

HM Government

Better Care Fund 2025-26 Update Template

1. Guidance

Overview

HWBs will need to submit a narrative plan and a planning template which articulates their goals against the BCF objectives and how they will meet the national conditions in line with the requirements and guidance set out in the table on BCF Planning Requirements (published).

Submissions of plans are due on the 31 March 2025 (noon). Submissions should be made to the national Better Care Fund england.bettercarefundteam@nhs.net and regional Better Care Managers.

This guidance provides a summary of the approach for completing the planning template, further guidance is available on the Better Care Exchange.

Functional use of the template

We are using the latest version of Excel in Office 365, an older version may cause an issue.

Throughout the template, cells which are open for input have a yellow background and those that are pre-populated have a blue background, as below:

Data needs inputting in the cell

Pre-populated cells

This template is password protected to ensure data integrity and accurate aggregation of collected information. A resubmission may be required if this is breached.

Within the BCF submission guidance there will be guidance to support collaborating across HWB on the completion of templates.

Data Sharing Statement

This section outlines important information regarding Data Sharing and how the data provided during this collection will be used. This statement covers how NHS England will use the information provided. Advice on local information governance which may be of interest to ICSs can be seen at <https://data.england.nhs.uk/sudgt/> - Please provide your submission using the relevant platform as advised in submission and supporting technical guidance.

2. Cover

The cover sheet provides essential information on the area for which the template is being completed, contacts and sign off. To view pre-populated data for your area and begin completing your template, you should select your HWB from the top of the sheet.

Governance and sign-off

National condition one outlines the expectation for the local sign off of plans. Plans must be jointly agreed and be signed off in accordance with organisational governance processes across the relevant ICB and local authorities. Plans must be accompanied by signed confirmation from local authority and ICB chief executives that they have agreed to their BCF plans, including the goals for performance against headline metrics. This accountability must not be delegated.

Data completeness and data quality:

- Question completion tracks the number of questions that have been completed; when all the questions in each section of the template have been completed the cell will turn green. Only when all cells in this table are green should the template be sent to the Better Care Fund Team: england.bettercarefundteam@nhs.net (please also copy in your Better Care Manager).
- The checker column, which can be found on each individual sheet, updates automatically as questions are completed. It will appear red and contain the word 'No' if the information has not been completed. Once completed the checker column will change to green and contain the word 'Yes'.
- The 'sheet completed' cell will update when all 'checker' values for the sheet are green containing the word 'Yes'.
- Once the checker column contains all cells marked 'Yes' the 'Incomplete Template' cell (below the title) will change to 'Template Complete'. Please ensure that all boxes on the checklist are green before submission.

3. Summary

The summary sheet brings together the income and expenditure information, pulling through data from the Income and Expenditure tabs and also the headline metrics into a summary sheet. This sheet is automated and does not require any inputting of data.

4. Income

This sheet should be used to specify all funding contributions to the Health and Wellbeing Boards (HWB) Better Care Fund (BCF) plan and pooled budget for 2025-26. The final planning template will be pre-populated with the NHS minimum contributions, Disabled Facilities Grant and Local Authority Better Care Grant. Please note the Local Authority Better Care Grant was previously referred to as the IBCF. For any questions regarding the BCF funding allocations, please contact england.bettercarefundteam@nhs.net (please also copy in your Better Care Manager).

Additional Contributions

This sheet also allows local areas to add in additional contributions from both the NHS and LA. You will be able to update the value of any Additional Contributions (LA and NHS) income types locally. If you need to make an update to any of the funding streams, select 'yes' in the boxes where this is asked and cells for the income stream below will turn yellow and become editable. Please use the comments boxes to outline reasons for any changes and any other relevant information.

Unallocated funds

Plans should account for full allocations meaning no unallocated funds should remain once the template is complete.

5. Expenditure

For more information please see tab 5a Expenditure guidance.

6. Metrics

Some changes have been made to the BCF metrics for 2025-26; further detail about this is available in the Metrics Handbook on the Better Care Exchange. The avoidable admissions, discharge to usual place of residence and falls metrics/indicators remain the same. Due to the standing down of the SALT data collection, changes have been made to the effectiveness of reablement and permanent admissions metrics/indicators.

