in the 2016/17 financial year.

Management of the Fund

The Pension Fund Management Board is responsible for governance of the Fund and consists of five County Council members, two from Leicester City Council, two members representing the District Councils, one representative of De Montfort/Loughborough Universities and three non-voting staff representatives. In order to ensure continuity staff representatives, who are chosen at the Fund's Annual General Meeting, are appointed to the Board for a three year tenure but arrangements have been made to ensure that at least one staff representative place becomes available each year. The Pension Fund Management Board sets the overall investment strategy for the Fund and will deal with all investment governance issues but will generally not be involved in the more 'tactical' issues associated with implementing the strategy, such as investment manager appointments and the timing of asset allocation changes. The Board meets quarterly and also has a separate annual meeting to consider strategic issues relevant to the Fund.

The Investment Subcommittee consists of six voting members (the Chair, Vice Chair, one other elected member of the County Council, the Universities representative and one member representing each of the City and District Councils, all of whom are members of the Pension Fund Management Board) and one non-voting staff representative. The Investment Subcommittee meets in the months in which there is no Pension Fund Management Board meeting, but may meet more or less often if required. Its role is to consider action that is in-line with the strategic benchmark agreed by the Board and to take a pro-active approach to the Fund's investments, and also to deal with investment manager issues including appointments.

The Board and the Investment Subcommittee receive investment advice from Hymans Robertson. Other consultants will also be utilised if there is felt to be an advantage to this.

Activity in respect of individual investment portfolios generally related to actions agreed as part of the January 2014 Annual Strategy Meeting. The Pictet portfolio was reduced substantially in order to fund the requirement to transfer over £50m of cash to the Greater Manchester Pension Fund in respect of the reorganisation of the Probation Service and also to fund a new investment in emerging market debt, for which Ashmore were appointed. A new private debt portfolio managed by Partners Group commenced, and this was funded by reducing the size of the JPMorgan global credit investment. The other meaningful events related to a £25m in a pooled property fund managed by Kames Capital and the termination of Capital International's emerging market equity portfolio. The money released by the termination of this portfolio remained invested in emerging markets, via the existing arrangements with Delaware and Legal & General.

Other activity can be categorised as 'care and maintenance', including filtering cash flows into the portfolios of managers who were below their target weighting and managing the drawdowns of capital to fund new investment in areas such as private equity, infrastructure and timberland.

At the January 2015 Annual Strategy meeting there were a number of 'tweaks' agreed to the investment strategy (including the termination of the Capital International portfolio referred to above), and an agreement in principle to remove commodities (and hence the Investec portfolio) when market levels were more appropriate. It is generally expected that investment strategy will evolve gradually rather than be the subject of large changes.

Investment Management Arrangements

At the January 2015 Annual Strategy meeting of the Pension Fund Management Board there were a number of relatively minor changes made to the Fund's strategic asset allocation benchmark. At the year end the benchmark in place was:

Equities	50.5% - 52.5%
Alternative Assets:	22.5% - 24.5%
<i>Targeted Return</i>	11%
<i>Credit</i>	5%
<i>Emerging Market Debt</i>	2.5%
<i>Other</i>	4% - 6%
Property	10%
Commodities	2.5%
Inflation-Linked	12.5%

As well as small changes in the benchmark exposure to commodities (down by 0.5%) and equities (up by 0.5%), there was also a moderate reweighting of the geographical weighting within equities. A decision was also taken to remove the commodities exposure once there had been a recovery from prices that were felt to have fallen too far. Where this divestment from commodities will be invested is dependent on market conditions at the time.

The setting of the strategic benchmark is the most important decision that the Board makes. It is this decision that will have by far the most significant impact onto the investment return achieved and approximately 90% of the Fund's overall risk is encompassed within the choice of benchmark. Individual investment manager choices are important as they can produce added value by outperforming their benchmarks, but their influence is small in comparison to the choice of benchmark.

The management of the individual asset classes is carried out as follows:

Equities

The Fund has a global passive equity manager (Legal & General) that manages against both market capitalisation benchmarks and also against alternative benchmarks. There are also two global dividend-focused equity managers (Kleinwort Benson and Kempen) and a specialist emerging market equity managers (Delaware).

Within equities the Fund also has private equity investments (i.e. investment in unquoted companies), the vast majority of which is managed on a global basis by Adams Street Partners. There are also relatively small investments into two locally-based private equity funds managed by Catapult Partners.

Alternative Assets

The Fund's targeted return exposure can generally be categorised as investments that are seeking to make a return of 4% p.a. more than could be achieved by an investment in cash (i.e. only slightly below the expected long-term return from equities), and with the expectation that the return will be achieved with relatively low volatility. There are many different ways of achieving this goal and the Fund has three different managers in this area - namely Aspect Capital Partners, Ruffer and Pictet Asset Management. During the year the Pictet portfolio was reduced substantially to provide funding for the new emerging market debt portfolio, cash for a significant payment in respect of the transfer of Probation staff and a property investment that is classified within 'other' alternative assets.

Within 'Credit', JPMorgan manage a global credit portfolio which has freedom to invest in any attractive credit opportunities that are available. This portfolio was reduced by the sale of £55m of assets during the year, which was used as part-payment for an investment in a private debt fund managed by Partners Group. This was new holding and at the year end £75m of the agreed £100m investment had been 'drawn down'. At the year end the Fund had an investment of £36m in the Prudential/M&G UK Companies Financing Fund, which lends directly to secure UK mid-sized companies at attractive rates of interest. This fund has been fully committed and repayments of capital have already commenced and will accelerate in the years ahead.

At the year end the Fund had two distinctly different investments in 'other' alternative assets – a pooled property fund (value £24m) that was focused on areas of the market that had become 'unloved' (and hence undervalued), and investment in M & G Debt Opportunities Funds. The M & G exposure is via two different funds with identical strategies, and had a combined valuation of £57m at the year end.

Property

Colliers Capital UK manage a directly owned property portfolio but have scope to invest in specialist pooled property funds which are in areas that they find attractive but would not be able to buy directly, usually due to the size of individual investments (for example leisure complexes based around multiplex cinemas or Central London offices).

Aviva Investors manage a portfolio of pooled property funds, which includes some covering a wide range of property types and some which are specialist in nature. Via their ability to research the underlying holdings and the skills of the property managers, it is expected that they will add value to the Fund.

Commodities

Investec Asset Management manages a specialist commodity portfolio. This portfolio includes investment in listed commodity companies, together with commodity futures which gain exposure to the price movement of certain commodities. At the January 2015 Annual Strategy Meeting it was agreed that this exposure would be phased out when commodity prices rose from levels that, at the time, were considered to have fallen too far. With the benefit of hindsight, the thesis on which a commodity exposure looked attractive (continuing demand from developing markets and an inability to increase production quickly) turned out to be incorrect, and the asset class is no longer attractive to the Fund.

Inflation-linked

UK inflation is one of the Fund's biggest risks, due to the direct link to benefits and also the less-direct link to salary growth of active members. Protecting against this risk is, therefore, sensible but it is also very expensive – it would involve taking money out of assets that are seeking investment growth (e.g. equities) and investing it in safer, and therefore lower-returning, index-linked bonds. This would push up employers' contribution rates to levels which are unaffordable, so cannot be implemented in a large scale manner.

The most natural asset for protecting the Fund against its inflation risk is UK Government index-linked bonds, but these are expensive as there are a number of price-insensitive buyers and a lack of supply. As a result the Investment Subcommittee has agreed to an initial three-prong investment strategy to obtain some protection against inflation – investment in infrastructure and timberland (both of which have a good historic link to inflation, and also good return prospects), and also a global government index-linked portfolio.

Kames Capital manages a portfolio of global index-linked stocks. The Fund has two global infrastructure managers (IFM and KKR) and a timberland manager (Stafford).

Emerging Market Debt

Ashmore were appointed during the year to manage a new emerging market debt portfolio, and the first investment was made at the end of October 2014. By the end of March 2015, the portfolio was up to its intended size of 2.5% of total assets.

Other portfolios

The Fund also has a currency portfolio that looks to profit from relative movements in currency values, which is managed by Millennium. No 'cash backing' is required, and this portfolio is not included within the strategic asset allocation benchmark.

Risk Management

There are many risks associated with the Local Government Pension Scheme, covering both the investment of the assets and the administration of the benefits payable. It is almost impossible to create a definitive list of these risks and many of the on-going risks are monitored by Officers and only brought to the attention of the Pension Fund Management Board as-and-when it is felt to be necessary and appropriate. When this is deemed necessary a report will be produced by Officers for consideration at a Pension Fund Management Board meeting.

The biggest risk for the Fund is that the value of assets held will ultimately be insufficient to pay for all the benefits due. This risk is managed by a triennial actuarial valuation, which compares the value of assets to the accrued liabilities and sets employer contribution rates that are considered appropriate to ensure that all benefits can be paid; the Fund is currently in deficit (i.e. the value of assets is less than the accrued liabilities) so the employer contribution rates, at a whole Fund level, include payment for not only future service as it accrues but also contributions towards the deficit. Given that many benefits will not become payable for a long time, and taking into account the financial strength of most employers, the actuary is able to take a long-term approach to recovery of the deficit.

The performance of the assets of the Fund is an important element in helping to maintain affordable employer contribution rates – the higher the long-term investment return achieved, the more of the benefits will be funded by investment returns rather than employer and employee contributions. A long-term approach is taken to agreeing an asset allocation benchmark, with both return and risk taken into account. Asset allocation policy is reviewed annually.

Individual investment manager performance is of lower importance than the asset allocation benchmark, but individual manager performance does have an impact and their performance is considered and reviewed regularly. When there are doubts about a manager's ability to generate future performance that is in line with the Fund's requirements/expectations appropriate action will be taken, and this may include the release of a manager. It is not generally optimal to change managers on a frequent basis due to the associated costs (which are mainly the impact of bid/offer spreads and charges within markets), and as a result changes are considered very carefully before they are agreed.

The Pension Fund Management Board receives advice from the investment practice of Hymans Robertson and an independent investment advisor, and this assists in making decisions in respect of both overall investment policy and manager selection/retention.

The Fund employs a large number of investment managers, and all of these invest in a specific asset class and can be termed 'specialist'. Many of these managers are required to have external assessments of their systems and operations and these

are reviewed in order to ensure that there are no issues which put the Fund's investments at risk.

Under the Pensions Act all employers must pay over contributions deducted from employees, plus the required employer contributions, to the administering authority within certain timescales. These payments are monitored closely and immediate action is taken in the event of a late payment. Late payment does not put the benefits of individuals at risk.

Many of the risks associated with providing efficient and cost-effective Pensions Administration are mitigated by ensuring that employees are knowledgeable and well-trained, and this is an on-going issue that is taken very seriously by the administering authority. Ensuring that employers understand their responsibilities to the Fund and fulfil them efficiently is also crucial, and an on-going programme of support and training for them is in place.

Financial Performance

Guidance issued by the Chartered Institute of Public Finance & Accountancy (CIPFA) in August 2014 suggests that the Annual Report should be used for the administering authority to 'demonstrate to stakeholders the effectiveness of its stewardship' from a financial, rather than an investment performance perspective. This stewardship relates to the general management of pension fund income and expenditure.

It would be possible to produce performance indicators about many aspects of the Fund's financial performance to attempt to demonstrate effective financial stewardship, but ironically this will involve the need to employ greater resource and incur higher cost. As a result the preferred option is to comment in general terms about financial governance.

There were a small number of incidences of late payment of contributions by employers over the year, and these were exclusively as a result of administrative failings on their part. On each occasion the employer was reminded of their responsibilities, and it was not felt necessary to levy interest on overdue contributions.

Administrative costs, including staff-related costs for both internally employed Pensions and Investments staff, were either at or below the budget and these costs remain well below the average of other LGPS Funds. Investment management fees are not budgeted for - they will be variable as they are based on market values that are impossible to predict in advance. Action was taken during the year to reduce investment management costs where there was opportunity to do so.

The Fund does not budget for cash flows for investment income, contribution income or benefit expenditure. The reason for this is straightforward – it is impossible to predict with any accuracy how these will change as the reasons for change are outside the control of the Fund. A very simple example is that it is futile to attempt to set a budget for lump sums paid on retirement as the variables include which individual members choose to retire (and, to a certain extent, who becomes pensioners due to redundancy) and how much pension they will commute into a lump sum.

The general trend of overall net cash flows *is* monitored, whether these are derived from investment or non-investment related sources. 2014/15 was highly unusual as it included a significant (c.£52m) cash outflow as a result of the restructuring of the Probation Service but, after excluding this, non-investment cash flows were positive by c.£18m. In addition the Fund received net income (investment income less investment management expenses) of over £20m.

There are some concerns that cash flows will start to reduce. Cuts to budgets within Local Authorities over the coming years may reduce membership (and hence employee/employer contributions) at the same time that benefits paid are increasing, but it is also known that the rate of employers' contribution will increase for a number of years to come. The Fund also has significant investments in pooled funds where the investment income is reinvested rather than distributed, and these can easily be changed to income producing with the generation of an extra £25m - £30m cash flow p.a.

The overall impact of all of these facts is that it is expected that the Fund will remain strongly cash flow positive for many years, and has no need to currently consider the impact that cash flows might have on the suitability of investments. Budgeting for factors that cannot be controlled is not considered necessary, but there are strong controls in place for ensuring that all income due is received and that benefits are not overpaid. A monthly automated check of pensioners is carried out through a reliable tracing agency in order to ensure that pensions cease upon death, and the Fund has a very low incidence of overpayments that occur either as a result of fraud, late notification or error.

Administrative Management Performance

The fund has a number of performance indicators in respect of administration performance, which are split between speed of processes and customer satisfaction. These are reported quarterly to the Pension Fund Management Board and, from 1st April 2015, will be reported instead to the Local Pension Board.

The introduction of the 2014 LGPS brought with it additional pressures to both the administering authority and to employers. This impacted on the timeliness of completion of some processes and the percentages of pensions paid within 5 working days of their due date slipped to below target, as did death benefit payments. Additional staff were appointed on a permanent basis during the year and this will, in the medium term, assist in ensuring that the high level of expected performance is reached again although it will take some time for these staff to become fully proficient. Staffing levels will be kept under review in order to ensure that they are adequate, but the extra complexity of the 2014 scheme and its impact should not be understated and many Funds suffered similar problems with administration.

Despite some of the process-related indicators being below target for part of the year, customer satisfaction remained high; on average about 95% of members considered their interaction to dealings with the Pensions Section to be acceptable or better.

Increases in staffing levels will decrease the ratio of staff to fund-members, but will also increase the ratio of costs to fund-members. Average cases per member of staff are expected to decrease, but many of these cases will involve more complexity. In comparison to the average Local Authority Pension Fund, average cost per member is low.

There is a statutory requirement for the Fund to maintain a Governance Compliance Statement, and this is replicated in full below.

LEICESTERSHIRE COUNTY COUNCIL PENSION FUND

GOVERNANCE COMPLIANCE STATEMENT

1.0 INTRODUCTION

1.1 This is the governance compliance statement of the Leicestershire Pension Fund. The Fund is a statutory one that is set up under an Act of Parliament and the administering authority is Leicestershire County Council (the Council). This statement has been prepared as required by the Local Government Pension Scheme (Amendment) (No. 3) Regulations 2007.

2.0 FUNCTIONS AND RESPONSIBILITIES

2.1 Leicestershire County Council has delegated the responsibility for decisions relating to the investment of the Fund's assets to the Pension Fund Management Board (the Board). This delegation to a specialist committee is in line with guidance from the Chartered Institute of Public Finance & Accountancy (CIPFA).

2.2 The Pension Fund Management Board meets five times a year and its members act in a quasi-trustee capacity. One of these meetings is specifically used to focus entirely on investment strategy. No substantive issues of investment policy will be carried out without the prior agreement of the Board or, in extreme circumstances and where it is impractical to bring a matter to the Board, the agreement of the Chair and Vice-Chair.

2.3 The Board may delegate certain actions to the Director of Corporate Resources. It is the expectation of the Board that some of the more administrative matters relating to investment management, such as the appointment of a custodian, are carried out by the Director of Corporate Resources.

2.4 An Investment Subcommittee, with its members drawn from the Board, meets in the months that there is no Board meeting. It is a decision-making Committee and will generally deal with more technical aspects of investment (such as looking at potential new investment opportunities or dealing with the appointment of new investment managers).

2.5 Pensions Administration issues are the responsibility of the Director of Corporate Resources. The nature of pensions administration is such that it is not currently deemed necessary to have a committee or sub-committee to oversee this function, although setting up such a body will be considered in the event that it is felt that it will be beneficial.

3.0 REPRESENTATION

3.1 The Board is made up of 13 members – 5 members representing Leicestershire County Council, 2 representing Leicester City Council, 2 jointly representing the District Councils, 1 jointly representing De Montfort/Loughborough Universities and 3 non-voting staff representatives. The 10 voting members are appointed using the due political process or, in the case of the two universities, by joint arrangement. There will be at least one staff representative position available annually and a vote will be held to fill any vacancies at the Annual Meeting of the Fund.

