Surface Dressing

The 2016/17 surface dressing season took place between April and September and has now concluded. Approximately 912,000m² of the road network was treated to prolong its serviceable life.

Poor weather conditions throughout the early part of the season meant that more working days were lost than originally estimated. This consequentially resulted in some sites having to be removed from the programme.

These uncompleted sites will be rolled forward and considered alongside other locations for the 2017/18 surface dressing programme, for which preparatory works have already commenced.

Highway Drainage Maintenance Flood Alleviation Schemes

Cost Bands A >£200k, B <£200k >£50k, C <£50k
