BCF Planning Template 2024-25
1. Guidance

Overview

Note on entering information into this template

Throughout the template, cells which are open for input have a yellow background and those that are pre-populated have a blue background, as below:

Data needs inputting in the cell
Pre-populated cells

2. Cover

1. The cover sheet provides essential information on the area for which the template is being completed, contacts and sign off. To view pre-populated data for your area and begin completing your template, you should select your HWB from the top of the sheet.

2. Question completion tracks the number of questions that have been completed; when all the questions in each section of the template have been completed the cell will turn green. Only when all cells in this table are green should the template be sent to the Better Care Fund Team: england.bettercarefundteam@nhs.net (please also copy in your Better Care Manager).

3. The checker column, which can be found on each individual sheet, updates automatically as questions are completed. It will appear red and contain the word 'No' if the information has not been completed. Once completed the checker column will change to green and contain the word 'Yes'.

4. The 'sheet completed' cell will update when all 'checker' values for the sheet are green containing the word 'Yes'.

5. Once the checker column contains all cells marked 'Yes' the 'Incomplete Template' cell (below the title) will change to 'Template Complete'.

6. Please ensure that all boxes on the checklist are green before submission.

7. Sign off - HWB sign off will be subject to your own governance arrangements which may include delegated authority. If your plan has been signed off by the full HWB, or has been signed off through a formal delegation route, select YES. If your plan has not yet been signed off by the HWB, select NO.

4. Capacity and Demand

A full capacity and demand planning document has been shared on the Better Care Exchange, please check this document before submitting any questions on capacity and demand planning to your BCM. Below is the basic guidance for completing this section of the template.

As with the last capacity and demand update, summary tables have been included at the top of both capacity and demand sheets that will auto-fill as you complete the template, providing and at-a-glance summary of the detail below.

4.2 Hospital Discharge

A new text field has been added this year, asking for a description of the support you are providing to people for less complex discharges that do not require formal reablement or rehabilitation. Please answer this briefly, in a couple of sentences.

The capacity section of this template remains largely the same as in previous years, asking for estimates of available capacity for each month of the year for each pathway. An additional ask has now also been included, for the estimated average time between referral and commencement of service. Further information about this is available in the capacity and demand guidance and q&a documents.

The demand section of this sheet is unchanged from last year, requesting expected discharges per pathway for each month, broken down by referral source.

To the right of the summary table, there is another new requirement for areas to include estimates of the average length of stay/number of contact hours for individuals on each of the discharge pathways. Please estimate this as an average across the whole year.

4.3 Community

Please enter estimated capacity and demand per month for each service type.

The community sheet also requires areas to enter estimated average length of stay/number of contact hours for individuals in each service type for the whole year.

5. Income

1. This sheet should be used to specify all funding contributions to the Health and Wellbeing Board's (HWB) Better Care Fund (BCF) plan and pooled budget for 2024-25. It will be pre-populated with the minimum NHS contributions to the BCF, iBCF grant allocations, DFG allocations and allocations of ASC Discharge Fund grant to local authorities for 2024-25. The iBCF grant in 2024-25 remains at the same value nationally as in 2023-24.

2. The sheet will be largely auto-populated from either 2023-25 plans or confirmed allocations. You will be able to update the value of the following income types locally:

- ICB element of Additional Discharge Funding
- Additional Contributions (LA and ICB)

If you need to make an update to any of the funding streams, select 'yes' in the boxes where this is asked and cells for the income stream below will turn yellow and become editable. Please use the comments boxes to outline reasons for any changes and any other relevant information.

3. The sheet will pre populate the amount from the ICB allocation of Additional Discharge Funding that was entered in your original BCF plan. Areas will need to confirm and enter the final agreed amount that will be allocated to the HWB's BCF pool in 2024-25. As set out in the Addendum to the Policy Framework and Planning Requirements; the amount of funding allocated locally to HWBs should be agreed between the ICB and councils. These will be checked against a separate ICB return to ensure they reconcile.