For 2025-26 the planning requirements will consist of 3 headline metrics and for the planning template only the 3 headline metrics will be required to have plans entered. HWB areas may wish to also draw on supplementary indicators and there is scope to identify whether HWB areas are using these indicators in the Metrics tab. The narrative should elaborate on these headline metrics [and may] also take note of the supplementary indicators. The data for headline metrics will be published on a DHSC hosted metrics dashboard but the sources for each are also listed below:

1. Emergency admissions to hospital for people aged 65+ per 100,000 population. (monthly)
- This is a count of non-elective inpatient spells at English hospitals with a length of stay of at least 1 day, for specific acute treatment functions and patients aged 65+
 - This requires inputting of both the planned count of emergency admissions as well as the projection 65+ population figure on monthly basis
 - This will then auto populate the rate per 100,000 population for each month
- <https://digital.nhs.uk/supplementary-information/2025/non-elective-inpatient-spells-at-english-hospitals-occurring-between-01-04-2020-and-30-11-2024-for-patients-aged-18-and-65>

Supplementary indicators:
Unplanned hospital admissions for chronic ambulatory care sensitive conditions.
Emergency hospital admissions due to falls in people aged 65+.

2. Average number of days from Discharge Ready Date to discharge (all adult acute patients). (monthly)
- This requires inputting the % of total spells where the discharge was on the discharge ready date and also the average length of delay in days for spells where there was a delay.
 - A composite measure will then auto calculate for each month described as 'Average length of discharge delay for all acute adult patients'
 - This is a new SUS-based measure where data for this only started being published at an LA level since September hence the large number of missing months but early thinking about this metric is encouraged despite the lack of available data.
- <https://www.england.nhs.uk/statistics/statistical-work-areas/discharge-delays/discharge-ready-date/>
- Supplementary indicators:
Patients not discharged on their DRD, and discharged within 1 day, 2-3 days, 4-6 days, 7-13 days, 14-20 days and 21 days or more.
Local data on average length of delay by discharge pathway.

3. Admissions to long term residential and nursing care for people aged 65+ per 100,000 population. (quarterly)
- This section requires inputting the expected numerator (admissions) of the measure only.
 - Please enter the planned number of council-supported older people (aged 65 and over) whose long-term support needs will be met by a change of setting to residential and nursing care during the year (excluding transfers between residential and nursing care)
 - Column H asks for an estimated actual performance against this metric in 2024-25. Data for this metric is not yet published, but local authorities will collect and submit this data as part of their SALT returns. You should use this data to populate the estimated data in column H.
 - The pre-populated cells use the 23-24 SALT data, but you have an option of using this or local data to use as reference to set your goals.
 - The pre-populated denominator of the measure is the size of the older people population in the area (aged 65 and over) taken from Office for National Statistics (ONS) mid-year population estimates. This is changed from last year to standardize the population figure used.
 - The annual rate is then calculated and populated based on the entered information.
- <https://digital.nhs.uk/data-and-information/publications/statistical/adult-social-care-outcomes-framework-ascof/england-2023-24>
- Supplementary indicators:
Hospital discharges to usual place of residence.
Proportion of people receiving short-term reablement following hospital discharge and outcomes following short term reablement.

7. National conditions

This section requires the Health & Wellbeing Board to confirm whether the four national conditions detailed in the Better Care Fund Policy Framework for 2025-26 (link below) will be met through the delivery of your plan. (Post testing phase: add in link of Policy Framework and Planning requirements)

This sheet sets out the four conditions, where they should be completed and requires the Health & Wellbeing Board to confirm 'Yes' or 'No' that the HWB meets expectation. Should 'No' be selected, please note the actions in place towards meeting the requirement and outline the timeframe for resolution.
In summary, the four National conditions are as below:

- National condition 1: Plans to be jointly agreed
- National condition 2: Implementing the objectives of the BCF
- National condition 3: Complying with grant and funding conditions, including maintaining the NHS minimum contribution to adult social care (ASC)
- National condition 4: Complying with oversight and support processes
- How HWB areas should demonstrate this are set out in Planning Requirements