4.0 STAKEHOLDER ENGAGEMENT

4.1 An Annual Meeting of the Pension Fund is held annually, usually in January, to which all employee members and other interested parties are welcome. The purpose of the meeting is to present the Annual Report of the Fund and to report on current issues, as well as to elect staff representatives for any vacant position on the Board.

4.2 A number of other initiatives to involve stakeholders also take place, including:

- Presentations by the Fund/Actuary to employing bodies;
- Pensions roadshows at various venues;
- The Annual Report and Account of the Pension Fund;
- Other communications to members.

5.0 REVIEW AND COMPLIANCE WITH BEST PRACTICE

5.1 This statement will be kept under review and will be revised and published following any material change in the governance arrangements of the Pension Fund.

5.2 The regulations require a statement as to the extent to which the governance arrangements comply with guidance issued by the Secretary of State. This guidance contains a number of best practice principles and these are shown below with the assessment of compliance.

Ref	Principle	Compliance/Comments
A	Structure	
a	The strategic management of fund assets clearly rests with the main committee established by the appointing council.	Fully compliant
b	That representatives of participating LGPS employers, admitted bodies and scheme members are members of the committee.	Fully compliant
c	That where a secondary committee has been established, the structure ensures effective communication across both levels.	Fully Compliant
d	That where a secondary committee has been established, at least one seat on the main committee is allocated for a member of the secondary committee	All Investment Subcommittee will be full Board members, so Fully Compliant
B	Representation	
a	That all key stakeholders are afforded the opportunity to be represented within the main committee structure (including employing authorities, scheme members, independent professional observers and expert advisors)	Fully Compliant
b	That where lay members sit on a main committee, they are treated equally and are given full opportunity to contribute to decision making, with or without voting rights	Fully Compliant
C	Selection and Role of Lay Members	
a	That committee members are fully aware of their status, role and function they are required to perform.	Fully Compliant
D	Voting	
a	The policy of the administering authority on voting rights is clear and transparent, including the justification for not extended voting rights to certain groups	Fully Compliant

E	Training/Facility Time/Expenses	
a	That there is a policy on training, facility time and reimbursement of expenses in respect of members involved in the decision-making process	Fully Compliant Members are encouraged to undergo suitable training, and all expenses are reimbursed.
b	That the policy applies equally to all members of committees	Fully Compliant
F	Meetings (frequency/quorum)	
a	That the main committee meet at least quarterly	Fully Compliant
b	That secondary committees meet at least twice a year and the meetings are synchronised with the main committee	The Investment Subcommittee meets regularly, so Fully Compliant
c	If lay members are not included in formal governance arrangements, a forum is available outside of these arrangements by which their interests can be represented	Lay members are included on main committee, so Not Relevant
G	Access	
a	That, subject to any rules in the Council's constitution, all members have equal access to committee papers, documents and advice that falls to be considered by the main committee	Fully Compliant
H	Scope	
a	That administering authorities have taken steps to bring wider scheme issues within the scope of the governance arrangements	Fully Compliant
I	Publicity	
a	That the administering authority have published details of their governance arrangements in such a way that stakeholders with an interest in the way in which the scheme is governed can express an interest in wanting to be part of those arrangements	Fully Compliant. A copy of this statement has been sent to all employing authorities.

governance compliance statement

Investment Markets 2014/2015

- Despite global economic growth that was lacklustre, equity markets produced attractive returns over the course of the year. Company profits were more-or-less in line with expectations and future profit growth was generally revised downwards, but the prospect of interest rates remaining exceptionally low for a very long period encouraged investors to continue to favour equities over other assets.
- Currency movements had a significant impact onto the returns achieved by UK investors, notably the appreciation of the US Dollar and the depreciation of the Euro against sterling. US equities produced perfectly acceptable returns in their local currency, but a 12% appreciation of the Dollar almost doubled the return to UK investors (to 26.6%). A similarly-sized depreciation of the Euro against sterling saw returns from this region dip into single figures.
- The Authorities in Japan continued to take significant policy actions that impacted onto the performance of their stock market. Not only did they manage to maintain the depreciation of the Yen – albeit at a much slower rate than in recent years – that is extremely beneficial to the significant exporting element of Japanese business, but they also took steps that strongly encouraged Japanese companies to become more investor friendly. These steps included an improvement in governance standards, a focus on improved profitability and the encouragement of better utilisation of capital. By promising significant public sector pension fund investment into the shares of companies that embraced shareholder-friendly changes, it does appear that the malaise that has been apparent within most of Japan for many years may at last begin to lift.
- The European Central Bank was eventually forced to undertake quantitative easing to try to revive the European economy. The sums involved are substantial and investors clearly believe that the outcome will be beneficial, given the bounce-back in markets that accompanied the long-awaited (and fully expected) announcement.
- Following the ‘taper tantrum’ of mid-2013 which saw bond yields rise sharply, bond yields have subsequently continued their downward trend. As a result bonds produced very good performance during 2014/15 but stood at very low yields at the year end. Perceived wisdom is that bond yields have to rise from their multi-generational lows, and that future returns from them will be disappointing, but this has been the perception for some time and it had not happened by the year end.
- Commercial property returns in the UK continued their strong recent run, assisted by increasing occupier demand and a significant amount of money finding its way into the market. While much of the investor appetite – particularly that of overseas investors – is in London and the South East, there were clear signs that the Regions were beginning to join in with the recovery.
- Cash continued to be an unattractive asset class for investors, given the low interest rates available and the fact that these interest rates are expected to stay low for some time to come. Cash holdings by institutional investors are very low, which means that market setbacks will not be protected by cash holdings. The opportunity cost for holding cash is, however, more than most investors are willing to risk.

Investment Returns

The table below shows the investment returns achieved (in sterling terms) by different markets in the last two financial years:-

	Year to 31 March 2015 %	Year to 31 March 2014 %
UK Government Bonds	+13.9	-2.6
UK Index-Linked	+18.5	-3.8
Overseas Bonds	+7.6	+1.5
UK Equities	+6.6	+8.8
North America Equities	+25.1	+10.3
European (Ex UK) Equities	+7.5	+18.3
Japanese Equities	+27.1	-1.6
Pacific (Ex Japan) Equities	+12.7	-6.6
UK Property	+18.3	+14.0
Cash	+0.5	+0.4

Value of Investments

The value of the Fund at 31st March 2015 was £3,128.2m, which was £388.3m more than the value a year earlier. The analysis of investments, in summary form, is shown below:-

Investment Performance

Investment returns in 2014/15 were very strong and equities, bonds and property all produced double-digit performance. Returns within different equity markets were varied in 2014/15 and currencies were a significant factor in the level of the return, but even the worst performing regions produced returns that were as high as could reasonably be expected in the long-term. To a sterling investor North America and Japan were the best performing regions (at above 25% each), while emerging markets and Pacific (ex Japan) were in the 12% - 13% range. At between 6% - 8% Europe (ex UK) and the UK were the laggards.

UK Government bonds (gilts) saw significant rises in value, particularly those with longer maturity dates. Quantitative easing appears to have ended in the UK, given that the last purchases by the Bank of England were in July 2012. Despite the absence of a price-insensitive purchaser, other market participants have been willing to pay increasingly high prices for the certainty of long-term returns and many commentators are convinced that a 'bond bubble' exists that must ultimately pop. Despite a fall in actual inflation, index-linked bonds (which guarantee pay outs that increase in line with inflation) produced very strong performance.

Most commodity prices, especially oil, fell during the year and this was one of the main reasons behind the fall in inflation. The Fund has a modest exposure to commodities but this exposure had a negative impact onto performance, despite the fact that the manager actually produced very good performance relative to the index.

Towards the end of the year the Fund removed Capital International as a manager of emerging market equities. Throughout the year the mandate sizes of Pictet and JPMorgan were reduced gradually, but significantly, to respectively fund new investments in private debt (via Partners Group) and emerging market debt (with Ashmore). These new investments and the reductions that funded them came as a result of the strategic asset allocation changes that were agreed by the Pension Fund Management Board in January 2014.

Over the year the Fund's investment performance was +15.6%, which was 4.2% better than the benchmark against which the performance is measured. Individual investment managers produced variable performance relative to the benchmarks, with the exceptional performance of Aspect Capital and Millennium being the two key factors in the outperformance.

The Pension Fund Management Board and Investment Subcommittee will continue to monitor the performance of managers and make changes when it is deemed appropriate. The Fund is, however, a long-term investor and recognises that individual managers have certain style tilts that will not always be rewarded in the short or medium term, but are expected to be rewarded in the long-term. Decisions are, therefore, not generally based on short-term investment performance and if a manager is still considered to be fundamentally sound they have a high chance of being retained. Structural changes to markets or personnel changes within managers are part-and-parcel of a decision on whether to retain a manager.

Since 1st April 2014 all investment performance has been measured net of investment management fees and the figures quoted above are, therefore, after taking these into account.

Brief comments on the performance of the individual managers who were employed for the whole of the year are given below:

- **Colliers Capital UK**

Colliers' portfolio, which comprises both direct and pooled property holdings but is weighted 75:25 in favour of direct holdings, once again outperformed its

benchmark over the year (20.1% vs. 18.3%). The direct portfolio benefited from a number of good rent review outcomes and new lettings, whilst exposure to Central London offices in both the direct and indirect portfolio was helpful. Colliers' performance over the medium and long-term is impressive.

- **Aviva Investors**

Aviva manage a portfolio of pooled property funds and produced a return of 19.5% over the year, which was 1.8% above their benchmark. The performance of a number of recovery funds that bought properties in the depths of the Global Financial Crisis and sold into the strong recent markets were important in the outperformance, but some of the specialist funds also produced exceptionally good returns. Aviva's performance since their appointment to this mandate is highly creditable.

- **Millennium Asset Management**

The active currency managed by Millennium is based on a notional £340m and over the course of the year they produced added value of nearly £23.5m. At a total Pension Fund level, this added approximately 0.8% of performance and was a spectacular outcome. Central to the value creation were large overweight positions in the US Dollar, against underweight positions in the Japanese Yen and the Euro. Millennium did profit from other currencies, but it was the positioning in these three currencies that was key.

It seems improbable that this level of performance will be repeated, but this should not detract from the achievement of 2014/15.

- **JP Morgan Asset Management**

The investment in the JPMorgan Strategic Bond Fund, which seeks to find the most attractive opportunities within the global bond/credit markets and to take advantage of them, was reduced substantially during 2014/15 to fund the investment in a private debt fund managed by Partners Group.

Performance during the year was creditable, although its impact onto the Total Fund was small due to the size of the investment.

- **Kohlberg Kravis Roberts (KKR)**

The Fund originally committed to invest \$56m in the KKR Global Infrastructure Fund and by the year end 90% of this commitment had been 'drawn down'. During the year a \$30m commitment to a second KKR infrastructure fund was agreed, in order that the Fund can maintain its strategic weighting to the asset class.

Infrastructure is an illiquid asset class and performance can only really be judged over the medium-to-long-term, but the increases in capital value and dividend distributions that have been paid so far are encouraging.

- **Legal & General**

Legal & General manage over one-third of the Fund's assets (and 2/3^{ths} of the equity weighting) in pooled passive funds, which are designed to closely match the returns of certain pre-defined indices.

The Fund has half of its North American and Continental European passive exposure within market-capitalisation weighted indices (where the value of a company dictates its weighting within the index), with the other half in 'fundamental indices' (which take account of matters such as dividends, sales and free cash flow in the calculation of the benchmark weighting of each company).

In the long term it is expected that the fundamental index will add a modest amount of additional return, although the split is mainly a diversification tool. Since

inception in November 2012 the fundamental indices have produced meaningful outperformance of market capitalisation indices, but they underperformed in 2014/15.

Legal & General continue to track the indices exceptionally accurately.

- **Adams Street Partners**

Adams Street Partners manage the Fund's global private equity (i.e. unquoted company) exposure, and over the course of the year significant cash sums (£27.6m) were received from successful realisations of investments. Over the long-term the portfolio has produced a meaningful level of outperformance relative to quoted markets.

Much of the private equity portfolio is quite mature and further commitments have been made in recent years to ensure that the Fund's target weighting (4%) within the asset class is maintained as far as is possible. During the year drawdowns for new investment were £19.7m.

- **Ruffer LLP**

Ruffer manages a targeted return portfolio for the Fund and outperformed their benchmark for the year (+12.5% vs. +4.5%). Ruffer's whole investment philosophy is based on balancing investments in 'fear' (the risk of markets falling) with investments in 'greed' (generally equities) and arriving at a portfolio that is well protected from loss of capital, whilst still being capable of gaining when markets are buoyant.

During 2014/15 most of their 'greed' investments – most notably Japanese and US equities – performed well, as did the index-linked bonds that they hold as 'fear' assets. Meaningful exposure to gold-related investments within the 'fear' portfolio held back performance, but the overall performance was impressive and their performance since the inception of the portfolio is 5% p.a. above their target.

- **Pictet Asset Management**

The Pictet portfolio was reduced significantly during the year, in order to provide funding for new investments in private debt and a property fund. Performance during the year (8.5%) was 4% above their benchmark, but their longer-term performance has been disappointing and their portfolio is likely to be removed completely during 2015/16

- **Delaware Investments**

Having produced significant outperformance of the emerging market equity index in the previous year, 2014/15 saw all of this outperformance (and more) given back. Underperformance of their benchmark by 10.6% was extremely disappointing, although over three years their performance is still marginally above the benchmark.

Delaware run a focused portfolio with relatively few holdings, so volatility of relative performance is an expectation. They will, however, be kept under careful watch in the near term.

- **Investec Asset Management**

The Fund's investment with Investec is in a commodity fund. Commodity markets produced very poor returns (-18.1%) during the year, with oil seeing a particularly noteworthy decline in price. At only -5.5% Investec's performance was actually excellent in relative terms and they have outperformed their benchmark by almost 4% p.a. over the last three years. Overall, however, their performance since inception is disappointing as the portfolio is run to achieve absolute positive returns, and this has not happened.

- Kleinwort Benson**
Kleinwort Benson manages a 'dividend focused' global equity portfolio, which underperformed its broad equity market benchmark by 4.2% in 2014/15, with almost all of the underperformance coming in the final quarter. The key factor in the underperformance was the very narrow group of large technology stocks from the US which saw their share prices increase substantially, none of which were held in the Kleinwort Benson portfolio. Since inception of the portfolio in November 2012, its performance is marginally lower than the broad equity market.
- Kempen**
Kempen also manages a 'dividend focused' portfolio and their performance was once again disappointing, with a return that was 7.1% below global equity markets. Their distinct style meant that they held virtually no exposure in Japan and were significantly underweight in the US, which were the two best regional markets by some distance. Whilst it is possible to understand the reasons for their underperformance, it does not make it any more palatable.
- Aspect Capital**
Aspect invest in liquid futures contracts within equities, bonds, commodities and currencies and can be broadly described as a 'trend-following' manager – their computer models identify trends (whether up or down) and take positions accordingly. When no trends exist or where trends emerge but then reverse quickly, this portfolio will not produce positive performance, and this is what happened in the 2013/14 financial year.

2014/15 could not, however, have been any different from the previous year. Trends persisted in bonds (yields went down), equities (markets went up), currencies (e.g. US Dollar strengthening, Euro weakening) and commodities (e.g. weakening oil prices); it was pretty much a perfect year for trend-following managers. This was reflected in the performance of the Aspect portfolio, which produced a return of over 50% for the year. The performance of the Aspect portfolio was responsible for about 1.8% of the total Fund's outperformance, despite it only being 4% of total assets.

- IFM**
A \$56m investment was made into the IFM Global Infrastructure Fund in February 2013. The portfolio initially consisted of 8 underlying assets but by 31st March 2015 this had increased to 11 assets, with another 2 being close to completion.

Performance since purchase has been acceptable, despite problems in 2013/14 at one of the larger assets that led to a significant reduction in its valuation. These problems appear to have now been dealt with, but performance in areas such as infrastructure can only really be judged over the long-term.

- Kames Capital**
Kames manage a global index-linked bond portfolio on behalf of the Fund, and during the year the performance of +26.7%. This was marginally below their benchmark, which is based on UK long-dated index-linked bonds, but well above the UK All-Stock index-linked bond index.

Kames also manage a currency hedging programme, with a default position of hedging half of the Fund's currency exposure that comes via the overseas equity benchmark. During the year they were generally well positioned and the hedging positions that they took added £8.8m relative to the benchmark position. At a total Fund level, this added about 0.3% to the excess performance.

