Feedback about LLR

**“..this system is failing people with learning disabilities and/or autism by keeping them in a more restrictive environment than the assessment of their condition.” April 2020**

- The Transforming Care Trajectory  
(service users in hospital)
- Annual Health checks for Service users
- Learning from Service User deaths (LeDeR)
- Our call to action today - make our county FIT

# LLR TCP Vision

**“All people with a learning disability and/or autism will have the fundamental right to live good fulfilling lives, within their communities with access to the right support from the right people at the right time”.**

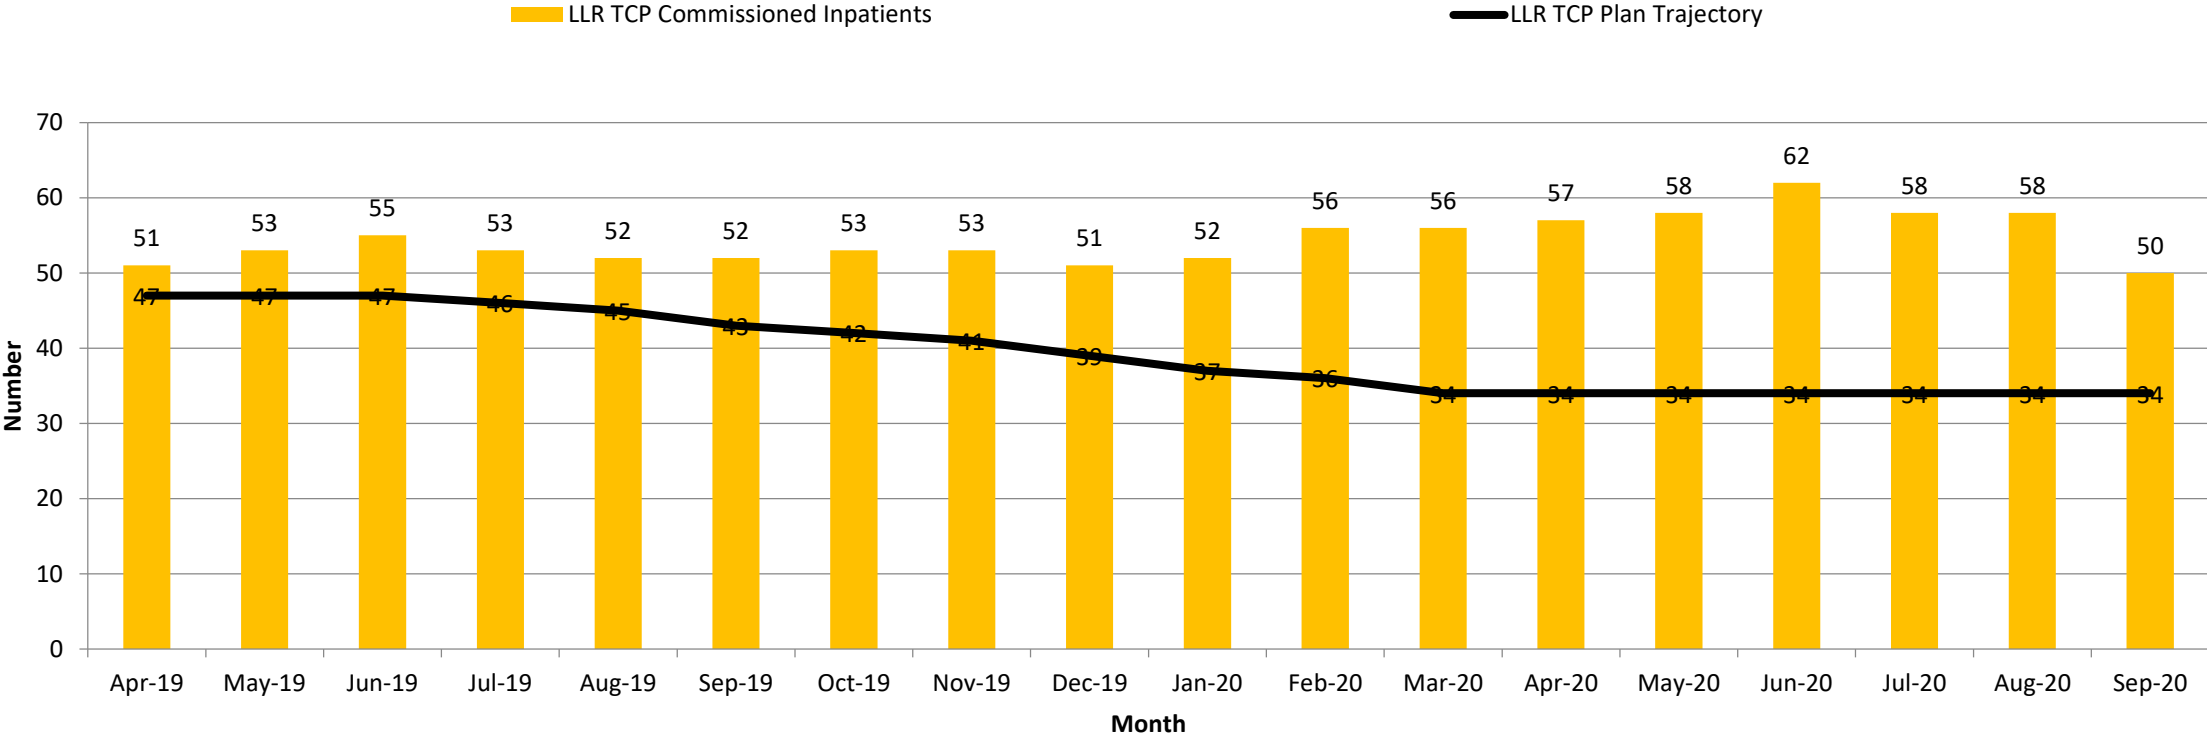

# National Priorities

- The Transforming Care Programme (TCP) was launched by NHSE in 2015
- National programme to close inpatient settings for people with Learning Disabilities (LD) and/or Autism and to develop community services closer to home
- Each local footprint was required to set up a TCP Partnership Board and to work towards a reduction in the number of local inpatients
- NHSE/I have set a monthly trajectory for Commissioners to work towards with the aim of reducing the number of individuals with LD/ASD being placed into mental health inpatient settings

