

Public Health and Prevention Indicators in Leicestershire

This dashboard presents performance data for Leicestershire on a range of Public Health and prevention indicators. The indicators included cover life expectancy, health improvement, health protection and healthcare and mortality.

Nearest Neighbour Rank (NN Rank): 1 is calculated as the best (or lowest when no polarity is applied).

Direction of Travel (DoT): Trend based on most recent five time periods.

RAG: Statistical significance compared to England or Benchmark.

Trendline: The scale and range of the vertical axis of each line graph changes in line with the values presented, where charts have a small axis range this can result in small differences between values appearing more considerable.

Notes:

-Indicator 'HIV late diagnosis in people first diagnosed with HIV in the UK' should have a red RAG for 2010-12.

-Indicators 'Successful completion of drug treatment: opiate users' and 'Successful completion of drug treatment: non opiate users' present figures for Leicestershire and Rutland combined.
