How to Read This Chart

The chart is divided up into quadrants based upon average rank for all indicators (vertical axis) and net revenue expenditure per head (horizontal axis) for county councils. Authorities in the top right quadrant are high performing and low spending, while authorities in the bottom left are low performing and high spending. The 'Deprivation' comparator uses local authority 2019 Multiple Deprivation rank. 'Overall Performance' is the rank of average rank for all indicators, while 'LA Core Performance' only includes themes that are related to county council functions.

Blue dots represent county unitary authorities.
