

### 3. National Conditions

This section requires the Health & Wellbeing Board to confirm whether the four national conditions detailed in the Better Care Fund planning requirements for 2022-23 (link below) continue to be met through the delivery of your plan. Please confirm as at the time of completion.

<https://www.england.nhs.uk/publication/better-care-fund-planning-requirements-2022-23/>

This sheet sets out the four conditions and requires the Health & Wellbeing Board to confirm 'Yes' or 'No' that these continue to be met. Should 'No' be selected, please provide an explanation as to why the condition was not met for the year and how this is being addressed. Please note that where a National Condition is not being met, the HWB is expected to contact their Better Care Manager in the first instance.

In summary, the four national conditions are as below:

National condition 1: Plans to be jointly agreed

National condition 2: NHS contribution to adult social care is maintained in line with the uplift to NHS Minimum Contribution

National condition 3: Agreement to invest in NHS commissioned out-of-hospital services

National condition 4: Plan for improving outcomes for people being discharged from hospital

### 4. Metrics

The BCF plan includes the following metrics: Unplanned hospitalisation for chronic ambulatory care sensitive conditions, Proportion of discharges to a person's usual place of residence, Residential Admissions and Reablement. Plans for these metrics were agreed as part of the BCF planning process.

This section captures a confidence assessment on achieving the plans for each of the BCF metrics.

A brief commentary is requested for each metric outlining the challenges faced in achieving the metric plans, any support needs and successes that have been achieved.

The BCF Team publish data from the Secondary Uses Service (SUS) dataset for Discharge to usual place of residence and avoidable admissions at a local authority level to assist systems in understanding performance at local authority level.

The metrics worksheet seeks a best estimate of confidence on progress against the achievement of BCF metric plans and the related narrative information and it is advised that:

- In making the confidence assessment on progress, please utilise the available metric data along with any available proxy data.
- In providing the narrative on Challenges and Support needs, and Achievements, most areas have a sufficiently good perspective on these themes and the unavailability of published metric data for one/two of the three months of the quarter is not expected to hinder the ability to provide this useful information. Please also reflect on the metric performance trend when compared to the quarter from the previous year - emphasising any improvement or deterioration observed or anticipated and any associated comments to explain.

Please note that the metrics themselves will be referenced (and reported as required) as per the standard national published datasets.

### 5. Income and Expenditure

The Better Care Fund 2022-23 pool constitutes mandatory funding sources and any voluntary additional pooling from LAs (Local Authorities) and NHS. The mandatory funding sources are the DFG (Disabled Facilities Grant), the improved Better Care Fund (iBCF) grant, minimum NHS contribution and additional contributions from LA and NHS. This year we include final spend from the Adult Social Care discharge fund.

#### Income section:

- Please confirm the total HWB level actual BCF pooled income for 2022-23 by reporting any changes to the planned additional contributions by LAs and NHS as was reported on the BCF planning template.
- In addition to BCF funding, please also confirm the total amount received from the ASC discharge fund via LA and ICB if this has changed.
- The template will automatically pre populate the planned expenditure in 2022-23 from BCF plans, including additional contributions.
- If the amount of additional pooled funding placed into the area's section 75 agreement is different to the amount in the plan, you should select 'Yes'. You will then be able to enter a revised figure. Please enter the **actual income** from additional NHS or LA contributions in 2022-23 in the yellow boxes provided, **NOT** the difference between the planned and actual income.
- Please provide any comments that may be useful for local context for the reported actual income in 2022-23.

#### Expenditure section:

- Please select from the drop down box to indicate whether the actual expenditure in your BCF section 75 is different to the planned amount.
- If you select 'Yes', the boxes to record actual spend, and explanatory comments will unlock.
- You can then enter the total, HWB level, actual BCF expenditure for 2022-23 in the yellow box provided and also enter a short commentary on the reasons for the change.
- Please include actual expenditure from the ASC discharge fund.
- Please provide any comments that may be useful for local context for the reported actual expenditure in 2022-23.

### 6. Year End Feedback

This section provides an opportunity to provide feedback on delivering the BCF in 2022-23 through a set of survey questions

These questions are kept consistent from year to year to provide a time series.

The purpose of this survey is to provide an opportunity for local areas to consider the impact of BCF and to provide the BCF national partners a view on the impact across the country. There are a total of 5 questions. These are set out below.

#### Part 1 - Delivery of the Better Care Fund

There are a total of 3 questions in this section. Each is set out as a statement, for which you are asked to select one of the following responses:

- Strongly Agree
- Agree
- Neither Agree Nor Disagree
- Disagree
- Strongly Disagree

The questions are:

1. The overall delivery of the BCF has improved joint working between health and social care in our locality
2. Our BCF schemes were implemented as planned in 2022-23
3. The delivery of our BCF plan in 2022-23 had a positive impact on the integration of health and social care in our locality

#### Part 2 - Successes and Challenges

This part of the survey utilises the SCIE (Social Care Institute for Excellence) Integration Logic Model published on this link below to capture two key challenges and successes against the 'Enablers for integration' expressed in the Logic Model.

Please highlight:

4. Two key successes observed toward driving the enablers for integration (expressed in SCIE's logic model) in 2022-23.
5. Two key challenges observed toward driving the enablers for integration (expressed in SCIE's logic model) in 2022-23?

For each success and challenge, please select the most relevant enabler from the SCIE logic model and provide a narrative describing the issues, and how you have made progress locally.

[SCIE - Integrated care Logic Model](#)

1. Local contextual factors (e.g. financial health, funding arrangements, demographics, urban vs rural factors)
2. Strong, system-wide governance and systems leadership
3. Integrated electronic records and sharing across the system with service users
4. Empowering users to have choice and control through an asset based approach, shared decision making and co-production
5. Integrated workforce: joint approach to training and upskilling of workforce
6. Good quality and sustainable provider market that can meet demand
7. Joined-up regulatory approach
8. Pooled or aligned resources
9. Joint commissioning of health and social care