4. The additional contributions from ICBs and councils that were entered in original plans will pre-populate. Please confirm the contributions for 2024-25. If there is a change to these figures agreed in the final plan for 2024-25, please select 'Yes' in answer to the Question 'Do you wish to update your Additional (LA/ICB) Contributions for 2024-25?'. You will then be able to enter the revised amount. These new figures will appear as funding sources in sheet 6a when you are reviewing planned expenditure.

5. Please use the comment boxes alongside to add any specific detail around this additional contribution.

6. If you are pooling any funding carried over from 2023-24 (i.e. underspends from BCF mandatory contributions) you should show these as additional contributions, but on a separate line to any other additional contributions. Use the comments field at the bottom of the sheet to identify that these are underspends that have been rolled forward. All allocations are rounded to the nearest pound.

7. Allocations of the NHS minimum contribution are shown as allocations from each ICB to the HWB area in question. Where more than one ICB contributes to the area's BCF plan, the minimum contribution from each ICB to the local BCF plan will be displayed.

8. For any questions regarding the BCF funding allocations, please contact england.bettercarefundteam@nhs.net (please also copy in your Better Care Manager).

6. Expenditure

This sheet has been auto-populated with spending plans for 2024-25 from your original 2023-25 BCF plans. You should update any 2024-25 schemes that have changed from the original plan. The default expectation is that plans agreed in the original plan will be taken forward, but where changes to schemes have been made (or where a lower level of discharge fund allocation was assumed in your original plan), the amount of expenditure and expected outputs can be amended. There is also space to add new schemes, where applicable.

If you need to make changes to a scheme, you should select yes from the drop down in column X. When 'yes' is selected in this column, the 'updated outputs for 2024-25' and 'updated spend for 2024-25' cells turn yellow and become editable for this scheme. If you would like to remove a scheme type please select yes in column X and enter zeros in the editable columns. The columns with yellow headings will become editable once yes is selected in column X - if you wish to make further changes to a scheme, please enter zeros into the editable boxes and use the process outlined below to re-enter the scheme.

If you need to add any new schemes, you can click the link at the top of the sheet that reads 'to add new schemes' to travel quickly to this section of the table.

For new schemes, as with 2023-25 plans, the table is set out to capture a range of information about how schemes are being funded and the types of services they are providing. There may be scenarios when several lines need to be completed in order to fully describe a single scheme or where a scheme is funded by multiple funding streams (eg: iBCF and NHS minimum). In this case please use a consistent scheme ID for each line to ensure integrity of aggregating and analysing schemes.

On this sheet, please enter the following information:

1. Scheme ID:
- This field only permits numbers. Please enter a number to represent the Scheme ID for the scheme being entered. Please enter the same Scheme ID in this column for any schemes that are described across multiple rows.

2. Scheme Name:

- This is a free text field to aid identification during the planning process. Please use the scheme name consistently if the scheme is described across multiple lines in line with the scheme ID described above.

3. Brief Description of Scheme

- This is a free text field to include a brief headline description of the scheme being planned. The information in this field assists assurers in understanding how funding in the local BCF plan is supporting the objectives of the fund nationally and aims in your local plan.

4. Scheme Type and Sub Type:

- Please select the Scheme Type from the drop-down list that best represents the type of scheme being planned. A description of each scheme is available in tab 6b.

- Where the Scheme Types has further options to choose from, the Sub Type column alongside will be editable and turn ""yellow"". Please select the Sub Type from the dropdown list that best describes the scheme being planned.

- Please note that the dropdown list has a scroll bar to scroll through the list and all the options may not appear in one view.

- If the scheme is not adequately described by the available options, please choose 'Other' and add a free field description for the scheme type in the column alongside. Please try to use pre-populated scheme types and sub types where possible, as this data is important in assurance and to our understanding of how BCF funding is being used nationally.