Five Year Returns		
	Returns	
	LCC %	Benchmark %
2010/11	+8.5	+7.9
2011/12	+0.8	+0.9
2012/13	+12.4	+11.0
2013/14	+3.9	+7.3
2014/15	+15.6	+11.4
Average Annual Return Over 5 years	+8.1	+7.6
Annualised 5 year investment returns (for managers employed for more than 5 years)		
Colliers CRE	+11.6	+10.3
Millennium	+1.6	+1.5
Aviva Investors	+9.7	+8.4
Legal & General	+9.5	+9.4
Ruffer	+7.5	+4.4
Pictet	+4.1	+4.4

Major Shareholdings

Most of the investments are held within pooled investment vehicles and the Fund has very few individual shareholdings. All of these are within the targeted return portfolio managed by Ruffer. The largest of these shareholdings (the Japanese company Mitsubishi UFG Financial Group) is valued at £5.0m (0.16% of total fund assets), so this information has been omitted from the report.

**Leicestershire County Council Pension Fund (“the Fund”)
Actuarial Statement for 2014/15**

This statement has been prepared in accordance with Regulation 57(1)(d) of the Local Government Pension Scheme Regulations 2013, and Chapter 6 of the CIPFA/LASAAC Code of Practice on Local Authority Accounting in the UK 2014/15. It has been prepared at the request of the Administering Authority of the Fund for the purpose of complying with the aforementioned regulations.

Description of Funding Policy

The funding policy is set out in the Administering Authority’s Funding Strategy Statement (FSS), dated February 2014. In summary, the key funding principles are as follows:

- to ensure the long-term solvency of the Fund, using a prudent long term view. This will ensure that sufficient funds are available to meet all members’/dependants’ benefits as they fall due for payment;
- to ensure that employer contribution rates are reasonably stable where appropriate;
- to minimise the long-term cash contributions which employers need to pay to the Fund, by recognising the link between assets and liabilities and adopting an investment strategy which balances risk and return (NB this will also minimise the costs to be borne by Council Tax payers);
- to reflect the different characteristics of different employers in determining contribution rates. This involves the Fund having a clear and transparent funding strategy to demonstrate how each employer can best meet its own liabilities over future years; and
- to use reasonable measures to reduce the risk to other employers and ultimately to the Council Tax payer from an employer defaulting on its pension obligations.

The FSS sets out how the Administering Authority seeks to balance the conflicting aims of securing the solvency of the Fund and keeping employer contributions stable. For employers whose covenant was considered by the Administering Authority to be sufficiently strong, contributions have been stabilised below the theoretical rate required to return their portion of the Fund to full funding over 20 years if the valuation assumptions are borne out. Asset-liability modelling has been carried out which demonstrate that if these contribution rates are paid and future contribution changes are constrained as set out in the FSS, there is still a better than 67% chance that the Fund will return to full funding over the deficit recovery period.

Funding Position as at the last formal funding valuation

The most recent actuarial valuation carried out under Regulation 36 of the Local Government Pension Scheme (Administration) Regulations 2008 was as at 31 March 2013. This valuation revealed that the Fund’s assets, which at 31 March 2013 were valued at £2,628 million, were sufficient to meet 72% of the liabilities (i.e. the present value of promised retirement benefits) accrued up to that date. The resulting deficit at the 2013 valuation was £1,024 million.

Individual employers’ contributions for the period 1 April 2014 to 31 March 2017 were set in accordance with the Fund’s funding policy as set out in its FSS.

Principal Actuarial Assumptions and Method used to value the liabilities

Full details of the methods and assumptions used are described in the valuation report dated 28 March 2014.

Method

The liabilities were assessed using an accrued benefits method which takes into account pensionable membership up to the valuation date, and makes an allowance for expected future salary growth to retirement or expected earlier date of leaving pensionable membership.

Assumptions

A market-related approach was taken to valuing the liabilities, for consistency with the valuation of the Fund assets at their market value.

The key financial assumptions adopted for the 2013 valuation were as follows:

Financial assumptions	31 March 2013	
	% p.a. Nominal	% p.a. Real
Discount rate	4.80%	2.30%
Pay increases	4.30%	1.80%
Pension increases	2.50%	-

The key demographic assumption was the allowance made for longevity. The life expectancy assumptions are based on the Fund's VitaCurves with improvements in line with the CMI_2010 model, assuming the current rate of improvements has reached a peak and will converge to long term rate of 1.25% p.a. Based on these assumptions, the average future life expectancies at age 65 are as follows:

	Males	Females
Current Pensioners	22.2 years	24.3 years
Future Pensioners*	24.2 years	26.6 years

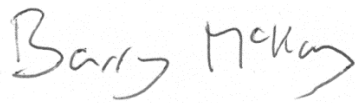

*Currently aged 45

Copies of the 2013 valuation report and Funding Strategy Statement are available on request from Leicestershire County Council, the Administering Authority to the Fund.

Experience over the period since April 2014

Real bond yields have fallen dramatically (leading to a higher liability) The effect of this has been only partially offset by strong asset returns. Overall funding levels are likely to have remained approximately the same but the monetary amount of deficits will have increased over this period as both asset and liability values have increased in size.

The next actuarial valuation will be carried out as at 31 March 2016. The Funding Strategy Statement will also be reviewed at that time.

Net Assets Statement

	Notes	31 March 2015 £000	31 March 2014 £000
Investment assets	9	3,128,239	2,736,440
Investment liabilities	9	(8,086)	(2,791)
		3,120,153	2,733,649
Current assets	13	10,063	9,944
Current liabilities	13	(2,046)	(3,740)
Net assets of the Fund at 31st March		3,128,170	2,739,853

The financial statements summarise the transactions of the Fund and deal with the net assets at the disposal of the Council. They do not take account of obligations to pay pensions and benefits which fall due after the end of the Fund year. The actuarial position on the Scheme, which does take account of such obligations, is set out in the Actuary's Report on pages 19 and 20 of these accounts and should be read in conjunction with them.

The notes on pages 28 – 44 form part of the financial statements.

NOTES TO THE FINANCIAL STATEMENTS

1. Basis of preparation

The statement of Accounts summarises the Fund's transaction for the 2014/15 financial year and its position at year-end as at 31st March 2015. The accounts have been prepared in accordance with the Code of Practice on Local Authority Accounting in the United Kingdom 2014/15 which is based upon International Financial Reporting Standards (IFRS), as amended for the UK public sector.

The accounts summarise the transactions of the Fund and report on the net assets available to pay pension benefits. The accounts do not take account of obligations to pay pensions and benefits which fall due after the end of the financial year.

2. Accounting policies

The following principal accounting policies, which have been applied consistently, have been adopted in the preparation of the financial statements:

Investments

Equities traded through the Stock Exchange Electronic Trading Service (SETS) are valued at bid price. Other quoted securities and financial futures are valued at the last traded price. Private equity investments and unquoted securities are valued by the fund managers at the year end bid price, or if unavailable in accordance with generally accepted guidelines. Accrued interest is excluded from the market value of fixed interest securities and index-linked securities but is included in investment income receivable.

Pooled Investment Vehicle units are valued at either the closing bid prices or the closing single price reported by the relevant investment managers, which reflect the accepted market value of the underlying assets.

Private equity, global infrastructure and hedge fund valuations are based on valuations provided by the managers at the year end date. If valuations at the year end are not produced by the manager, the latest available valuation is adjusted for cash flows in the intervening period.

Property investments are stated at open market value based on an expert valuation provided by a RICS registered valuer and in accordance with RICS guidelines.

Options are valued at their mark to market value. Forward foreign exchange contracts outstanding at the year end are stated at fair value which is determined as the gain or loss that would arise if the outstanding contract was matched at the year end with an equal and opposite contract. The investment reconciliation table in note 9 discloses the forward foreign exchange settled trades as net receipts and payments.

Investment income

Income from equities is accounted for on the date stocks are quoted ex-dividend. Income from overseas investments is recorded net of any withholding tax.

Income from fixed interest and index-linked securities, cash and short-term deposits is accounted for on an accruals basis.

Income from other investments is accounted for on an accruals basis.

The change in market value of investments (including investment properties) during the year comprises all increases and decreases in the market value of investments held at any time during the year, including profits and losses realised on sales of investments and unrealised changes in market value but excluding translation gains and losses arising from assets denominated in foreign currency.

Foreign currencies

Assets and liabilities in foreign currencies are expressed in sterling at the rates of exchange ruling at the year-end. Income from overseas investments is translated at a rate that is relevant at the time of the receipt of the income or the exchange rate at the year end, whichever comes first.

Surpluses and deficits arising on conversion or translation are dealt with as part of the change in market value of investments.

Contributions

Normal contributions, both from the members and from employers, are accounted for in the payroll month to which they relate at rates as specified in the rates and adjustments certificate issued by the Fund's actuary. Additional contributions from the employer are accounted for in accordance with the agreement under which they are paid, or in the absence of such an agreement, when received.

Additional payments for early retirements relate to the actuarially assessed extra cost to the Fund of employing bodies allowing their members to retire in advance of normal retirement age. These costs are reimbursed to the Fund by employing bodies and are accounted for on a cash basis.

Benefits payable

Where members can choose to take their benefits as a full pension or a lump sum with reduced pension, retirement benefits are accounted for on an accruals basis on the later of the date of retirement and the date the option is exercised.

Other benefits are accounted for on the date the member leaves the scheme or on death.

Transfers to and from other schemes

Transfer values represent the capital sums either receivable in respect of members from other pension schemes of previous employers or payable to the pension schemes of new employers for members who have left the Scheme. They take account of transfers where the trustees of the receiving scheme have agreed to accept the liabilities in respect of the transferring members before the year end, and where the amount of the transfer can be determined with reasonable certainty.

Other expenses

Administration and investment management expenses are accounted for on an accruals basis. Expenses are recognised net of any recoverable VAT.

Employee expenses have been charged to the Fund on a time basis. Office expenses and other overheads have also been charged on an accruals basis.

3. Contributions

	2014-15 £000	2013-14 £000
Employers		
Normal	110,365	101,276
Termination Valuation Payments	6	
Additional payments for early retirements	2,492	1,796
Additional payments for ill-health retirements	1,620	1,089
Members		
Normal	35,889	34,690
Purchase of additional benefits	476	469
	150,848	139,320

Additional payments for early retirements are paid by employers, once calculated and requested by the Fund, to reimburse the Pension Fund for the cost to the Fund of employees who are allowed to retire before their normal retirement age. Additional payments for ill-health retirements are paid by the insurance company, where the employer has taken out ill-health insurance and the claim has been accepted as valid. Purchase of additional benefits by members allows extra service to be credited on top of any service earned via employment. Termination valuation payments relate to the actuarially assessed deficit within an employer's sub-fund when their last active employee leaves.

The contributions can be analysed by type of Member Body as follows:-

	2014-15 £000	2013-14 £000
Leicestershire County Council	38,464	36,571
Scheduled bodies	105,364	96,829
Admitted bodies	7,020	5,920
	150,848	139,320

4. Transfers In

	2014-15 £000	2013-14 £000
Individual transfers in from other schemes	3,745	4,308
	3,745	4,308

5. Benefits

	2014-15 £000	2013-14 £000
Pensions	98,351	93,479
Lump sum retirement benefits	23,911	24,705
Lump sum death benefits	3,748	2,845
	126,010	121,029

The benefits paid can be analysed by type of Member Body as follows:-

	2014-15 £000	2013-14 £000
Leicestershire County Council	46,001	45,651
Scheduled bodies	71,035	66,309
Admitted bodies	8,974	9,069
	126,010	121,029

6. Payments to and on account of leavers

	2014-15 £000	2013-14 £000
Refunds to members leaving scheme	344	15
Payments for members joining state scheme	218	(2)
Individual transfers to other schemes	6,860	6,102
Bulk transfers to other schemes	53,904	0
	61,326	6,115

7. Administration expenses

	2014-15 £000	2013-14 £000
Administration and Processing	1,075	1,030
Actuarial fees	79	201
Legal and other professional fees	25	25
Computer system costs	186	231
	1,365	1,487

8. Investment income

	2014-15 £000	2013-14 £000
Dividends from equities	2,435	2,444
Income from index-linked securities	3,294	3,631
Income from pooled investment vehicles	14,221	13,324
Net rents from properties	5,541	4,977
Interest on cash or cash equivalents	245	201
Net currency profit/(loss)	263	(83)
Securities lending commission	18	7
Insurance commission	39	32
	26,056	24,533

9. Investments

	Value at 31.3.14 £000	Purchases at Cost and Derivatives Payments £000	Sale Proceeds and Derivative Receipts £000	Change in Market Value £000	Value at 31.3.15 £000
Equities	87,415	41,976	(54,287)	11,960	87,064
Index-linked securities	239,178	142,650	(136,362)	59,472	304,938
Pooled investment vehicles	2,256,548	408,617	(377,269)	294,848	2,582,744
Properties	78,940	2,755	(282)	9,068	90,481

	2,733,649	623,817	(639,383)	402,070	3,120,153

The change in the value of investments during the year comprises all increases and decreases in the market value of investments held at any time during the year, including profits and losses realised on sales of investments during the year.

9. Investments (continued)

The Fund has investments of £187.542m in the Legal & General UK equity index fund (31/3/14, £180.680m), £160.464m in the Legal & General UK Core equity index fund (31/3/14, £153.869m), £207.503m in the Legal & General North America index fund (31/3/14, £183.138m) and £209.887m in the Legal & General FTSE RAFI North America fund (31/3/14, £185.011m) that exceed 5% of the total value of net assets. At 31/3/14 the Fund had an investment of £139.887m in the Pictet Absolute Return Global Diversified Fund that exceeded 5% of the total value of net assets, but the investment was not above this threshold on 31/3/15.

The Fund had no investments which exceed 5% of any class or type of security.

Total Investments	3,120,153	2,733,649

At 31/3/15 pooled investment vehicles include investments in fund-of-funds which have an underlying value of £122.000m in private equity, £18.496m in illiquid corporate bonds and £52.107m in timberland.

10. Derivatives

The Fund holds derivatives for a number of different reasons. Forward foreign exchange contracts are held to benefit from expected changes in the value of currencies relative to each other. Futures can be held to gain full economic exposure to markets without the requirement to make a full cash investment, and can be held to ensure that the Fund's exposures are run efficiently. Options are generally used to express an investment view but can give a much higher economic exposure than is required to be paid for the options – they also ensure that the potential loss is limited to the amount paid for the option.

10. Derivatives (continued)*Forward Foreign Exchange Contracts*

All forward foreign exchange contracts are classed as 'Over the Counter' and at the year end the net exposure to forward foreign exchange contracts can be summarised as follows:

	2014-15 £000	2013-14 £000
Active currency positions (those whose purpose is solely to seek economic gain)	(1,660)	243
Passive currency positions (those whose purpose is to hedge the Fund's benchmark exposure to currencies back to sterling)	(3,590)	(1,356)
	(5,250)	(1,113)

			(1,214)

11. Investment management expenses

	2014-15 £000	2013-14 £000
Administration, management and custody	5,564	6,874
Performance measurement services	30	16
Other advisory fees	107	62
	5,701	6,952

12. Property investments

The Fund's investment in property comprises investments in pooled property funds and a number of directly owned properties which are leased commercially to various tenants. Details of these directly owned properties are as follows.

Year ending 31 st March 2014		Year ending 31 st March 2015
£000		£000
66,505	Opening balance	78,940
	Additions:	
8,832	Purchases	2,755
-	Construction	-
-	Subsequent expenditure	-
(75)	Disposals	(282)
3,678	Net increase in market value	9,068
78,940	Closing balance	90,481

There are no restrictions on the realisability of the property or the remittance of income or proceeds on disposal and the fund is not under any contractual obligations to purchase, construct or develop any of these properties. Nor does it have any responsibility for any repairs, maintenance or enhancements.

The split of the directly owned properties by tenure is as follows.

	31 st March 2015 £000	31 st March 2014 £000
Freehold	63,631	58,505
Long leasehold (over 50 years unexpired)	13,100	9,985
Medium/Short leasehold (under 50 years unexpired)	13,750	10,450
	90,481	78,940

All properties, except the Fund's farm investment, were valued on an open market basis by Nigel Holroyd and Adrian Payne of Colliers Capital UK at 31st March 2015. The Fund's farm was valued on an open market basis by James Forman of Leicestershire County Council. All valuers are Members of the Royal Institute of Chartered Surveyors.

13. Current assets and liabilities

	31 March 2015 £000	31 March 2014 £000
Contributions due from employers	6,956	7,393
Cash balances	100	87
Other receivables	817	274
Due from Ministry of Justice	2,190	2,190
Current assets	10,063	9,944
Due to Leicestershire County Council	(316)	(2,034)
Fund management fees outstanding	(1,169)	(1,355)
Other payables	(561)	(351)
Current liabilities	(2,046)	(3,740)
Net current assets and liabilities	8,017	6,204

Contributions due at the year end were received by the due date.

The amount due from the Ministry of Justice relates to the actuarially assessed deficit in respect of Magistrates' Court staff that were formerly in the LGPS. The amount is payable over 10 years at £365,000 per annum.

Analysis of investments by manager

The Fund employs external investment managers to manage all of its investments apart from an amount of cash and a farm property, which are managed by Leicestershire County Council. This structure ensures that the total Fund performance is not overly influenced by the performance of any one manager.

