# Best Start for Life

## Performance Summary

- Out of all the comparable indicators presented for Best Start for Life, six are red, 10 are amber and 27 are green.
- Looking at 'trend over the last five time periods', where available, three indicators are decreasing and getting worse, six indicators are increasing and getting worse, 14 indicators have no significant change, three indicators are decreasing and getting better, and four indicators are increasing and getting better.
- Of the 27 green indicators, Leicestershire ranks 1<sup>st</sup> (best performing) when compared to its similar neighbours for the following indicators:
  - o Hospital admissions as a result of self-harm (10-24 years) - Persons
  - o Hospital admissions as a result of self-harm (10-24 years) - Females
  - o Hospital admissions as a result of self-harm (10-24 years) - Males
- There are currently five indicators where, when compared to similar areas, Leicestershire performs in the bottom three (worse performing):
  - o Caesarean section %
  - o A&E attendances (Under 1 year) - Persons
  - o A&E attendances (Under 1 year) - Males
  - o School readiness: Percentage of children with free school meal status achieving a good level of development at the end of reception - Persons
  - o School readiness: Percentage of children with free school meal status achieving a good level of development at the end of reception - Males

# Leicestershire Joint Health and Wellbeing Strategy - Best Start for Life (1)

Ranking, Best and Worst columns are compared to the nearest neighbours only. Rank: 1 is calculated as the best (or lowest when no polarity is applied).

## Mental Health

### Performance Summary

- Out of all the comparable indicators presented for Mental Health, five are red, six are amber and 13 are green.
- Looking at 'trend over the last five time periods', where presented, three indicators are increasing and getting worse, one indicator is decreasing and getting worse, five indicators have no significant change, and two indicators are decreasing and getting better.
- Of the 13 green indicators, Leicestershire ranks 1<sup>st</sup> (best performing) when compared to its similar neighbours for the following indicators:
  - o Suicide rate - Persons
  - o Suicide rate - Males
  - o Hospital admissions as a result of self-harm (10-24 years) - Persons
  - o Hospital admissions as a result of self-harm (10-24 years) - Females
  - o Hospital admissions as a result of self-harm (10-24 years) - Males
  - o Hospital admissions for mental health conditions - Females
- There is currently one indicator where, when compared to similar areas, Leicestershire performs in the bottom three (worse performing):
  - o Gap in the employment rate for those in contact with secondary mental health services & on the Care Plan Approach, & the overall employment rate - Persons

# COVID recovery

## Performance Summary

- **COVID-19 vaccinations (% Uptake)**

The Covid-19 vaccination uptake in Leicestershire is higher than England for Booster/Dose 3 for those aged 12 and over as of 3<sup>rd</sup> November 2022. The percentage uptake for Dose 1 and Dose 2 in Leicestershire is lower in comparison to the national average for those aged 12 and over.

**Covid-19 Vaccination Uptake in Leicestershire 12+**

**Covid-19 Vaccination Uptake in England 12+**

Source: Coronavirus (Covid-19) in the UK dashboard (<https://coronavirus.data.gov.uk/>)

- **COVID-19 Hospital Admissions at University Hospitals of Leicester (UHL)\*\***

From March 2020 to November 5<sup>th</sup>, 2022, there have been a total of 7,334 hospital admissions with Covid-19 at UHL from Leicestershire residents. Out of the 7,334 admissions, 70% were in those aged over 60 and 30% were in those aged under 60. It is important to note that Leicestershire residents would also attend other hospitals in other counties.

- **COVID-19 Deaths\*\*\***

As of week 43 in 2022, there have been a total of 2,117 Covid-19 deaths in Leicestershire. Of the total deaths involving Covid-19 in Leicestershire, 1,454 (68.7%) were in a hospital setting and 492 (23.2%) were in a care home setting.

Since the beginning of the pandemic (week 12, 2020) there have been a total of 18,281 deaths (all causes) in Leicestershire.

Based on the average mortality data for 2015-19, we would expect 16,191 deaths in Leicestershire for this period. This reveals an excess of 2,090 deaths from any cause in Leicestershire during this period.