- The template includes a field that will inform you when more than 5% of mandatory spend is classed as other.

5. Expected outputs
- You will need to set out the expected number of outputs you expect to be delivered in 2024-25 for some scheme types. If you select a relevant scheme type, the 'expected outputs' column will unlock and the unit column will pre populate with the unit for that scheme type.

- You will not be able to change the unit and should use an estimate where necessary. The outputs field will only accept numeric characters.

- A table showing the scheme types that require an estimate of outputs and the units that will prepopulate can be found in tab 6b. Expenditure Guidance.

 You do not need to fill out these columns for certain scheme types. Where this is the case, the cells will turn blue and the column will remain empty.

- A change has been made to the standard units for residential placements. The units will now read as 'Beds' only, rather than 'Beds/placements'

6. Area of Spend:
- Please select the area of spend from the drop-down list by considering the area of the health and social care system which is most supported by investing in the scheme.

- Please note that where 'Social Care' is selected and the source of funding is "NHS minimum" then the planned spend would count towards eligible expenditure on social care under National Condition 4.

7. Commissioner:

- Identify the commissioning body for the scheme based on who is responsible for commissioning the scheme from the provider.

- Please note this field is utilised in the calculations for meeting National Condition 3. Any spend that is from the funding source 'NHS minimum contribution', is commissioned by the ICB, and where the spend area is not 'acute care', will contribute to the total spend on NHS commissioned out of hospital services under National Condition 4. This will include expenditure that is ICB commissioned and classed as 'social care'.

- If the scheme is commissioned jointly, please select 'Joint'. Please estimate the proportion of the scheme being commissioned by the local authority and NHS and enter the respective percentages on the two columns.

8. Provider:
- Please select the type of provider commissioned to provide the scheme from the drop-down list.

- If the scheme is being provided by multiple providers, please split the scheme across multiple lines.

9. Source of Funding:
- Based on the funding sources for the BCF pool for the HWB, please select the source of funding for the scheme from the drop down list. This includes additional, voluntarily pooled contributions from either the ICB or Local authority

- If a scheme is funded from multiple sources of funding, please split the scheme across multiple lines, reflecting the financial contribution from each.

10. Expenditure (£)2024-25:
- Please enter the planned spend for the scheme (or the scheme line, if the scheme is expressed across multiple lines)

11. New/Existing Scheme
- Please indicate whether the planned scheme is a new scheme for this year or an existing scheme being carried forward.

12. Percentage of overall spend.

This new requirement asks for the percentage of overall spend in the HWB on that scheme type. This was a new collection for 2023-25. This information will help better identify and articulate the contribution of BCF funding to delivering capacity.

You should estimate the overall spend on the activity type in question across the system (both local authority and ICB commissioned where both organisations commission this type of service). Where the total spend in the system is not clear, you should include an estimate. The figure will not be subject to assurance. This estimate should be based on expected spend in that category in the BCF over both years of the programme divided by both years total spend in that same category in the system.

7. Metrics

This sheet should be used to set out the HWB's ambitions (i.e. numerical trajectories) and performance plans for each of the BCF metrics in 2024-25. The BCF policy requires trajectories and plans agreed for the fund's metrics. Systems should review current performance and set realistic, but stretching ambitions for 2024-25.

Some changes have been made to the metrics since 2023-25 planning; further detail about this is available in the Addendum to the BCF Policy Framework and Planning Requirements 2023-25. The avoidable admissions, discharge to usual place of residence and falls metrics remain the same. Due to the standing down of the SALT data collection, changes have been made to the effectiveness of reablement and permanent admissions metrics.

The effectiveness of reablement metric will no longer be included in the BCF as there is no direct replacement for the previous measure.

The metric for rate of admissions to Areas should set their ambitions for these metrics based on previous SALT data.

A data pack showing more up to date breakdowns of data for the discharge to usual place of residence and unplanned admissions for ambulatory care sensitive conditions is available on the Better Care Exchange.