The market value of investments in the hands of each manager is shown in the table below:-

Investment Manager	At 31st March 2015	%	At 31st March 2014	%
	£000		£000	
Legal & General	1,193,357	38.2	1,023,692	37.5
Kames Capital	260,593	8.4	184,189	6.7
Ruffer LLP	224,472	7.2	199,491	7.3

Capital International	0	0.0	32,797	1.2
Internally Managed and currency managers	23,880	0.8	34,692	1.3
	3,120,153		2,733,649	

15. Custody of assets

All the Fund's directly held assets are held by external custodians and are therefore not at risk from the financial failure of any of the Fund's investment managers. Most of the pooled investment funds are registered with administrators that are independent of the investment manager.

16. Operation and management of fund

Details of how the Fund is administered and managed are included in pages 6 to 14.

17. Employing bodies and fund members

A full list of all bodies that have active members within the Fund is included on page 8. Statistical information in respect of the number of members is included on page 7.

18. Actuarial valuation

At the date of the Fund's last actuarial valuation (31st March 2013), the Fund had assets of £2,628m. At that date the Fund's assets covered 72% of its accrued liabilities.

19. Valuation of financial instruments carried at fair value

The valuation of financial instruments has been classified into three levels, according to the quality and reliability of the information used to determine fair values.

Level 1

Financial instruments at Level 1 are those where the fair values are derived from unadjusted quoted prices in active markets for identical assets or liabilities. Products classified as level 1 comprised quoted equities, quoted fixed interest securities, quoted index-linked securities and pooled investment vehicles where the underlying assets fall into one of these categories.

Listed investments are shown at bid prices. The bid value of the investment is based on the bid market quotation of the relevant stock exchange.

Level 2

Financial instruments at Level 2 are those where quoted market prices are not available; for example, where an instrument is traded in a market that is not considered to be active, or where valuation techniques are used to determine fair value and where these techniques use inputs that are based significantly on observable market data.

Level 3

Financial instruments at Level 3 are those where at least one input that could have a significant effect on the instrument's valuation is not based on observable market data. Such instruments would include unquoted equity investments, hedge funds and infrastructure, which are valued using various valuation techniques that require significant judgement in determining appropriate assumptions.

The values of the investment in private equity are based on valuations provided by the general partners to the private equity funds in which Leicestershire County Council Pension Fund has invested. These valuations are prepared in accordance with the International Private Equity and Venture Capital Valuation Guidelines, which follow the valuation principles of IFRS and US GAAP.

The values of the investment in hedge funds and infrastructure are based on the net asset value provided by the fund manager. Assurances over the valuation are gained from the independent audit of the value.

The following tables provide an analysis of the financial assets and liabilities of the pension fund grouped into levels 1 to 3, based on the level at which fair value is observable.

	Quoted market price	Using observable inputs	With significant unobservable inputs	
Values at 31st March 2014	Level 1	Level 2	Level 3	Total
	£000	£000	£000	£000
Financial assets at fair value	2,178,362	341,118	216,960	2,736,440
Financial liabilities at fair value	(2,791)			(2,791)
Net financial assets	2,175,571	341,118	216,960	2,733,649

	Quoted market price	Using observable inputs	With significant unobservable inputs	
Values at 31st March 2015	Level 1	Level 2	Level 3	Total
	£000	£000	£000	£000
Financial assets at fair value	2,305,965	567,867	254,407	3,128,239
Financial liabilities at fair value	(8,086)			(8,086)
Net financial assets	2,297,879	567,867	254,407	3,120,153

20. The Nature and Extent of Risks Arising from Financial Instruments

Risk and risk management

The Fund's primary long-term risk is that the Fund's assets will fall short of its liabilities (i.e. the promised benefits payable to members). Therefore the aim of investment risk management is to minimise the risk of an overall reduction in the value of the Fund and to maximise the opportunity for gains across the whole Fund portfolio. The fund achieves this through asset diversification to reduce exposure to market risk (price risk, currency risk and interest rate risk)

and credit risk to an acceptable level. In addition, the Fund manages its liquidity risk to ensure that there is sufficient liquidity to meet the Fund's required cash flows. These investment risks are managed as part of the overall pension fund risk management programme.

Responsibility for the Fund's risk management strategy rests with the Pension Fund Management Board.

a) Market risk

Market risk is the risk of loss from fluctuations in equity and commodity prices, interest and foreign exchange rates and credit spreads. The Fund is exposed to market risk from its investment activities. The level of risk exposure depends on market conditions, expectations of future price and yield movements and the asset mix.

The objective of the Fund's risk management strategy is to identify, manage and control market risk within acceptable parameters, whilst optimising the return on risk.

In general, excessive volatility in market risk is managed through the diversification of the portfolio in terms of geographical and industry sectors and individual securities. To mitigate market risk, Leicestershire County Council and its investment advisors undertake appropriate monitoring of market conditions and benchmark analysis.

The Fund manages these risks via an annual strategy review which ensures that market risk remains within acceptable levels. On occasion equity futures contracts and exchange traded option contracts on individual securities may be used to manage market risk on investments, and in exceptional circumstances over-the-counter derivative contracts may be used to manage specific aspects of market risk.

Other price risk

Other price risk represents the risk that the value of a financial instrument will fluctuate as a result of changes in market prices (other than those arising from interest rate risk or foreign exchange risk), whether those changes are caused by factors specific to the individual instrument or its issuer or factors affecting all such investments in the market.

The Fund is exposed to share and derivative price risk. This arises from investments held by the Fund for which the future price is uncertain. All securities investments present a risk of loss of capital. For all investments held by the Fund, the maximum risk resulting from financial instruments is determined by the fair value of the financial instruments.

The Fund's investment managers mitigate this price risk through diversification and the selection of securities and other financial instruments is monitored to ensure that it is within the limits specified in the Fund's investment strategy.

Other price risk – sensitivity analysis

Following analysis of historic data and expected investment return movement during the financial year, in consultation with the Fund's investment advisors, Leicestershire County Council has determined that the following movements in market prices risk are reasonably possible for the 2015/16 reporting period:

Asset type	Potential market movements (+/-)
Overseas government bonds	8%
Global credit	10%
Global government index-linked bonds	8%
UK equities	16%
Overseas equities	19%
UK property	15%
Private equity	28%
Infrastructure	14%
Commodities	14%
Hedge funds and targeted return funds	12%
Timberland	16%
Cash	1%

The potential price changes disclosed above are broadly consistent with one-standard deviation movement in the value of assets. The sensitivities are consistent with the assumptions

contained in the annual strategy review and the analysis assumes that all other variables, in particular foreign currency exchange rates and interest rates, remain the same.

Had the market price of the Fund's investments increased/decreased in line with the above, the change in net assets available to pay benefits in the market price would have been as follows:

Asset type	Value at 31 st March 2014	Percentage change	Value on increase	Value on decrease
	£000		£000	£000
UK equities	24,409	16	28,314	20,504
Overseas equities	63,006	19	74,977	51,035
Global index-linked bonds	239,178	8	258,312	220,044
Pooled property funds	176,382	15	202,839	149,925
Pooled private equity funds	111,307	28	142,473	80,141
Pooled bond and debt funds	178,748	10	196,623	160,873
Pooled hedge funds	4,368	12	4,892	3,844
Pooled equity funds	1,381,412	19	1,643,880	1,118,944
Pooled commodity funds	75,320	14	85,865	64,775
Pooled targeted return funds	139,887	12	156,673	123,101
Pooled timberland fund	38,175	16	44,283	32,067
Pooled managed futures fund	87,838	12	98,379	77,297
Pooled infrastructure fund	63,111	14	71,947	54,275
UK property	78,940	15	90,781	67,099
Cash and currency	69,968	1	70,668	69,268
Options, futures, other investment balances, current assets and current liabilities	7,804	1	7,882	7,726
Total assets available to pay benefits	2,739,853		3,178,788	2,300,918

Asset type	Value at 31 st March 2015	Percentage change	Value on increase	Value on decrease
	£000		£000	£000
UK equities	13,225	16	15,341	11,109
Overseas equities	73,839	19	87,868	59,810
Global index-linked bonds	304,938	8	329,333	280,543
Pooled property funds	214,149	15	246,271	182,027
Pooled private equity funds	124,432	28	159,273	89,591
Pooled bond and debt funds	302,801	10	333,081	272,521
Pooled hedge funds	2,901	12	3,249	2,553
Pooled equity funds	1,574,157	19	1,873,247	1,275,067
Pooled commodity funds	71,005	14	80,946	61,064
Pooled targeted return funds	31,524	12	35,307	27,741
Pooled timberland fund	52,107	16	60,444	43,770
Pooled managed futures fund	134,701	12	150,865	118,537
Pooled infrastructure fund	74,967	14	85,462	64,472
UK property	90,481	15	104,053	76,909
Cash and currency	52,423	1	52,947	51,899
Options, futures, other investment balances, current assets and current liabilities	10,520	1	10,625	10,415
Total assets available to pay benefits	3,128,170		3,628,312	2,628,028

Interest rate risk

The Fund invests in financial assets for the primary purpose of obtaining a return on investments. These investments are subject to interest rate risk, which represents the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

The Fund is not highly exposed to interest rate risk but monitoring is carried out to ensure that the exposure is close to the agreed asset allocation benchmark.

The Fund's direct exposure to interest rate movements as at 31st March 2015 and 31st March 2014 is set out below. These disclosures present interest rate risk based on the underlying financial assets at fair value:

Asset type	As at 31 st March 2015	As at 31 st March 2014
Cash and Currency	52,423	69,968
Fixed interest securities	302,801	178,748
Total	355,224	248,716

Interest rate risk sensitivity analysis

The Fund recognises that interest rates can vary and can affect both income to the Fund and the value of the net assets to pay benefits. A 1% movement in interest rates (100 BPS) is consistent with the level of sensitivity expected within the Fund's asset allocation strategy and the Fund's investment advisors expect that long-term average rates are expected to move less than 100 BPS from one year to the next and experience suggests that such movements are likely. The analysis that follows assumes that all other variables, in particular exchange rates, remain constant, and shows the effect in the year on the net assets available to pay benefits of a +/- 100 BPS change in interest rates.

Asset type	Carrying amount as at 31 st March 2014	Change in year in the net assets available to pay benefits	
		+100 BPS	-100 BPS
	£000	£000	£000
Cash and Currency	69,968	700	(700)
Fixed interest securities	178,748	1,787	(1,787)
Total	248,716	2,487	(2,487)

Asset type	Carrying amount as at 31 st March 2015	Change in year in the net assets available to pay benefits	
		+100 BPS	-100 BPS
	£000	£000	£000
Cash and Currency	52,423	524	(524)
Fixed interest securities	302,801	3,028	(3,028)
Total	355,224	3,552	(3,552)

Currency risk

Currency risk represents the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. The Fund is exposed to currency risk in financial instruments that are denominated in any other currency other than sterling. The Fund holds both monetary and non-monetary assets denominated in currencies other than sterling.

The Fund's currency rate risk is actively managed and the neutral position is to hedge 50% of the exposure back to sterling. The table below summarises the Fund's currency exposure if it was unhedged at as 31st March 2015 and as at the previous period end:

Currency exposure – asset type	Asset value as at 31 st March 2015	Asset value as at 31 st March 2014
	£000	£000
Overseas equities	73,839	63,006
Overseas government index-linked bonds	128,791	196,081
Private equity pooled funds	122,000	108,571
Pooled hedge Funds	2,901	4,368
Overseas and Global equity-based pooled funds	1,199,483	1,020,715
Commodity-based pooled funds	71,005	75,320
Infrastructure pooled funds	74,967	63,111
Timberland pooled fund	52,107	38,175
Emerging Market Debt pooled fund	76,047	0
Total overseas assets	1,801,140	1,569,347

Currency risk – sensitivity analysis

Following analysis of historical data in consultation with the Fund's investment advisors, it is considered that the likely volatility associated with foreign exchange rate movements is 13% (as measured by one standard deviation).

A 13% fluctuation in the currency is considered reasonable based on the Fund advisor's analysis of the long-term historical movements in the month-end exchange rates over a rolling 36-month period. This analysis assumes that all other variables, in particular interest rates, remain constant.

A 13% strengthening/weakening of the pound against the various currencies in which the fund holds investments would increase/decrease the net assets available to pay benefits as follows:

Currency exposure – asset type	Asset value as at 31 st March 2014	Change to net assets available to pay benefits	
		+13%	-13%
	£000	£000	£000
Overseas equities	63,006	71,197	54,815
Overseas government index-linked bonds	196,081	221,572	170,590
Private equity pooled funds	108,571	122,685	94,457
Pooled hedge Funds	4,368	4,936	3,800
Overseas equity-based pooled funds	1,020,715	1,153,408	888,022
Commodity-based pooled funds	75,320	85,112	65,528
Infrastructure pooled funds	63,111	71,315	54,907
Timberland pooled fund	38,175	43,138	33,212
Total change in assets available	1,569,347	1,773,363	1,365,331

Currency exposure – asset type	Asset value as at 31 st March 2015	Change to net assets available to pay benefits	
		+13%	-13%
	£000	£000	£000
Overseas equities	73,839	83,438	64,240
Overseas government index-linked bonds	128,791	145,534	112,048
Private equity pooled funds	122,000	137,860	106,140
Pooled hedge Funds	2,901	3,278	2,524
Overseas equity-based pooled funds	1,199,483	1,355,415	1,043,551
Commodity-based pooled funds	71,005	80,236	61,774
Infrastructure pooled funds	74,967	84,713	65,221
Timberland pooled fund	52,107	58,881	45,333
Emerging Market Debt pooled fund	76,047	85,933	66,161
Total change in assets available	1,801,140	2,035,288	1,566,992

At 31st March 2014 and 31st March 2015 the Fund has an active currency manager with a portfolio based on a notional value of £340m, and this is the maximum exposure that they are

allowed to have. In order to achieve gains within their portfolios they utilise forward foreign exchange contracts and, on occasions, currency options. The portfolios have an average target volatility of 2.5% and as a result the Fund is exposed to currency risk through these portfolios. The table below shows the likely impact onto the net assets available to pay benefits.

Currency exposure – asset type	Asset value as at 31 st March 2014	Change to net assets available to pay benefits	
		+2.5%	-2.5%
	£000	£000	£000
Active currency portfolios	340,000	348,500	331,500
Total change in assets available	340,000	348,500	331,500

Currency exposure – asset type	Asset value as at 31 st March 2015	Change to net assets available to pay benefits	
		+2.5%	-2.5%
	£000	£000	£000
Active currency portfolios	340,000	348,500	331,500
Total change in assets available	340,000	348,500	331,500

b) Credit risk

Credit risk represents the risk that the counterparty to a transaction or financial instrument will fail to discharge an obligation and cause the Fund to incur a financial loss. The market value of investments generally reflects an assessment of credit in their pricing and consequently the risk of loss is implicitly provided for in the carrying value of the Fund's financial assets and liabilities.

In essence the Fund's entire investment portfolio is exposed to some form of credit risk, with the exception of derivatives positions, where the risk equates to the net market value of a positive derivative position. However the selection of high quality counterparties, brokers and financial institutions minimises credit risk that may occur through the failure to settle a transaction in a timely manner.

Contractual credit risk is represented by the net payment or receipt that remains outstanding, and the cost of replacing the derivative position in the event of a counterparty default. The residual risk is minimal due to various insurance policies held by the exchanges to cover defaulting counterparties.

Credit risk on over-the-counter derivative contracts is minimised as counterparties are recognised financial intermediaries with acceptable credit ratings determined by a recognised ratings agency.

Deposits are not made with banks and financial institutions unless they are rated independently and have a high credit rating. Many of the Fund's investment managers use the money market fund run by the Fund's custodian to deposit any cash within their portfolios, although one manager (Kames Capital) lends cash directly to individual counterparties in the London money markets. Any cash held directly by the Fund is deposited in an instant access high interest account with National Westminster Bank or in a Money Market Fund.

The Fund believes it has managed its exposure to credit risk, and has never had any experience of default of uncollectible deposits. The Fund's cash holding at 31st March 2015 was £52.423m (31st March 2014: £69.968m). This was held with the following institutions.

	Rating	Balances at 31/3/15	Balance at 31/3/14
		£000	£000
Money Market Funds			
Ignis	AAA	17,715	0
JPMorgan	AAA	25,529	30,446
Bank Deposit Accounts			
National Westminster Bank	A	17	30,694
Royal Bank of Canada	AA	27	57
Money Market Loans			
Standard Chartered	AA-	9,135	8,771
Total		52,423	69,968

c) Liquidity risk

Liquidity risk represents the risk that the Fund will not be able to meet its financial obligations as they fall due. The Fund therefore takes steps to ensure that it has adequate cash resources to meet its commitments. All of the Fund's cash holdings are available for immediate access, although on some occasions this will involve withdrawing cash balances from the portfolios of investment managers.

The Fund is allowed to borrow to meet short-term cash flow requirements, although this is an option that is only likely to be used in exceptional circumstances.

