

Public Health and Prevention Indicators in Leicestershire

This dashboard presents performance data for Leicestershire on a range of Public Health and prevention indicators. The indicators included cover life expectancy, health improvement, health protection and healthcare and mortality.

Nearest Neighbour Rank (NN Rank): 1 is calculated as the best (or lowest when no polarity is applied). **Direction of Travel (DoT):** Trend based on most recent five time periods.

RAG: Statistical significance compared to England or Benchmark.

Trendline: The scale and range of the vertical axis of each line graph changes in line with the values presented, where charts have a small axis range this can result in small differences between values appearing more considerable.

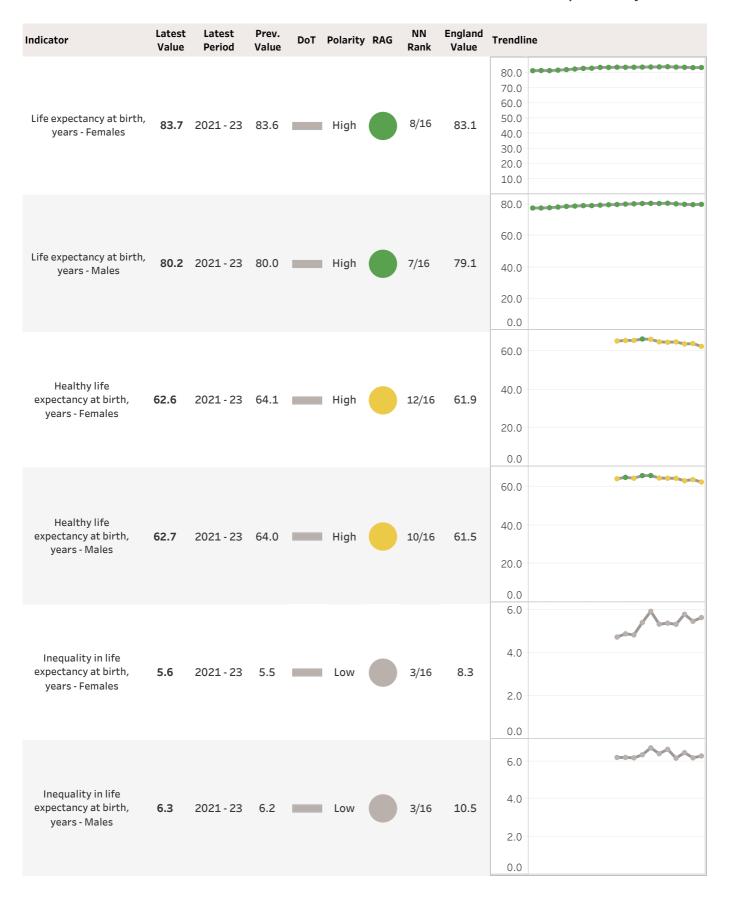

Notes:

-Indicators 'Successful completion of drug treatment: opiate users' and 'Successful completion of drug treatment: non opiate users' present figures for Leicestershire and Rutland combined.

Statistical significance com	npared	Direction of travel:			
to England or Benchmark:	Better	_	Cannot be calculated		
	Similar	9	No significant change		
	Worse	•	Decreasing and getting better		
	Not compared	•	Decreasing and getting worse		
		•	Increasing and getting better		
		•	Increasing and getting worse