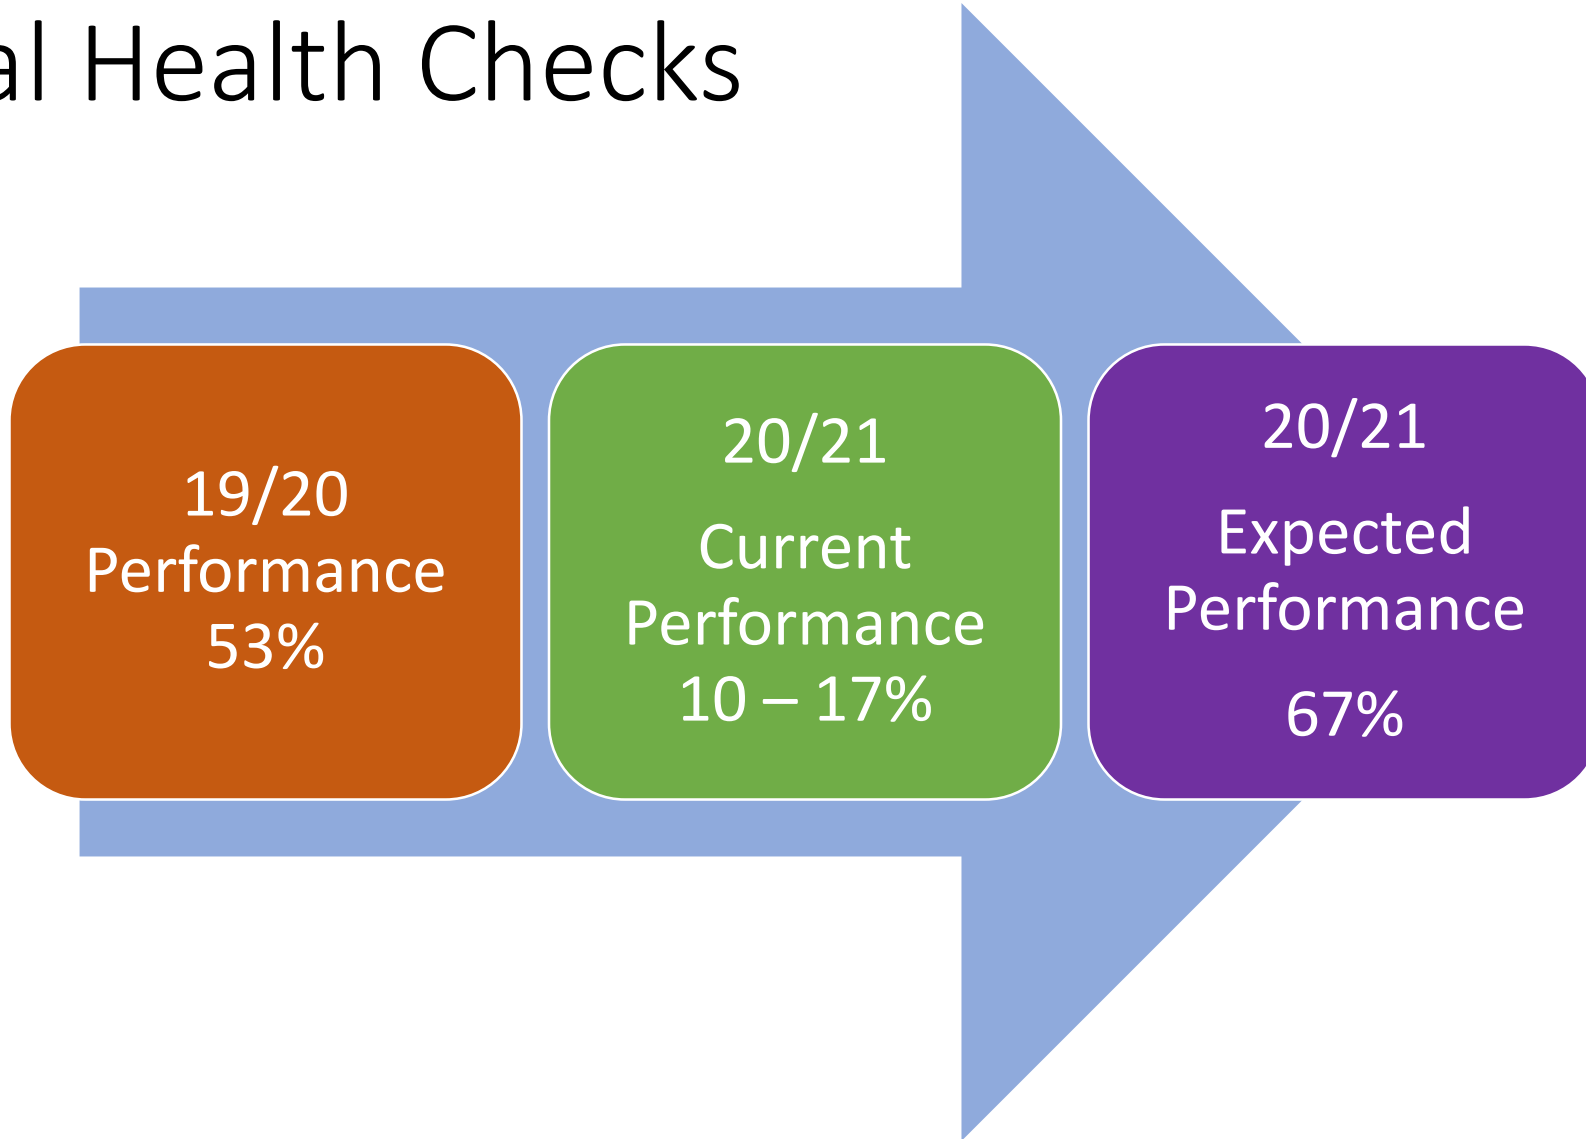

The cover of the report 'Building the right support' features logos for Local Government Association, adass (Presented by), and NHS England. The title is in blue. Below the title is a blue box with white text: 'A national plan to develop community services and close inpatient facilities for people with a learning disability and/or autism who display behaviour that challenges, including those with a mental health condition'. The main image shows a group of people, including a man in a wheelchair and a young boy. A blue bar at the bottom contains the date 'October 2015'.

The cover of the report 'Supporting people with a learning disability and/or autism who display behaviour that challenges, including those with a mental health condition' features logos for Local Government Association, adass (Presented by), and NHS England. The title is in blue. Below the title is a blue box with white text: 'Service model for commissioners of health and social care services'. The main image shows a young boy and a woman. A blue bar at the bottom contains the date 'October 2015'.

# LLR Combined Adult and CYP Inpatients vs Trajectory - April 2019 - September 2020

# Annual Health Checks

# Learning Disabilities Mortality Review (LeDeR)

- The median age of death for people with a learning disability in Leicester, Leicestershire and Rutland (LLR) is 59 years old (23 and 27 years less than our LLR population)
- 17% LeDeR referrals are from service who are from a BAME background, this is a lower % than we would expect
- Areas for improvement identified
  - Advanced Care Planning and End of Life Care
  - Communication & care coordination
  - Application of Mental Capacity Act and Best Interest decision making
  - The role of carers in diagnosis and case management

# Call to action

- We have launched “make LLR FIT for service users with LD and or autism”
  - Focussed on the Service User
  - Integrated Team approach
  - Targeted on delivery in everything we do
- Please ask and consider how our services focus and support the needs of service users with a learning disability or autism. Without strong community services, we will not provide the support our population deserve.