The Fund defines liquid assets as assets that can be converted to cash within three months. Illiquid assets are those assets which will take longer than three months to convert to cash. As at 31st March 2015 the value of illiquid assets (considered to be the Fund's investments in property, hedge funds, private equity, timberland and infrastructure) was £559.037m, which represented 17.9% of total Fund assets. (31st March 2014: £472.283m, which represented 17.2% of total Fund assets).

The Fund remains cash flow positive for non-investment related items so there is no requirement to produce detailed cash flow forecasts. All investment related cash flows are known about sufficiently far in advance that they can be covered by taking action in a manner that is both cost-effective and in line with the Fund's investment strategy.

All financial liabilities at 31st March 2015 are due within one year.

Refinancing risk

The key risk is that the Fund will be forced to sell a significant proportion of its financial instruments at a time of unfavourable interest rates, but this appears a highly unlikely scenario. The Fund's investment strategy and the structure of its portfolios have sufficient flexibility to ensure that any required sales are considered to be the ones that are in the best financial interests of the Fund at that time. There are no financial instruments that have a refinancing risk as part of the Fund's treasury management and investment strategies.

Securities Lending

As at 31 March 2015, £5.7m of stock was on loan to an agreed list of approved borrowers through the Fund's Custodian in its capacity as agent lender. The loans were all in respect of equities and were covered by £6.1m of non-cash collateral.

Collateral is marked to market, adjusted daily and held by the custodian on behalf of the Fund. Income from stock lending amounted to £0.018m during the year and is detailed in note 8 to the accounts.

The Fund retains its economic interest in stocks on loan, and therefore the value is included in the Fund valuation. However there is an obligation to return collateral to the borrowers, therefore its value is excluded from the Fund valuation. The securities lending programme is indemnified, giving the Fund further protection against losses.

Reputational Risk

The Fund's prudent approach to the collective risks listed above and through best practice in corporate governance ensures that reputational risk is kept to a minimum.

21. Related party transactions

From the information currently available there were no material transactions with related parties in 2014/2015 that require disclosure under FRS8.

22. Contingent liabilities

When a member has left the Pension Fund before accruing sufficient service to qualify for a benefit from the scheme, they may choose either a refund of contributions or a transfer value to another pension fund. There are a significant number of these leavers who have not taken either of these options and as their ultimate choice is unknown, it is not possible to reliably estimate a liability. The impact of these 'frozen refunds' has, however, been considered in the calculation of the actuarial liabilities of the fund.

If all of these individuals choose to take a refund of contributions the cost to the Fund will be around £927,000, although the statutory requirement of the Fund to pay interest to some

members would increase this figure. Should all of the members opt to transfer to another scheme the cost will be considerably higher.

23. **Contractual Commitments**

At 31st March 2015, the Fund had the following contractual commitments:-

- (i) Undrawn commitments totalling \$128,574,250 (£86,611,149) to twenty seven different pooled private equity funds managed by Adams Street Partners (31st March 2014 £71,483,310 to twenty four different funds).
- (ii) An undrawn commitment of £655,601 to two private equity funds managed by Catapult Venture Managers (31st March 2014 £868,145 to two funds).
- (iii) An undrawn commitment of \$44,404,222 (£29,911,904) to two KKR Global Infrastructure funds (31st March 2014 £9,128,153 to one fund)
- (iv) An undrawn commitment of €9,762,500 (£7,062,934) to the Stafford International Timberland VI Fund (31st March 2014 £11,594,608)
- (v) An undrawn commitment of \$23,250,000 (£15,661,839) to the Stafford International Timberland VII Fund.
- (vi) An undrawn commitment of £19,400,000 to the M & G Debt Opportunities Fund II (31st March 2014 £28,332,000 to the M & G Debt Opportunities Fund, which became fully drawn during 2014/15)
- (vii) An undrawn commitment of £25,000,000 to the Partners Group Private Markets Credit Strategy 2014

24. **Additional voluntary contributions (AVCs)**

The Fund has an arrangement with Prudential whereby additional contributions can be paid to them for investment, with the intention that the accumulated value will be used to purchase additional retirement benefits. AVCs are not included in the Pension Fund Accounts in accordance with Regulation 4(2)(c) of the Pension Scheme (Management and Investment of Funds) Regulations 2009.

During 2014/15 £1.961m in contributions were paid to Prudential and at the year end the capital value of all AVC's was £14.214m.

25. **Policy Statements**

The Fund has a number of policy statements that are available on request from Colin Pratt, Investments Manager, Leicestershire County Council, County Hall, Glenfield, Leicester, LE3 8RB (telephone 0116 3057656, email colin.pratt@leics.gov.uk). They have not been reproduced within the Annual Report and Accounts as, in combination, they are sizeable and it is not considered that they would add any significant value to most users of the accounts. The statements are:-

Statement of Investment Principles (SIP)
Communications Policy Statement
Funding Strategy Statement (FSS)

Compliance statement **Income and other taxes**

The Fund has been able to gain either total or partial relief from local taxation on the Fund's investment income from eligible countries. The Fund is exempt from UK Capital Gains and Corporation tax.

Self-investment

There has been no material employer related investment in 2014/2015 or 2013/2014. There were occasions on which contributions were paid over by the employer later than the statutory date, and these instances are technically classed as self investment. In no instance were the sums involved material, and neither were they outstanding for long periods.

Calculation of transfer values

There are no discretionary benefits included in the calculation of transfer values.

Pension Increase

All pension increases are made in accordance with the Pensions Increase (Review) Order 1997. Recent pension increases are listed on page 4 of this report.

Changes to LGPS

All changes to LGPS are made via the issue of Statutory Instruments by Central Government.

Pension Fund Accounts Reporting Requirement

Introduction

CIPFA's Code of Practice on Local Authority Accounting 2014/15 requires Administering Authorities of LGPS funds that prepare pension fund accounts to disclose what IAS26 refers to as the actuarial present value of promised retirement benefits.

The actuarial present value of promised retirement benefits is to be calculated similarly to the defined benefit obligation under IAS19. There are three options for its disclosure in pension fund accounts:

- showing the figure in the Net Assets Statement, in which case it requires the statement to disclose the resulting surplus or deficit;
- as a note to the accounts; or
- by reference to this information in an accompanying actuarial report.

If an actuarial valuation has not been prepared at the date of the financial statements, IAS26 requires the most recent valuation to be used as a base and the date of the valuation disclosed. The valuation should be carried out using assumptions in line with IAS19 and not the Pension Fund's funding assumptions.

I have been instructed by the Administering Authority to provide the necessary information for the Leicestershire County Council Pension Fund, which is in the remainder of this note.

Balance sheet

Year ended	31 Mar 2014 £m	31 Mar 2013 £m
Present value of Promised Retirement Benefits	5,492	4,508

Liabilities have been projected using a roll forward approximation from the latest formal funding valuation as at 31 March 2013. I estimate this liability at 31 March 2014 comprises £2,966m in respect of employee members, £960m in respect of deferred pensioners and £1,566m in respect of pensioners. The approximation involved in the roll forward model means that the split of scheme liabilities between the three classes of member may not be reliable. However, I am satisfied the aggregate liability is a reasonable estimate of the actuarial present value of benefit promises. I have not made any allowance for unfunded benefits.

The above figures include both vested and non-vested benefits, although the latter is assumed to have a negligible value.

It should be noted the above figures are appropriate for the Administering Authority only for preparation of the accounts of the Pension Fund. They should not be used for any other purpose (i.e. comparing against liability measures on a funding basis or a cessation basis).

Assumptions

The assumptions used are those adopted for the Administering Authority's IAS19 report as required by the Code of Practice. These are given below. I estimate that the impact of the change of assumptions to 31 March 2015 is to increase the actuarial present value by £777m.

Financial assumptions

My recommended financial assumptions are summarised below:

Year ended	31 Mar 2015 % p.a.	31 Mar 2014 % p.a.
Inflation/Pensions Increase Rate	2.4%	2.8%
Salary Increase Rate	4.3%	4.6%
Discount Rate	3.2%	4.3%

Longevity assumption

The life expectancy assumption is based on the Fund's Vitacurves with improvements in line with the CMI_2010 model, assuming the current rate of improvements has reached a peak and will converge to long term rate of 1.25% p.a.

Based on these assumptions, the average future life expectancies at age 65 are summarised below:

	Males	Females
Current Pensioners	22.2 years	24.3 years
Future Pensioners*	24.2 years	26.6 years

*Figures assume members aged 45 as at the last formal valuation date

Please note that the assumptions are identical to those used for the previous IAS26 disclosure for the Fund.

Commutation assumption

An allowance is included for future retirements to elect to take 50% of the maximum additional tax-free cash up to HMRC limits for pre-April 2008 service and 75% of the maximum tax-free cash for post-April 2008 service.

Professional notes

This paper accompanies my covering report titled 'Actuarial Valuation as at 31 March 2015 for IAS19 purposes' dated 23 April 2015. The covering report identifies the appropriate reliances and limitations for the use of the figures in this paper, together with further details regarding the professional requirements and assumptions.

additional reporting requirement

Independent auditors' statement to the Members of the Leicestershire County Council Pension Fund (the "Authority") on the Pension Fund financial statements Statement on the financial statements

Our opinion

In our opinion the financial statements, defined below:

- are consistent with the pension fund accounts included within the Statement of Accounts of Leicestershire County Council for the year ended 31 March 2015; and
- have been properly prepared in accordance with the requirements of the CIPFA/LASAAC Code of Practice on Local Authority Accounting in the United Kingdom 2014/15.

This opinion is to be read in the context of what we say in the remainder of this report.

What we have examined

The pension fund financial statements, which are prepared by Leicestershire County Council Pension Fund, comprise:

- the Net Assets Statement as at 31 March 2015;
- the Fund Account for the year then ended;
- the accounting policies; and
- the notes to the financial statements, which include a summary of significant accounting policies and other explanatory information.

The financial reporting framework that has been applied in their preparation is the CIPFA/LASAAC Code of Practice on Local Authority Accounting in the United Kingdom 2014/15.

Responsibilities for the financial statements and our examination

Our responsibilities and those of the Responsible Financial Officer

As explained more fully in the Statement of Responsibilities set out on page 49 of the audited Statement of Accounts the Responsible Financial Officer is responsible for the preparation of the financial statements in accordance with applicable law and the CIPFA/LASAAC Code of Practice on Local Authority Accounting in the United Kingdom 2014/15.

Our responsibility is to express an opinion on the consistency of the financial statements within the pension fund annual report with the pension fund accounts in the Statement of Accounts of Leicestershire County Council. Our report on the pension fund accounts describes the basis of our opinion on those pension fund accounts.

We also read the other information contained in the pension fund annual report and consider the implications for our report if we become aware of any apparent misstatements or material inconsistencies with the financial statements. The other information consists of: the Management Structure, the Summary, the Management Report, the Governance Compliance Statement, the Investment Report, the Actuary's Statement and the Analysis of Investments.

This report, including the opinions, has been prepared for and only for the Authority's members as a body in accordance with Part II of the Audit Commission Act 1998 and for no other purpose, as set out in paragraph 48 of the Statement of Responsibilities of Auditors and of Audited Bodies – Local Government, published by the Audit Commission in March 2010. We do not, in giving these opinions, accept or assume responsibility for any other purpose or to any other person to whom this report is shown or into whose hands it may come save where expressly agreed by our prior consent in writing.

Other matter

We have not considered the effects of any events between the date on which we signed our report on the Statement of Accounts, 29 September 2015, and the date of this statement.

- (a) The maintenance and integrity of the Leicestershire County Council website is the responsibility of the directors; the work carried out by the auditors does not involve consideration of these matters and, accordingly, the auditors accept no responsibility for any changes that may have occurred to the Statement of Accounts since they were initially presented on the website.
- (b) Legislation in the United Kingdom governing the preparation and dissemination of the Statement of Accounts may differ from legislation in other jurisdictions.

report of the auditor

Statement of Responsibilities for Leicestershire County Council Pension Fund Accounts

Leicestershire County Council's responsibilities

The Council is required to:

- i) Make arrangements for the proper administration of the financial affairs of Leicestershire County Council Pension Fund and to secure that one of its officers has the responsibility for the administration of those affairs. In this council, that officer is the Director of Corporate Resources;
- ii) Manage its affairs to secure economic, efficient and effective use of resources and safeguard its assets; and
- iii) Approve the Statement of Accounts for the year.

The Director of Corporate Resources is responsible for the preparation of the Leicestershire County Council Pension Fund's Statement of Accounts in accordance with proper practices as set out in the CIPFA/LASAAC Code of Practice on Local Authority Accounting in the United Kingdom (the Code).

In preparing this Statement of Accounts, the Director of Corporate Resources has:

- i) Selected suitable accounting policies and then applied them consistently.
- ii) Made judgements and estimates that were reasonable and prudent.
- iii) Complied with the Code.

The Director of Corporate Resources has also:

- i) Kept proper accounting records which were up to date.
- ii) Taken reasonable steps for the prevention and detection of fraud and other irregularities.

I certify that the above responsibilities have been complied with and the Statement of Accounts herewith presents a true and fair view of the financial position of the Leicestershire Pension Fund as at 31 March 2014 and its income and expenditure for the year ended the same date.

Chris Tambini

Assistant Director, Strategic Finance & Property
22 October 2015

LOCAL PENSION COMMITTEE – 13TH NOVEMBER 2015

REPORT OF THE DIRECTOR OF CORPORATE RESOURCES

ANNUAL AUDIT REPORT IN RESPECT OF 2014/15 PENSION FUND AUDIT

Purpose of the Report

1. To present to the Committee the Annual Audit (ISA 260) Report relating to the 2014/15 audit of the Pension Fund, including the Annual Accounts. The Audit Report is attached as the appendix to this report.

Contents of Annual Audit Report

2. The Pension Fund has had a 'clean' audit report for many years, and the only items that have been noted have been minor and generally related to a small number of late payments of employer contributions. As these late payments are technically a breach of the Pensions Act, the auditor has felt it necessary to include this in his report.
3. The audit report for the year ended 31st March 2015 includes nothing that is considered worthy of note by the auditor, and as such he will not be in attendance at today's meeting to present the report.

Recommendation

4. The Committee is asked to note the Pension Fund's Annual Audit (ISA 260) Report for 2014/15.

<i>Significant audit and accounting matters</i>	8
<i>Risk of fraud</i>	11

Code of Audit Practice and Statement of Responsibilities of Auditors and of Audited Bodies

In April 2010 the Audit Commission issued a revised version of the 'Statement of responsibilities of auditors and of audited bodies'. It is available from the Chief Executive of each audited body. The purpose of the statement is to assist auditors and audited bodies by explaining where the responsibilities of auditors begin and end and what is to be expected of the audited body in certain areas. Our reports and management letters are prepared in the context of this Statement. Reports and letters prepared by appointed auditors and addressed to members or officers are prepared for the sole use of the audited body and no responsibility is taken by auditors to any Member or officer in their individual capacity or to any third party.

An audit of the Statement of Accounts is not designed to identify all matters that may be relevant to those charged with governance. Accordingly, the audit does not ordinarily identify all such matters. We have issued a number of reports during the audit year, detailing the findings from our work and making recommendations for improvement, where appropriate.

Executive summary

Background

This report tells you about the significant findings from our audit. We presented our plan to you in June 2015; we have reviewed the plan and concluded that it remains appropriate.

Audit Summary

- At the time of issuing this report, we have completed our audit and review of the Annual Report and Accounts and will issue a consistent with opinion. A consistent opinion means our opinion in the financial statements is consistent with the opinion included within the Statement of Accounts of Leicestershire County Council for the year ended 31 March 2015.
- We would like to formally record our thanks to the officers of the Fund who have assisted us in completing our work.

Please note that this report will be sent to Public Sector Audit Appointments Limited in accordance with the requirements of its standing guidance.

Audit approach

Our audit approach was set in our audit plan which we presented to you in June 2015.

We have summarised below the significant risks we identified in our audit plan, the audit approach we took to address each risk and the outcome of our work.

Risk

Management override of controls

ISA (UK&I) 240 requires that we plan our audit work to consider the risk of fraud, which is presumed to be a significant risk in any audit. In every organisation, management may be in a position to override the routine day to day financial controls. Accordingly, for all of our audits, we consider this risk and adapt our audit procedures accordingly.

Categorisation

Significant

Audit approach

As part of our assessment of your control environment we considered those areas where management could use discretion outside of the financial controls in place to misstate the financial statements.

We performed procedures to:

- Review the appropriateness of accounting policies and estimation bases, focusing on any changes not driven by amendments to reporting standards;
- Test the appropriateness of journal entries and other year-end adjustments, targeting higher risk items such as those that affect the reported deficit/surplus;
- Review accounting estimates for bias and evaluate whether judgment and estimates used are reasonable (for example pension scheme assumptions, valuation and impairment assumptions);
- Evaluate the business rationale underlying significant transactions outside the normal course of business; and
- Perform unpredictable procedures targeted on fraud risks.

We performed other audit procedures as necessary.

There were no matters to report.