For each metric, areas should include narratives that describe:

- a rationale for the ambition set, based on current and recent data, planned activity and expected demand

- the local plan for improving performance on this metric and meeting the ambitions through the year. This should include changes to commissioned services, joint working and how BCF funded services will support this.

1. Unplanned admissions for chronic ambulatory care sensitive conditions:
- This section requires the area to input indirectly standardised rate (ISR) of admissions per 100,000 population by quarter in 2024-25. This will be based on NHS Outcomes Framework indicator 2.3i but using latest available population data.
- The indicator value is calculated using the indirectly standardised rate of admission per 100,000, standardised by age and gender to the national figures in reference year 2011. This is calculated by working out the SAR (observed admission/expected admissions*100) and multiplying by the crude rate for the

- The population data used is the latest available at the time of writing (2021)

- Actual performance for each quarter of 2023-24 are pre-populated in the template and will display once the local authority has been selected in the dropdown box on the Cover sheet.

- Please use the ISR Tool published on the BCX where you can input your assumptions and simply copy the output ISR:

https://future.nhs.uk/bettercareexchange/view?objectId=143133861

- Technical definitions for the guidance can be found here:

https://digital.nhs.uk/data-and-information/publications/statistical/nhs-outcomes-framework/march-2022/domain-2---enhancing-quality-of-life-for-people-with-long-term-conditions-nof/2.3.i-unplanned-hospitalisation-for-chronic-ambulatory-care-sensitive-conditions

2. Falls
- This metric for the BCF requires areas to agree ambitions for reducing the rate of emergency admissions to hospital for people aged 65 or over following a fall.
- This is a measure in the Public Health Outcome Framework.
- This requires input for an Indicator value which is directly age standardised rate per 100,000. Emergency hospital admissions due to falls in people aged 65 and over.
- Please enter the indicator value as well as the expected count of admissions and population for 2023-24 and 2024-25 plan.
- We have pre-populated the previously entered planned figures for your information and further more recent data will be available on the BCX in the data pack here: https://future.nhs.uk/bettercareexchange/view?objectID=116035109
Further information about this measure and methodolgy used can be found here:
https://fingertips.phe.org.uk/profile/public-health-outcomes-framework/data#page/6/gid/1000042/pat/6/par/E12000004/ati/102/are/E06000015/iid/22401/age/27/sex/4

3. Discharge to usual place of residence.
- Areas should agree ambitions for the percentage of people who are discharged to their normal place of residence following an inpatient stay. Areas should agree ambitions for a rate for each quarter of the year.
- The ambition should be set for the health and wellbeing board area. The data for this metric is obtained from the Secondary Uses Service (SUS) database and is collected at hospital trust. A breakdown of data from SUS by local authority of residence has been made available on the Better Care Exchange to assist areas to set ambitions.
- Ambitions should be set as the percentage of all discharges where the destination of discharge is the person's usual place of residence.
- Actual performance for each quarter of 2022-23 are pre-populated in the template and will display once the local authority has been selected in the drop down box on the Cover sheet where available else we will use the previously entered plan data.

4. Residential Admissions:
- This section requires inputting the expected and plan numerator of the measure only.
- Please enter the planned number of council-supported older people (aged 65 and over) whose long-term support needs will be met by a change of setting to residential and nursing care during the year (excluding transfers between residential and nursing care)
- Column H asks for an estimated actual performance against this metric in 2023-24. Data for this metric is not published until October, but local authorities will collect and submit this data as part of their salt returns in July. You should use this data to populate the estimated data in column H.
- The prepopulated denominator of the measure is the size of the older people population in the area (aged 65 and over) taken from Office for National Statistics (ONS) subnational population projections.
- The annual rate is then calculated and populated based on the entered information.
- Although this data collection will be discontinued it is anticipated this will map across to the new CLD extract once this becomes available.
