

**Cabinet - 24 March 2020****Item 11: Tree Management Strategy**

I note that the Strategy emphasises that “*a substantial and sustained programme of planting is now required in Leicestershire.*” (p16)

This should not just aim to replace the loss of our landscape trees and possibly Ash dieback but further to mitigate climate change through carbon sequestration, and act for pollution removal and flood attenuation (p6).

This should be fully expressed in the Action Plan.

From Max Hunt CC