Risk	Categorisation	Audit approach
<p>Risk of fraud in revenue and expenditure recognition</p> <p>Under ISA (UK&I) 240 there is a presumption that there are risks of fraud in revenue recognition.</p> <p>We extend this presumption to the recognition of expenditure in local government.</p>	<p>Significant <input type="checkbox"/></p>	<p>We performed procedures to:</p> <ul style="list-style-type: none"> - Test the appropriateness of journal entries and other year-end adjustments affecting revenue; - Consider recognition criteria for investment income. <p>We have noted during the year that internal audit have performed some work regarding member contributions and have considered these findings within our audit fieldwork</p> <p>There are no matters to report.</p>
<p>Valuation of hard to value investments</p> <p>Leicestershire County Council Pension Fund holds a mixture of categories of investment within the Pension fund portfolio. For a proportion of these assets a readily available market price is not always available.</p>	<p>Elevated <input type="checkbox"/></p>	<p>We reviewed the monitoring procedures in place over these categories of investments with management.</p> <p>We confirmed the valuation of hard-to-value investments at year end with the individual investment managers and assessed the accuracy of the year end valuation by reviewing the latest audited accounts to information provided to management to assess the reasonableness of these unit prices.</p> <p>We reviewed the latest investment manager controls reports, where available, to update our understanding of controls and procedures in place over valuation of such assets.</p> <p>There are no matters to report.</p>

We have summarised below the other risks we identified in our audit plan, the audit approach we took to address each risk and the outcome of our work.

Focus area/risk

Work performed

Investment assets and returns

- Investments may not exist or the scheme may not have title to investment assets
- We understood the Committee and management monitoring controls, including reviewing Committee meeting minutes;
 - We obtained independent confirmations of all externally managed investment assets from the investment managers. In the case of those investment assets managed by the in house team, we obtained confirmation from the custodian; and
 - We reviewed internal controls reports on investment management and custody.

There are no matters to report.

Investments may be incorrectly valued

- We tested the valuation of quoted investments against third party sources;
- We understood how the Committee and management validate asset values provided by investment managers for investments which are not quoted; and
- We reviewed valuations for pooled investment vehicles and private equity investments, including reviewing the most recent audited accounts for the funds and any available internal controls reports.

There are no matters to report.

Investments may be recorded incompletely in the financial accounting records and the accounts

- We reviewed the reconciliations of cash inflows and outflows from the Fund's bank account compared to contributions and other income, benefits and expenses and the movements in investments; and
- We reviewed the reconciliations performed in-house between investment manager and custodian assets.

There are no matters to report.

Focus area/risk

Work performed

Performance of investments reported may be inconsistent with the accounts

- We completed an analytical review of investment returns for reasonableness compared with the Fund's benchmarks and other external indices.

There are no matters to report.

Allocation of investments may not be in accordance with the Statement of Investment Principles ('SIP')

- We reviewed the allocation of investments compared with the requirements of the SIP.

There are no matters to report.

Contributions

Payment of employer contributions may not be in accordance with the Rates and Adjustment Certificate and employee contributions per the prescribed rates for local government employees (England and Wales) ("the schedules")

- We reviewed the controls over payroll and validate on a sample basis that these are operating as expected.
- We undertook analytical review of contributions for reasonableness compared with the prior year, allowing for changes in membership, pay and rates of contributions.
- We considered the monthly contributions received and investigate any unusual fluctuations.
- We tested on a sample basis that the contributions are calculated and paid in accordance with the relevant schedules.
- We reviewed the timing of the payment of contributions according to bank details compared with the requirements of the schedules.

There are no matters to report.

Benefits and membership

Benefits may not be correctly calculated according to the local government regulations

- We reviewed the controls operated by the administration team (including over the pension payroll) and validate on a sample basis that these are operating as expected;
- We undertook analytical review of pensions paid for reasonableness compared to the prior year, allowing for changes in membership and the effects of the pensions increase;
- We considered the monthly total pensions paid and investigate any unusual fluctuations; and
- We performed substantive testing on a sample basis over material types of benefit payments.

Focus area/risk

Work performed

- Membership statistics accurately reflect the membership of the scheme
- We reviewed the results of any pensioner existence checking exercise completed during the year; and
 - We compared membership statistics and movements reported against the supporting data from the administration system and review for reasonableness compared with our expectations.

There are no matters to report.

Other areas

Current assets and liabilities may not be appropriately accounted for

- We reviewed balances compared with the prior year and against our expectations from testing of income and expenditure;
- We obtained independent confirmation of cash balances; and
- We reviewed controls over cash movements and bank account authority levels.

There are no matters to report.

Related party transactions may be incomplete or inaccurately reflected in the accounts

- We understood the controls that the Committee and management have over the identification of related parties and transactions with them; and
- We made specific enquiries for any transactions which look to be outside of the normal course of business.

There are no matters to report.

Significant audit and accounting matters

Auditing standards require us to tell you about relevant matters related to the audit of the financial statements sufficiently promptly for you to take appropriate action. This section contains such items.

Financial statements

Our audit is now complete, and we expect to issue a “consistent with” opinion to the main County Council accounts.

Accounting issues

We have no significant accounting issues to bring to your attention.

Misstatements and significant audit adjustments

We are required to report to you all unadjusted misstatements which we have identified during the course of our audit, other than those of a trivial nature. We identify all items greater than £1,564,000 as non-trivial. As auditors, we also bring to your attention misstatements which have been corrected by management but which we consider you should be aware of in fulfilling your governance responsibilities.

We have not noted any such non-trivial adjustments as part of our audit work.

Significant accounting principles and policies

Significant accounting principles and policies are disclosed in the notes to the financial statements. Our responsibility is to express an opinion on the consistency of the financial statements within the pension fund annual report with the pension fund accounts in the Statement of Accounts of Leicestershire County Council.

We also read the other information contained within the pension fund annual report and considered the implications for our report, and noted no apparent misstatements or material inconsistencies with the financial statements. The other information consists only of the Chairman’s Report, Fund Management, Investment Report, Fund Membership, Glossary and Contacts.

In preparing this Pension Fund report, the Director of Finance and Resources is responsible for ensuring:

- The selection of suitable accounting policies and the consistent application of these;
- Ensuring judgments and estimates are reasonable and prudent;
- Ensuring compliance with the Code of Practice on Local Authority Accounting;
- Keeping proper accounting records which are up to date; and
- Taking reasonable steps for the prevention and detection of fraud and other irregularities.

IFRS 7 sets out the information that an entity should disclose to enable users of the financial statements to evaluate the nature and extent of risks arising from financial instruments to which the entity is exposed to at the end of the reporting period. This includes providing disclosures around the risks arising, for example credit risk, liquidity risk and market risk, and how they have been managed by the entity. The Fund has made improved disclosures within the notes to the financial statements which set out the risks that are relevant to the Fund’s specific circumstances and reflects how the Fund monitors and controls its risk.

Judgments and accounting estimates

Significant judgments and accounting estimates were used in the preparation of the financial statements in relation to the valuation of non-listed investments. As set out in the previous section, we carried out audit procedures to satisfy ourselves that these valuations are reasonable. However, we consider it worth bringing to your attention that these balances are based on more significant judgements than other investment balances which are commonly traded: as a result, we have focused greater audit attention on these balances.

These are also the investments and balances which potentially represent the greatest risk of manipulation, and it is therefore important that members of the committee are comfortable with the suitability and carrying value of these investments.

Misstatements and significant audit adjustments

We have to tell you about all uncorrected misstatements we found during the audit, other than those which are trivial. None were noted during the course of the audit

Disagreements with management

There were no disagreements with management, individually or in aggregate, which could be significant to the entity's Statement of Accounts or our audit report.

Financial standing

There are no material uncertainties related to events and conditions that may cast significant doubt on the scheme's financial standing.

Related parties

In forming an opinion on the financial statements, we are required to evaluate:

- whether identified related party relationships and transactions have been appropriately accounted for and disclosed; and
- whether the effects of the related party relationships and transactions cause the financial statements to be misleading.

We did not identify any matters during the course of our work.

Audit independence

We are required to follow both the International Standard on Auditing (UK and Ireland) 260 (Revised) "Communication with those charged with governance", UK Ethical Standard 1 (Revised) "Integrity, objectivity and independence" and UK Ethical Standard 5 (Revised) "Non-audit services provided to audited entities" issued by the UK Auditing Practices Board.

Together these require that we tell you at least annually about all relationships between PricewaterhouseCoopers LLP in the UK and other PricewaterhouseCoopers' firms and associated entities ("PwC") and the Fund that, in our professional judgement, may reasonably be thought to bear on our independence and objectivity.

Relationships between PwC and the Authority

We have not identified any potential issues in respect of personal relationships with the Fund or investments in the Authority held by individuals.

Employment of PricewaterhouseCoopers staff by the Authority

We are not aware of any former PwC partners or staff being employed, or holding discussions in respect of employment, by the Fund as a director or in a senior management position covering financial, accounting or control related areas.

Business relationships

We have not identified any business relationships between PwC and the Fund.

Services to Directors and Senior Management

PwC does not provide any services e.g. personal tax services, directly to directors, senior management.

Rotation

It is the Audit Commission's policy that engagement leaders at an audited body at which a full Code audit is required to be carried out should act for an initial period of five years. The Commission's view is that generally the range of regulatory safeguards it applies within its audit regime is sufficient to reduce any threats to independence that may otherwise arise at the end of this period to an acceptable level. Therefore, to safeguard audit quality, and in accordance with APB Ethical Standard 3, it will subsequently approve engagement leaders for an additional period of up to no more than two years, provided that there are no considerations that compromise, or could be perceived to compromise, the auditor's independence or objectivity.

Gifts and hospitality

We have not identified any significant gifts or hospitality provided to, or received from, a member of Fund's senior management or staff.

Other matters

We are not aware of any other matters which may impact on our independence and objectivity e.g. litigation.

Conclusion

We hereby confirm that in our professional judgement, as at the date of this document:

- we comply with UK regulatory and professional requirements, including the Ethical Standards issued by the Auditing Practices Board; and
- our objectivity is not compromised.

We would ask the Pension Committee to consider the matters in this document and to confirm that they agree with our conclusion on our independence and objectivity.

Fees

We reported our fee proposals in our plan. Our actual fees were in line with our proposals (£27,637).

Risk of fraud

International Standards on Auditing (UK&I) state that we, as auditors, are responsible for obtaining reasonable assurance that the financial statements taken as a whole are free from material misstatement, whether caused by fraud or error. The respective responsibilities of auditors, management and those charged with governance are summarised below:

Auditors' responsibility

Our objectives are:

- to identify and assess the risks of material misstatement of the financial statements due to fraud;
- to obtain sufficient appropriate audit evidence regarding the assessed risks of material misstatement due to fraud, through designing and implementing appropriate responses; and
- to respond appropriately to fraud or suspected fraud identified during the audit.

Management's responsibility

Management's responsibilities in relation to fraud are:

- to design and implement programmes and controls to prevent, deter and detect fraud;
- to ensure that the entity's culture and environment promote ethical behaviour; and
- to perform a risk assessment that specifically includes the risk of fraud addressing incentives and pressures, opportunities, and attitudes and rationalisation.

Responsibility of the Pension Committee

Your responsibility as part of your governance role is:

- to evaluate management's identification of fraud risk, implementation of anti-fraud measures and creation of appropriate "tone at the top"; and
- to investigate any alleged or suspected instances of fraud brought to your attention.

Your views on fraud

In our audit plan presented to the Audit Committee in June 2015 we enquired:

- Whether you have knowledge of fraud, either actual, suspected or alleged, including those involving management?
- What fraud detection or prevention measures (e.g. whistle-blower lines) are in place in the entity?
- What role you have in relation to fraud?
- What protocols / procedures have been established between those charged with governance and management to keep you informed of instances of fraud, either actual, suspected or alleged?

In presenting this report to you we ask for your confirmation that there have been no changes to your view of fraud risk and that no additional matters have arisen that should be brought to our attention. A specific confirmation from management in relation to fraud is included in the letter of representation.

In the event that, pursuant to a request which you have received under the Freedom of Information Act 2000, it is required to disclose any information contained in this report, it will notify PwC promptly and consult with PwC prior to disclosing such report. You agree to pay due regard to any representations which PwC may make in connection with such disclosure and you shall apply any relevant exemptions which may exist under the Act to such report. If, following consultation with PwC, you disclose this report or any part thereof, it shall ensure that any disclaimer which PwC has included or may subsequently wish to include in the information is reproduced in full in any copies disclosed.

This document has been prepared only for you and solely for the purpose and on the terms agreed through our contract with the Audit Commission. We accept no liability (including for negligence) to anyone else in connection with this document, and it may not be provided to anyone else.

130610-142627-JA-UK

LOCAL PENSION COMMITTEE – 13TH NOVEMBER 2015

REPORT OF THE DIRECTOR OF CORPORATE RESOURCES

UPDATE ON ACTUARIAL AND INVESTMENT CONSULTANCY SERVICES

Purpose of the Report

1. To update the Committee on the latest position in respect of the agreed 'market testing' for actuarial and investment consultancy services, and to recommend that the process be postponed until a more appropriate time.

Background

2. At the May 2015 meeting of the Pension Fund Management Board (the former name of this Committee) a report was considered that recommended 'market testing' the provision of actuarial and investment consultancy services to the Fund. This recommendation was primarily based on the fact that these services had not been subject of competition for some time, and was not based on any dissatisfaction with the services or the costs associated with them. A copy of the report is attached as an appendix.
3. The intention was to use existing Framework Agreements led by Norfolk to undertake market testing for these services, and the required documentation in respect of the Framework Agreements was received in mid-June.

Current Position

4. In early July 2015 an announcement was made in the Summer Budget that effectively restarted the process of ensuring that the Local Government Pension Scheme (LGPS) worked in a more collaborative way. The focus of this collaboration had moved away from the previous threat of forced mergers, to ensuring that investments were managed within a small number of pooled vehicles which would ensure that economies of scale were enjoyed by each Fund.
5. The Summer Budget announcement was somewhat unexpected, and the timescales involved in the consultation and evidence gathering stage are very short given the wide-ranging nature of the issue. In effect, the importance of dealing with matters relating to pooling became an absolute priority and left little time to deal with any other matters that were not of immediate importance. Market testing for actuarial and investment consultancy services became a lower priority, despite the fact that the actuarial market testing had a limited time frame in order for it to be completed in time for the 2016 actuarial valuation.
6. Investment pooling within the LGPS remains an on-going and very important issue, and this is likely to be the case into at least the early part of 2016. As a result there is no realistic prospect of carrying out the market testing within the original timescales that had been set.

7. The nature of the current investment pooling agenda is such that it is deemed not be sensible to consider a change in investment consultant at the current time. Hymans Robertson has a much larger investment consultancy exposure to the LGPS than any other consultant and is in an excellent position to assist individual Funds in considering their own position in respect of pooling options. They are also providing significant support to a Working Party of over 20 LGPS Funds that is currently considering options for pooling, in order to present a balanced report to Central Government in late 2015 that has the support of a good number of Funds. It is expected that this report will help to influence the outcome of pooling consultation, so that the LGPS ends up with a solution that is optimal and workable.
8. The Fund is already past the time at which market testing for actuarial services would have ideally started if there was to be any change in actuary before the 2016 actuarial valuation. The Fund does have the ability to use another Framework Agreement in place, let by the London Borough of Croydon, but this Framework only includes Hymans Robertson. The Croydon Framework has set prices for most pieces of actuarial work (something that we already have with Hymans), and some of these are slightly cheaper than those currently being paid by the fund, whilst some are slightly more expensive. Having discussed this matter with Hymans they have agreed that Leicestershire will be changed the lower of the current prices and those included in the Croydon Framework. Although this will not save particularly large amounts for the Fund (a saving of about 10% is likely, depending on the balance of the type of work carried out), it is sensible to take these savings. As many pieces of actuarial work are recharged to individual employers – where the work is specific to their own position, many of the savings will not actually accrue to the Fund. In cash terms the savings to the Fund are likely to be around £5,000 p.a. but many of these savings will be concentrated into the actuarial valuation year.

Summary

9. It is unfortunate that we have not been able to carry out market testing in the manner, and in the timescales, that were originally intended due to other matters having to take a priority. There is still an intention to carry out market testing at an appropriate time in the future, but it is difficult to know when this will be given that Officer's time may be taken up with issues relating to investment pooling for some time to come.
10. Utilising the existing Croydon Framework Agreement for actuarial services will lead to savings for actuarial work, so it is sensible to do this. Given the interaction between the inevitable move to a pooled investment environment within the LGPS and Hymans expertise within the sector, it may ultimately be sub-optimal to carry out an exercise that even considers a change in investment consultant during this process. As the outcome of the current pooling agenda becomes clearer, this matter will be considered again.

Recommendation

11. The Committee is recommended to approve:
- (i) That the previously agreed market testing for actuarial and investment consultancy services be postponed;
 - (ii) That the Fund utilise the Croydon Framework Agreement in respect of actuarial services with Hymans Robertson.

Equal Opportunities Implications

None specific

PENSION FUND MANAGEMENT BOARD – 29TH MAY 2015

REPORT OF THE DIRECTOR OF CORPORATE RESOURCES

ACTUARIAL AND INVESTMENT CONSULTANCY SERVICES

Purpose of the Report

1. To recommend to the Board that some 'market testing' is carried out in respect of the actuarial and investment consultancy services provided to the Fund. Both of these services are currently provided by Hymans Robertson.

Background

2. The Fund has used Hymans Robertson for both actuarial and investment consultancy advice for many years, and the Board has not raised issues in respect of the quality of their advice when it carries out its annual 'self-assessment' as part of the Annual Strategy Meeting.
3. Officers of the Fund are also very comfortable with the quality of the advice received, but wish to undertake a procurement exercise to ensure that the Fund is receiving value for money.

Reasons for market testing

4. A recent internal audit report (that will be considered at the first meeting of the Local Pension Board in June) highlighted that there were potential conflicts of interest in using the same company for both actuarial and investment advice. Whilst it is considered that these conflicts of interest do not actually exist in practice, and there are actually some instances where the use of the same company brings advantages, it is important that the Board are entirely comfortable with the use of the same firm for both areas of advice.
5. The Myners report of 2001 made a recommendation that:

Contracts for actuarial services and investment advice should be opened to competition separately. Pension funds should be prepared to pay sufficient fees for each service to attract a broad range of kinds of potential provider.

This is often incorrectly interpreted to mean that separate firms should provide the two different services, but its actual intention was to stop the 'bundling' of actuarial and investment advisory services.

6. When the Board considered the Myners Report and its compliance with the principles contained within it, there was unanimity about the continued use of Hymans Robertson for both areas of advice. Simple reaffirmation that the Board are still comfortable with use of the same company has value in itself. The services were procured separately and have never been bundled.
7. The next triennial actuarial valuation of the Fund will be based on the position at 31st March 2016, and if there are to be changes to the actuary these would ideally be in place before the end of 2015. As the Fund's investment structure has a direct impact onto the outcome of the actuarial valuation, it is optimal to run the work in relation to investment consultancy on a similar timetable.

Recommendation

8. The Board is recommended to approve that:

Officers be asked to carry out 'market testing' into the provision of actuarial and investment consultancy services to the Fund, and to take into account both the quality and cost of these services in their considerations.

LOCAL PENSION COMMITTEE – 13TH NOVEMBER 2015

REPORT OF THE DIRECTOR OF CORPORATE RESOURCES

ASSET POOLING WITHIN THE LOCAL GOVERNMENT PENSION SCHEME (LGPS)

Purpose of the Report

1. To inform the Committee of the current position in respect of the ongoing unofficial consultation that is taking place in respect of the Government's ambition to ensure that the LGPS pools its assets in such a way as to introduce greater economies of scale (and hence reductions in running costs).

Background

2. In May 2013 the then-Local Government Minister Brandon Lewis made clear in a speech that the structure of the LGPS was being considered, with Fund mergers a possibility for consideration. This speech was followed by a 'Call for Evidence' consultation that focused on the management of deficits and investment efficiency.
3. In May 2014, and following analysis of the responses received from the Call for Evidence, a further round of consultation was launched. This consultation ruled out forced Fund mergers in the near term and focused on the possibility of asset pooling (possibly via the formation of a small number of Common Investment Vehicles) and the increased use of passive management, both of which were thought to offer potentially significant savings in investment management fees across the LGPS.
4. The Summer Budget of July 2015 contained the following announcement:

"The government will work with the Local Government Pension Scheme administering authorities to ensure that they pool investments to significantly reduce costs, while maintaining overall investment performance. The government will invite local authorities to come forward with their own proposals to meet common criteria for delivering savings. A consultation to be published later this year will set out those detailed criteria as well as backstop legislation which will ensure that those administering authorities that do not come forward with sufficiently ambitious proposals are required to pool investments."
5. Subsequent to the Budget, it has become clear that there will not be a formal consultation on the matter of asset pooling. Instead discussions between individual Funds, representatives of Funds (such as the Local Government Association and investment consultants) the Department for Communities and Local Government (DCLG) and the Treasury are considered to be the consultation. There is an expectation that the DCLG will issue details of the criteria against which options for pooling will be appraised sometime in November.

6. In early October the Chancellor of the Exchequer delivered a speech at the Conservative Party conference that strongly pointed to the creation of six 'British Wealth Funds' from the assets of the 89 English and Welsh LGPS Funds. This announcement formed part of a four-point plan to boost infrastructure investment in the UK, and there is a clear view within Government that the LGPS does not invest sufficiently in infrastructure (a lack of expertise has been cited as the reason) and that it can be part of the solution to funding the UK's requirement for capital.
7. Within a very short time of the Chancellor's speech, a letter was issued by the DCLG (attached as an appendix) that tried to soothe fears that a decision concerning the LGPS assets had already been made and to make it clear that the views of the LGPS itself would be taken into account before a final structure is agreed.

Current position in respect of 'pooling'

8. with asset pooling inevitably being introduced within the lifetime of this Parliament, over 20 LGPS Funds (including Leicestershire) have been working to deliver options to the Government about how pooling might work best, and this project has been instigated and supported by Hymans Robertson. It is hoped that putting forward proposals that have been costed, where the pros-and-cons have been considered and are supported by a large number of Funds, will help to influence the final outcome. The emphasis is on ensuring that the fund ends up with something that is workable, gives flexibility to ensure that they can continue to deliver their own asset allocation strategies, has a governance structure which ensures Funds still have an impact on their own performance and maximises costs savings (whilst still ensuring that investment performance is acceptable).
9. Whatever the final structure, it is unlikely that it can be all-things-to-all-people. Economies of scale, for example, will be achieved by having less investment managers with larger mandates and in order to do this it is entirely possible that individual manager appointments will be taken out of the hands of individual Funds. So instead of choosing manager X for a segregated UK active equity mandate, the Fund's decision might be to invest in the UK active equity 'sleeve' of a common investment vehicle and this 'sleeve' might include 4 managers who will each manage some of the Fund's investment (though not necessarily on an equal basis).
10. The default option appears to be regional pooling, whereby the geographic location dictates Funds within a pool. Alternatives are asset class pools on a national basis or some mixture of these – possibly alternatives on a national basis and listed assets within regional pools. In reality there is an almost endless list of options. The DCLG has suggested pools of £20 - £30bn (which they believe to be the optimum size to achieve economies of scale, before diseconomies start to happen), but it might be that they ultimately accept that some pools can be smaller than this and still maximise savings.
11. The DCLG have not ruled out anything and may accept groups of like-minded Funds who put forward an acceptable proposal, and there are already signs of some Funds competing for position in this respect. This is a potentially dangerous position for the LGPS as there is a chance that this will leave a number of Funds 'detached' and without any natural partners; having five out of six pools that function

well and one dysfunctional one does not seem a sensible outcome for the Government to preside over.

12. Leicestershire will continue to be involved in work that seeks to achieve the best possible outcome for both the Fund itself and the LGPS as a whole. The situation is fluid and there will no doubt be Government announcements and decisions that continue to influence the direction of travel. At present it is expected that the Chancellor will want to announce something meaningful about the future structure of the LGPS in his March Budget, and the intention is to have completed the joint-working being supported by Hymans (as referred to in paragraph 9) by the end of December. This should allow the DCLG and Treasury time to consider all of the options available before they make a recommendation about their preferred outcome.
13. So far the DCLG and Treasury appear to have been willing to listen to the views of the wider LGPS community (Funds, investment advisors, investment managers etc.), and it is hoped that this will continue. If this is the case we should end up with an outcome that is the best one possible, but it has to be accepted that there is a political dimension to this matter that may ultimately produce a sub-optimal outcome.

Recommendation

14. The Committee is asked to note this report.

7 October 2015

Dear Jeff,

On Monday, the Chancellor of the Exchequer unveiled a major four point plan to get Britain building for the future, announcing changes to the way vital infrastructure projects are planned, determined and funded.

The Secretary of State, Greg Clark, wrote to Lord Porter after the July Budget, setting out how we intended to work with local government pension scheme administering authorities to bring forward proposals to invest collectively and deliver savings. The Chancellor's announcement at the Conservative Party Conference builds on the discussions that we have been taking forward with the sector following the Budget, but places infrastructure investment, alongside delivering efficiencies, at the heart of the policy.

The LGPS Funds as currently constituted are too small and fragmented to have the capacity and capability to be a major investor in UK infrastructure. This is why the Chancellor announced that we are going to work with administering authorities to bring together investments into up to six pools spread across the country, creating the conditions to save hundreds of millions in costs and invest billions in infrastructure in the regions.

The Government remains keen to see authorities take the lead in identifying the best way to deliver savings and drive infrastructure investment and, as announced at the Budget, we will shortly be inviting administering authorities to bring forward proposals to deliver pooled investments that meet published criteria. I look forward to continuing to work with you, local authorities and the investment management industry over the next few weeks as we finalise those criteria.

I am copying this letter to each administering authority in England and Wales.

CHRIS MEGAINEY

Funding update as at 30 September 2015 Leicestershire County Council Pension Fund

HYMANS ROBERTSON LLP

Summary

This funding update is provided to illustrate the estimated development of the funding position from 31 March 2013 to 30 September 2015, for the Leicestershire County Council Pension Fund ("the Fund"). It is addressed to Leicestershire County Council in its capacity as the Administering Authority of the Leicestershire County Council Pension Fund and has been prepared in my capacity as your actuarial adviser.

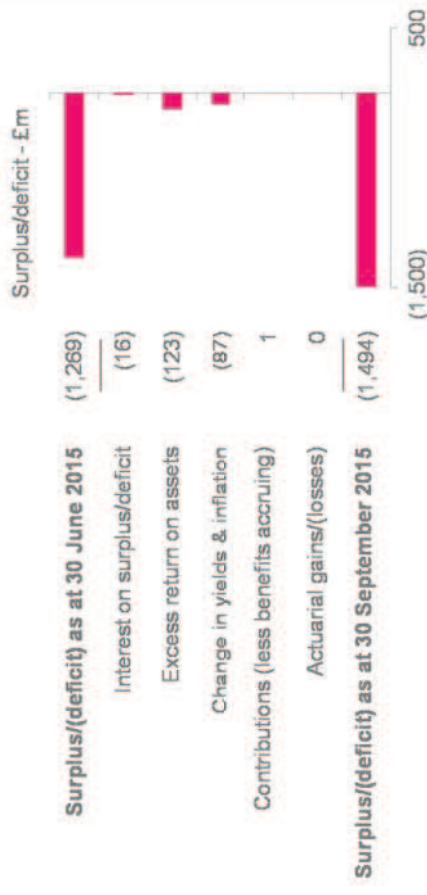

The funding level at the latest formal valuation was 72.0%. As at 30 September 2015 the funding level has decreased to 66.4%. This is largely as a result of a decrease in bond yields, and subsequent discount rate, which places a higher value on the Fund's liabilities..

This report has been produced exclusively for the Administering Authority. This report must not be copied to any third party without our prior written consent.

This report looks at the whole fund position and does not allow for the circumstances of individual employers. The results for individual employers can be quite different to the fund as a whole depending on their own experience and the profile of their liabilities. Differences in the relationship between the ratio of accrued liabilities and the payroll can have a large influence on changes in contributions.

Barry McKay FFA
Actuary

What's happened since the last update – ongoing funding basis

Differences between this funding update and a full actuarial valuation

The accuracy of this type of funding update calculation is expected to decline over time as the period since the last valuation increases. This is because this funding update does not allow for changes in individual members' data since the last valuation.

Details of the approach used in this funding update are given in the appendix.

The figures in tables throughout this document may not add up due to rounding.

HYMANS ROBERTSON LLP

Appendix: Scope, methodology, reliances, limitations and market data

Scope

This funding update is provided to Leicestershire County Council as the Administering Authority of the Leicestershire County Council Pension Fund to illustrate the funding position as at 30 September 2015. It should not be used for any other purpose. It should not be released or otherwise disclosed to any third party except with Hymans Robertson LLP's prior written consent, in which case it is to be released in its entirety. Hymans Robertson LLP accepts no liability to any third party unless we have expressly accepted such liability in writing.

Compliance with professional standards

The method and assumptions used to calculate the updated funding position are consistent with those used in the latest formal actuarial valuation, although the financial assumptions have been updated to reflect known changes in market conditions. As such, the advice in this report is consistent with that provided for the last valuation, as set out in the:

- Valuation Assumptions Briefing Note
- Funding Strategy Statement
- Valuation Report
- Rates and Adjustments Certificate

This update therefore complies with the following Technical Actuarial Standards (TASs):

- Reporting ("TAS R")
- Data ("TAS D")
- Modelling ("TAS M")
- Pensions TAS

How liabilities are calculated

- The future benefits that are payable from the Fund ("cash-flows") were calculated on a specific set of assumptions at the last valuation date.
- These cash-flows (on the ongoing funding basis) are shown below.
- These cash-flows were adjusted using available financial and Fund information to produce estimated cash-flows at post valuation dates.
- The specific information used for this update is set out on the next page.
- Market information is used to produce discount rates at these dates.
- The estimated cash-flows are discounted to produce the estimated liability value at a specific date.

How assets are calculated

Assets are projected from the valuation date allowing for actual or estimated Fund cash-flows, actual quarterly returns (where available) and daily benchmark indices.

HYMANS ROBERTSON LLP

The update allows for:

- 1 Movements in the value of the assets as measured by index returns and data from the administering authority where available.
- 2 Movements in liabilities as a result of changes in yields and hence inflation and discount rate assumptions.
- 3 Estimated cash-flows (contributions and benefit payments).
- 4 Expected accrual of benefits for employee members accrued since the last valuation (based on projected salary roll).
- 5 Demographic experience in line with assumptions.
- 6 Variations in liabilities arising from the changes in RPI since the valuation date differing relative to assumptions.
- 7 Benefit accrual in line with the 2014 scheme.

The update does not allow for:

- 1 Asset allocations differing from those assumed (other than when asset data is recalibrated based on available information).
- 2 The asset values as at the date of this report have not been based on audited Fund accounts.
- 3 Variations in liabilities arising from salary rises differing relative to assumptions.
- 4 Differences between estimated and actual salary roll of employees.
- 5 Variation between actual and expected demographic experience (e.g. early retirement or mortality).

Membership data

My calculations are based on the membership data provided for the most recent actuarial valuation. Details on the quality of this data and a data summary can be found in the last formal actuarial valuation report.

Limitations of this model

In the short term, the typical main contributors to funding position volatility are movements in the value of assets held, liability changes due to yield movements, benefit changes and deficit contributions to the Fund.

The accuracy of this type of funding update calculation is expected to decline over time. Differences between the position shown in this report and the position which a valuation would show can be significant; particularly if there have been volatile financial markets or material membership changes (these are more likely to occur in smaller Funds). It is not possible to fully assess the accuracy of this update without carrying out a full actuarial valuation.

Liability calculations are performed on the valuation date, the funding update date, anniversaries of the valuation date and each month-end in between. Interpolation is used for other dates shown in graphs. Some asset classes are not easily tracked by the benchmark indices used in this model which can lead to significant differences between actual and projected asset values.

HYMANS ROBERTSON LLP

Indices used to update projected asset values

Some of the following indices have been used to update projected asset values in this funding update.

- FTSE 100
- FTSE 250
- FTSE Small Cap
- FTSE All Share
- FTSE All World Series North America (£)
- FTSE All World Series Japan (£)
- FTSE All World Series Developed Europe (£)
- FTSE All World Series Developed Asia Pacific (£)
- FTSE All World Series All World Developed Ex UK (£)
- FTSE All World Series All World Ex UK (£)
- FTSE All World Series All Emerging (£)
- UK Government Fixed Interest Gilts (Over 15 Years)
- UK Government Index-Linked Gilts (Over 5 Years)
- UK Government Index-Linked Gilts (Over 15 Years)
- iBoxx A rated UK Corporate Bonds (Over 15 Years)
- iBoxx AA rated UK Corporate Bonds (Over 15 Years)
- iBoxx AAA rated UK Corporate Bonds (Over 15 Years)
- iBoxx All Investment Grades rated UK Corporate Bonds (Over 15 Years)
- IPD Property
- Cash Indices LIBOR 1 Month

The indices are a standard list and are not necessarily the same indices that managers have been asked to track or beat. All indices used to estimate projected asset values are total return indices. However, the market indicators quoted in this report are price indices, as these are more widely recognised.

Market information used to update liability values

Some of the following market information has been used to update liabilities values in this funding update.

- FTSE Actuaries UK Fixed Interest Gilts Yields (Over 15 Years)
- FTSE Actuaries Index-Linked Gilts (3% Inflation) Yields (Over 15 Years)
- iBoxx AA rated UK Corporate Bond Yields (Over 15 Years)

Note: Market yields displayed in the market indicators table are on an annual basis.

Market Review

UK Equities

The FTSE All-Share index fell -5.70% in the third quarter of 2015, however mid and small cap indices were less weak.

Against a backdrop of global volatility, weakened commodity prices and reduced demand, the best performing sectors within the FTSE All-Share were: non-life insurance which outperformed strongly, followed by food producers, leisure goods, tobacco and healthcare. The worst losses were experienced in the industrial metals & mining sector followed by automobiles, industrial engineering and oil & gas. Domestic-exposed stocks continued their strong out-performance at the expense of those exposed to Asia, Africa and Middle East and North America.

Mid-quarter economic news was mixed. Industrial production figures missed expectations revealing a slight rise of 0.8% year-on-year in July. As oil prices hit fresh lows, consumer-price inflation sank to 0%, down from 0.1% in July. In common with the Federal Reserve, the Bank of England (BoE) elected to keep interest rates on hold in September. Citing signs of weakness in manufacturing, the BoE also cut forecasts for GDP growth in the third quarter from 0.7% to 0.6%. On the upside, unemployment slipped slightly lower to 5.5% in August, with further evidence of wage growth.

US Equities

In the US, the S&P 500 index fell by -2.86% in sterling terms (or -6.44% in dollar terms), outperforming most other developed markets.

Positive economic data was recorded, with second-quarter GDP growth significantly outperforming that of the previous period. Following two upward revisions, the annualised growth rate was recorded at 3.9%, markedly above the weather-affected 0.6% increase seen in the first quarter. Consumer spending and housing contributed to the positive number.

The economic slowdown in China which adversely affected global markets, gave rise to suspicions that US rate rises would again be pushed out to later in the year. By the time of its announcement, the decision by the Federal Reserve (Fed) not to raise rates in September did not surprise markets. However, the dovish tone of the post-FOMC press conference did. Despite further improvement in the jobs market (unemployment reached 5.1% in August) and a degree of stability in the US economy, Fed Chair, Janet Yellen, cited a need to assess the impact of global market volatility before increasing rates. However, she also reiterated the possibility of very gradual rate rises starting before the end of 2015.

Sector returns were mixed, with retailing and utilities posting positive returns in local terms, while energy, materials, healthcare, financials and telecommunications showed negative returns. Media and technology companies had a challenging results season: Disney shares fell heavily, as results were poorly received and announcements from Apple, Microsoft, and Twitter all disappointed.

European Equities

The FTSE Europe ex-UK fell over the period, returning -4.60% in sterling terms.

At the start of the quarter, the Greek debt crisis was to the fore and the threat of a Greek exit from the eurozone influenced investors globally. Such an exit was avoided with bail-out terms agreed in July and Alexis Tsipras re-elected in September. The Greek stock market reopened in August to major falls.

Eurozone economic data was negatively affected by generally harsh conditions. After almost half a year of lingering just above zero, expectations are for the inflation rate to slip to -0.1% in September. Retail sales growth remained in positive territory, and euro-area consumer confidence reached -7.1 in September. However, second-quarter GDP growth was upwardly revised, coming in at 1.5% year over year. The European Central Bank continued with its €60-billion-per-month quantitative easing programme, and kept interest rates on hold.

Idiosyncratic risk impacted the European market towards the end of the quarter; Volkswagen shares fell dramatically when it was revealed that fuel-emission tests had been falsified and the impact spread across the sector. Elsewhere, Deutsche Bank announced the possibility of cutting up to a quarter of its workforce as the company reorganises, and Swedish retailer H&M saw its results affected by US dollar strength.

Japanese Equities

The FTSE Japan fell by -8.01% in sterling terms (and -13.28% in yen terms) over the quarter.

Second-quarter GDP growth was negative, at -1.2%, but exceeded initial estimates of -1.6%. However, the reduced demand from emerging markets saw a drop in Japan's exports of 16% on an annualised basis. Unemployment remained low, though it moved up to 3.4% from August's 3.3%. Monetary policy was held steady, with the Bank of Japan deciding against changing either rates or the pace of its quantitative-easing programme. However, the central bank's governor noted that, despite what he considered gradual improvement in the economy, action would be taken if consumer price inflation seemed unlikely to reach the Bank's 2% target.

In sector terms, only software & computing services provided positive returns with particularly heavy falls recorded in oil & gas, basic materials, industrials and telecommunications, as commodity prices and export markets declined.

Asia Pacific ex-Japan Equities

Asian markets fell significantly over the third quarter, with the MSCI AC Asia Pacific ex-Japan index losing -13.35% in sterling terms.

The region was the focus of investors' attention during the quarter as market falls in China reverberated across the globe. After a one-day plummet, on 24 August, the People's Bank of China moved again to cut both interest rates and the reserve-requirement ratio that Chinese banks must hold. The decision to weaken its currency prompted investors to worry about the pace of the country's economic slowdown and the decline continued in September. Economic data, while often in positive territory, mostly missed expectations. Year-over-year industrial production increased by 6.1% in August from 6.0% in July, and retail sales strengthened as well. GDP growth held steady at 7% from the same quarter in 2014 – slow by Chinese standards but healthy on a global scale.

Other markets within the MSCI AC Asia Pacific ex-Japan index were hit hard by the slowdown in China. Australia, the second largest regional weighting after China within the index, fell -12.05%. Australian export prices and volumes continue to be struck by decreased demand from its largest export market. Meanwhile, in India, falling commodity prices, record low inflation (3.6% in August) and slower growth prompted the Reserve Bank of India (RBI) to reduce interest rates for the fourth time this year.

Property

The IPD monthly benchmark showed a 3.42% total return over the third quarter. This was driven by both income return and positive capital growth.

The UK commercial property market continues to be strong and there is still strong demand from investors. There has been a notable improvement in tenant demand over the last quarter and competition for space has placed upward pressure on rents.

Strong competition in the investment market has led to falling property yields once again with the IPD monthly index recording a further fall in net initial yields. Investor confidence has again been strong during the quarter, and investors looking for higher returns are taking on increased risk in terms of lease length, location or tenant credit quality.

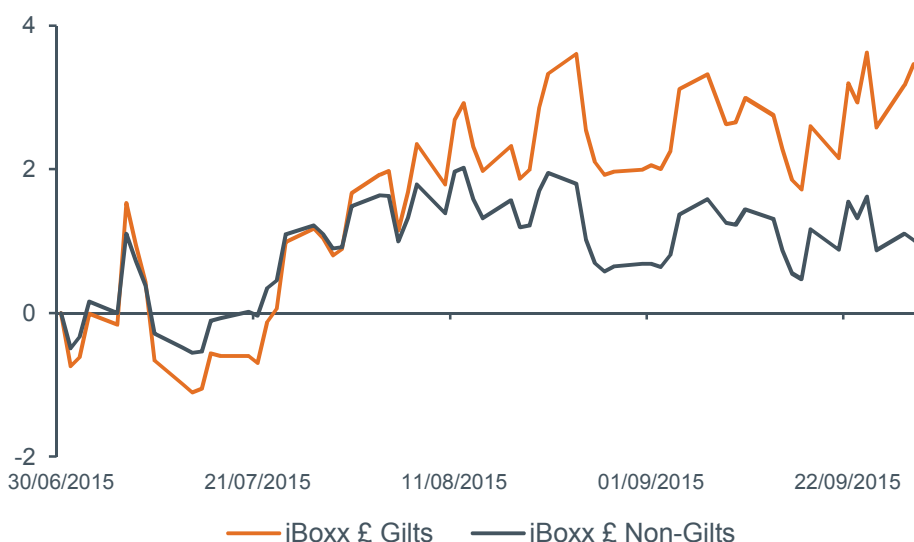

There is more stock on the market; however the best assets are seeing strong competition which is driving pricing.

Fixed Income

In recent quarterly reviews we have focused on the (albeit erratic) improvements in the global economy, and particularly in the UK and US. As we have tracked these improvements we have inevitably questioned when the easy monetary conditions that most economies and markets have enjoyed in recent years would begin to be removed. However, a combination of global and domestic economic concerns has always conspired to cause central banks (the US Federal Reserve in particular) to err on the side of caution and leave rates on hold.

During the third quarter of 2015, markets followed a similar script with initial fevered speculation surrounding the potential for the US Fed to raise rates at its September meeting soon giving way to concerns about the strength of the global economy. As we explain below, this backdrop ensured that bond markets ultimately enjoyed a positive, if volatile, third quarter.

A volatile but positive quarter for bonds

Source: Markit.com, total returns, percentage growth.

Government bonds – lower for longer?

Government bonds showed some weakness at the start of the period as the positive outcome to the latest instalment of the Greek debt crisis boosted riskier assets. The weakness however was short-lived as slightly disappointing economic data in the US and UK, coupled with further falls in commodity prices helped government bonds to rally.

While the softer economic backdrop caused some concern, it was nothing compared to the dramatic events unfolding in China from August onwards. The decision by the People's Bank of China to weaken its currency prompted investors to worry about the pace of the country's economic slowdown. These concerns were most clearly manifested in the steep falls witnessed in global equity markets. Bond yields, meanwhile, moved lower as investors pushed back their expectations of when both the US and UK central banks would start to raise rates.

By the time the Federal Reserve's September meeting arrived its significance as a potential cause of further volatility had diminished somewhat and the Fed's subsequent decision to leave rates unchanged had become expected in market pricing.

While government bonds rallied in the more risk-averse conditions, index-linked bonds underperformed. Ongoing uncertainty over when the first US rate hike would happen, coupled with renewed concerns about the strength of the global economy ensured these assets remained volatile although they still managed to produce a positive return. Overall, the iBoxx £ Gilts index returned 3.31% while the FTSE British (IL) Government All Stocks index returned 1.93%.

Table 1 : 10-year yield movements in core and European periphery benchmark bonds

Country	Core government bonds				Peripheral Europe				
	UK	US	Germany	Japan	Spain	Italy	Greece	Ireland	Portugal
Yield at end June 2015	2.02	2.35	0.76	0.47	2.30	2.33	14.99	1.65	2.98
Yield at end Sept 2015	1.76	2.04	0.59	0.36	1.89	1.72	8.16	1.24	2.39
Change in yield	-0.26	-0.31	-0.17	-0.11	-0.41	-0.61	-6.83	-0.41	-0.59

Investment grade bonds under pressure

Investment grade bonds underperformed their government bond counterparts although overall the sector managed to produce a positive absolute return; the iBoxx Non-Gilt index returned 0.91% over the quarter.

Despite the small positive return, it was in reality a poor quarter for credit with spreads (the difference in yield offered on investment grade bonds compared to government bonds) widening significantly.

Much of the turbulence witnessed within the investment grade sector was centred on issuers most directly impacted by a quicker-than-expected Chinese slowdown, in particular the large commodity producers. For example, investment grade bonds issued by mining company Glencore came under pressure as commodity prices declined further. Idiosyncratic risk also hit the autos sector after news of Volkswagen's emissions scandal in September.

The other significant event of the quarter was concern over the potential level of new issuance coming to the market. This concern held credit markets back particularly at the start of the period although for the quarter overall issuance was less than first feared.

High yield – a difficult quarter

The global high yield market fell back over the period with the Barclays Global High Yield index returning -0.06% in sterling terms. Initially, high yield bonds came under pressure due to de-risking in the energy and metals sectors as investors became concerned about slowing demand, particularly from China. As the quarter progressed however, the high yield sector as a whole fell back as investors looked to re-price high yield bonds in the face of increased uncertainty about the path of monetary policy in the US.

Quarterly Thought Piece

In 2013 the ex-Chairman of the FSA, Adair Turner, offered a new approach to monetary policy: Overt Money Finance (OMF). His analysis is long and detailed but well worth persevering with. As markets begin to conclude that all the monetary policy innovations of recent years have not restored the world economy to a well-balanced, self-sustaining expansion, the level of discussion surrounding OMF will increase significantly.

The gist of OMF is that, under certain conditions, it is appropriate for governments to finance budget deficits simply by printing more paper money, not through the stealthy purchase of existing government bonds in the manner of quantitative easing (QE), but openly.

In assessing the effectiveness (thus far) of QE, Turner reminds us that the approach relies on the effective transmission of all the cheap money through the banking/credit mechanism. As we have seen, making money cheap and plentiful to banks and owners of bonds has not resulted in a vibrant economic upswing; rather it has found its way into other financial assets. Indeed many now fear that this has created a bubble in the price of equities and property in particular that threatens to destabilise financial markets itself.

Under OMF, the cash is simply handed directly to taxpayers, with the expectation that by cutting out the 'middle man', it can be ensured that the money will be spent. As an illustration, it is possible to argue that the wave of PPI payments a few years ago were handed to people with a high propensity to consume and were of a scale (approximately 2% of UK GDP) to 'kick-start' a belated recovery in the UK. Turner, along with many other theorists, believes that the 'helicopter drops' of cash under OMF would operate in a similar manner, and improve activity.

Not long after the credit crunch, OMF was effectively employed in the US when the administration announced a one-off tax cut. As with PPI payments, the monies received were spent and the economy picked up: a further illustration of the potential of OMF. However, when the cash was gone, demand faltered afresh. OMF has to be perceived to be recurring to be effective.

In his thorough review of writings on the subject, Turner draws extensively on historical experience. He reminds us that funding government deficits through money creation is far from a new concept, having been actively advanced on several occasions over the last sixty years, and by many of the world's economic luminaries. In 2003 it was the means Bernanke exhorted the Japanese to use to get inflation back into their system. Turner laments that they didn't listen; had they done so he is convinced that Japan would now be enjoying faster nominal GDP growth and lower government debt ratios.

One of the common concerns about OMF is that it would lead to a Germany or Zimbabwe-style hyperinflation. Turner argues that by fine tuning the tax system, for example by taxing more heavily during the good times, the level of monetary stimulus ultimately required by OMF will be dimensionally smaller than through QE. Why? Because as mentioned, the intravenous application of cash will be much more effective than a process that inevitably depends on slow absorption. It is because of this scope for powerful small scale use that Turner believes that OMF needn't lead to spiralling inflation.

Nonetheless, for the more orthodox amongst us, flushing funny money through the system is the policy of madmen. As such, the policy has become such a 'taboo' subject that it rarely receives the thorough assessment it merits. Indeed, Turner worried, failure to examine the strategy in full in a timely manner could lead to it being used in too heavy-handed a manner to be safe.

When examining the suitability of OMF in 2013, Turner cautiously mused that Japan was probably too far gone for OMF to be used safely without creating huge inflation risks. Since then Shinzo Abe has launched his own cunning plan to revive the Japanese economy and rid it of deflation. Akin to the US tax windfall, Abenomics looks like it is beginning to lose momentum. Japan may well be first to embrace full OMF, especially if the US dollar starts to weaken against the yen.

Turner has expressed doubts that the political institutions were in place to allow OMF to be applied in Europe. However, in recent years the ECB has employed techniques that would previously have been thought impossible. Draghi's 'whatever it takes' could now more easily extend to OMF.

In the UK, Turner interestingly theorised that OMF could be too dangerous, because the economy has shown an unhealthy tendency toward higher inflation rather than genuine growth, and because the fabric of industry

may be unsuitable for delivering an attractive, supply side response to 'funny money'-fuelled giveaways. So far, however, the UK has not seen inflation run riot; in fact, the opposite is the case.

The scene is not yet set for policymakers to be bold enough to embark on OMF (except, perhaps, in Japan). However, should the US Federal Reserve defer higher policy rates for an indeterminate period, markets will quickly muse over what the authorities might do when eventually, and unavoidably, the economy turns down. The application of OMF is a plausible extension of QE and while it might re-write all of the rule books, investors need to give advance thought to how it would impact asset markets.

Monetary policy Trends and consequences

November 2015

Scott M Jamieson – Head of Multi-Asset Investing

Whatever it took

- ▶ In 1979 Paul Volcker (president of the US Federal Reserve) resolved to deal with inflation
 - Whatever it took
- ▶ He maintained a positive real policy interest rate of 4% for more than a decade
 - To get inflation down to around 5%
- ▶ Then at 3% for another 8 years
- ▶ To get inflation to 2-3%
- ▶ No one thought that originally it would require so much

With inflation still heading downward and now at zero, what is needed to take it higher?

Making sure deflation doesn't happen

In 2002 Ben Bernanke (later Chair of the US Federal Reserve) set out what was required to ensure that deflation is avoided. The steps necessary were:

First “the best way to get out of trouble is not to get into it in the first place”, to this end the central bank should:

1. Maintain a positive inflation rate
2. Maintain financial stability within the broad economy
3. If action is required, be bold

If deflation is still a threat then:

4. Take the policy rate to zero
5. Set a ceiling for market interest rates/ yields – not just for government bonds
6. Making open-ended purchases of bonds
7. For the CB to act as a primary lender not just a lender of last resort

Finally if all else fails:

8. Debase the currency

Bernanke never envisaged that even this might not work

Whatever it takes

“the ECB is ready to do whatever it takesbelieve me, it will be enough”

Mario Draghi, President of the ECB, 2012

“What if ‘whatever it takes’ is not enough”

Albert Edwards, Chief Strategist at SocGen, 2015

“We have spent several years watching the price of assets going up when there is no reason to suppose that they have got more valuable”

Jonathan Ruffer, Oct 2015
